Agenda

NERC ERT v8.1 Updates

Overview of FERC Staff Report:
“2023 Lessons Learned from
Commission-Led CIP Reliability
Audits”

NERC ERT v8.1

Evidence Request Tool (ERT) V7.0 to V8.1 Change List February 2, 2024

List of Changes

Instructions Tab

- Row 2
- Changed Version 7.0 to 8.1

Level 1 Tab

- Added SEL Reference ID column for entities to copy SEL Reference IDs into ALGIN
- Updated the following CIP versions:
 - CIP-004.6 to CIP-004.7
 - CIP-013.2 to CIP-013.3
- Removed CIP-004.6 and CIP-013.2 references from request language.
- Column Response Due Date is hidden by default.
- Due dates are now determined by ALGIN RFI due dates.
- Added Request ID CIP-003-R2-L2-04
- This is the same request as CIP-003-R2-L2-03, but for R2
- Added SEL Reference ID column for entities to copy SEL Reference IDs into ALGIN
- Added errors for each standard in the "Standard" field
- Request ID CIP-008-R2-L1-01 was broken out into 4 separate requests, one for each requirement:
 - CIP-008-R2-L1-01 for R1
 - CIP-008-R2-L1-01 for R2
 - CIP-008-R2-L1-01 for R3
 - CIP-008-R2-L1-01 for R4

CIP Evidence Request Tool User Guide

Version 8.1

February 2, 2024

CIP ERT v8.1 User Guide

NORTHEAST POWER COORDINATING COUNCIL, INC.

