

HD Foam Cleaner

OZONE COMPATIBLE FOAMING CLEANER

North Woods® HD Foam Cleaner was designed with your staff and facility in mind. User and surface friendly, HD Foam Cleaner is unbelievably gentle and mild, yet excels on grease and fat laden food processing surfaces.

Meat, cheese, milk, and proteinaceous films melt like butter under its barrage of surfactant powered bubbles.

HD is a non-butyl, mildly alkaline detergent cleaner that is fantastic when used through foaming equipment. Excels without ozone, but enhancing it with ozone, supercharges its performance. Terrific at breaking bio films.

DIRECTIONS FOR USE

Light soils dilute up to 80:1
Medium soils dilute up to 50:1
Heavy soils dilute up to 20:1

HD Foam Cleaner can also be used manually with mop or brush, as a low-pressure spray, in a soak tank application.

BENEFITS

- Extremely economical
- High foaming formulation
- Gentle to users and surfaces
- Cleans and brightens
- Leaves stainless clean and streak free
- Rapidly saponifies meat, cheese, and vegetable oils
- Fantastic at removing allergens from surfaces
- Unique surfactant formulation outperforms caustic, chlorinated cleaners
- No caustic fumes
- Ozone compatible for supercharged performance
- Highly concentrated
- Fragrance free
- Powerful formulation excels on proteinaceous soil
- Rapidly breaks down biofilms
- Dissolves sugars, syrups, and dough instantly
- Chlorine free