Request ID	Standard	Requirement	Sample Set	Sample Set Source & Description	Sample Set Evidence Request	Sample Set Index Numbers & Date	SEL Reference ID
CIP-003-R2-L2-01	CIP-003-8	R2 Sect 2	BES-Assets-L2-01	Source Tab: BES Assets Description: Sample of BES Assets which contain a low impact BES Cyber System	For each BES asset containing a low impact BES Cyber System in Sample Set BES-Assets-L2-01, provide evidence that physical security controls were implemented for the asset, based on need as determined by entity, to: 1. The asset or the locations of the asset; and 2. The Cyber Asset(s), as specified in the asset, to prevent unauthorized electronic access	N/A	NPCC NCR99999 ME99-00000 ME99-00000,CIP-003-R2-L2-01 CIP-003-8 R252 2
CIP-003-R2-L2-02	CIP-003-8	R2 Sect 3.1	BES-Assets-L2-02	Source Tab: BES Assets Description: Sample of BES Assets which contain a low impact BES Cyber System with routable protocol communication entering or leaving the asset containing the low impact BES Cyber System	For each BES asset containing a low impact BES Cyber System in Sample Set BES-Assets-L2-02, provide the following evidence: 1. Representative diagram(s) of the Cyber Asset with routable protocol communication entering or leaving the asset; and 2. The inbound and outbound communication for the Cyber Asset with routable protocol communication entering or leaving the asset; and 3. Documentation to demonstrate the Cyber Asset with routable protocol communication entering or leaving the asset is protected by physical security controls	N/A	NPCC NCR99999 ME99-00000 ME99-00000,CIP-003-R2-L2-02 CIP-003-8 R253.1 3.1
CIP-003-R2-L2-03	CIP-003-8	R2 Sect 3.2	BES-Assets-L2-03	Source Tab: BES Assets Description: Sample of BES Assets which contain a low impact BES Cyber System with routable protocol communication entering or leaving the asset containing the low impact BES Cyber System	For each BES asset containing a low impact BES Cyber System in Sample Set BES-Assets-L2-03, provide the following evidence: 1. Representative diagram(s) of the Cyber Asset with routable protocol communication entering or leaving the asset; and 2. The inbound and outbound communication for the Cyber Asset with routable protocol communication entering or leaving the asset; and 3. Documentation to demonstrate the Cyber Asset with routable protocol communication entering or leaving the asset is protected by physical security controls	N/A	NPCC NCR99999 ME99-00000 ME99-00000,CIP-003-R2-L2-03 CIP-003-8 R253.2 3.2
CIP-003-R2-L2-04	CIP-003-8	R2 Sect 4.2	CSI-L2-01	Source Tab: CSI Description: Sample of Cyber Security Incidents in Sample Set CSI-L2-01, provide evidence that the Responsible Entity for the incident implemented the following controls:	For each Cyber Security Incident in Sample Set CSI-L2-01, provide evidence that the Responsible Entity for the incident implemented the following controls: 1. The incident was identified and reported to the Responsible Entity for the incident; 2. The incident was investigated and the Responsible Entity for the incident determined the cause of the incident; 3. The incident was contained and the Responsible Entity for the incident implemented controls to prevent recurrence of the incident;	N/A	NPCC NCR99999 ME99-00000 ME99-00000,CIP-003-R2-L2-04 CIP-003-8 R254.2 4.2
CIP-003-R2-L2-05	CIP-003-8	R2 Sect 5.1	TCA-L2-01	Source Tab: TCA Description: Sample of the Responsible Entity for the incident implemented the following controls:	For each Cyber Security Incident in Sample Set CSI-L2-01, provide evidence that the Responsible Entity for the incident implemented the following controls: 1. The incident was identified and reported to the Responsible Entity for the incident; 2. The incident was investigated and the Responsible Entity for the incident determined the cause of the incident; 3. The incident was contained and the Responsible Entity for the incident implemented controls to prevent recurrence of the incident;	N/A	NPCC NCR99999 ME99-00000 ME99-00000,CIP-003-R2-L2-05 CIP-003-8 R255.1 5.1
CIP-003-R2-L2-06	CIP-003-8	R2 Sect 5.2	TCA-L2-02	Source Tab: TCA Description: Sample of the Responsible Entity for the incident implemented the following controls:	For each Cyber Security Incident in Sample Set CSI-L2-01, provide evidence that the Responsible Entity for the incident implemented the following controls: 1. The incident was identified and reported to the Responsible Entity for the incident; 2. The incident was investigated and the Responsible Entity for the incident determined the cause of the incident; 3. The incident was contained and the Responsible Entity for the incident implemented controls to prevent recurrence of the incident;	N/A	NPCC NCR99999 ME99-00000 ME99-00000,CIP-003-R2-L2-06 CIP-003-8 R255.2 5.2
CIP-003-R2-L2-07	CIP-003-8	R2 Sect 5.3	RM-L2-01	Source Tab: RM Description: Sample of the Responsible Entity for the incident implemented the following controls:	For each Cyber Security Incident in Sample Set CSI-L2-01, provide evidence that the Responsible Entity for the incident implemented the following controls: 1. The incident was identified and reported to the Responsible Entity for the incident; 2. The incident was investigated and the Responsible Entity for the incident determined the cause of the incident; 3. The incident was contained and the Responsible Entity for the incident implemented controls to prevent recurrence of the incident;	N/A	NPCC NCR99999 ME99-00000 ME99-00000,CIP-003-R2-L2-07 CIP-003-8 R255.3 5.3
CIP-004-R2-L2-01	CIP-004-7	R2 Part 2.2	Personnel-L2-01	Source Tab: Personnel Description: Sample of personnel with authorized electronic access to a high impact, or medium impact with External Routable Connectivity, BES Cyber System or associated EACMS or PACS, or initial access to a high impact, or medium impact BES Cyber System	For each individual with authorized electronic access to a high impact, or medium impact BES Cyber System or associated EACMS or PACS, or initial access to a high impact, or medium impact BES Cyber System, provide evidence that the individual is authorized to access the BES Cyber System or associated EACMS or PACS, or initial access to a high impact, or medium impact BES Cyber System	N/A	NPCC NCR99999 ME99-00000 ME99-00000,CIP-004-R2-L2-01 CIP-004-7 R2.2 2.2
CIP-004-R2-L2-02	CIP-004-7	R2 Part 2.3	Personnel-L2-02	Source Tab: Personnel Description: Sample of personnel with authorized electronic access to a high impact, or medium impact with External Routable Connectivity, BES Cyber System or associated EACMS or PACS, or initial access to a high impact, or medium impact BES Cyber System	For each individual with authorized electronic access to a high impact, or medium impact BES Cyber System or associated EACMS or PACS, or initial access to a high impact, or medium impact BES Cyber System, provide evidence that the individual is authorized to access the BES Cyber System or associated EACMS or PACS, or initial access to a high impact, or medium impact BES Cyber System	N/A	NPCC NCR99999 ME99-00000 ME99-00000,CIP-004-R2-L2-02 CIP-004-7 R2.3 2.3

Added ERO
SEL
Reference
ID column

Minor
language
revisions
throughout

Updated CIP-004-6
to CIP-004-7 and
CIP-011-2 to
CIP-011-3

V8.1
Changes

Divided
CIP-009-R1-L1-01
into three requests

Added
CIP-005-R2-L1-04
(same as
CIP-005-R1-L1-03
but for R2)

Divided
CIP-008-R1-L1-01
into four requests

FERC Staff Report

The Federal Energy Regulatory Commission completed CIP Audits of several U.S.-based NERC registered entities

Staff from NERC and the Regional Entities participated in the CIP Audits, including the virtual and on-site portions

This report provides information and recommendations to NERC, Regional Entities, and registered entities

Four Lessons Learned

1 - Identify and categorize all BES Cyber Systems and their associated BES Cyber Assets

2 - Ensure reportable Cyber Security Incidents and attempts to compromise that were identified as Cyber Security Incidents are reported to the Electricity Information Sharing and Analysis Center (E-ISAC) and to the Cybersecurity and Infrastructure Security Agency (CISA)

3 - Restrict all inbound and outbound access permissions, including the reason for granting access and denying all other access by default

4 - Enhance supply chain risk management programs to include evaluating the supply chain risks of existing vendors and develop a plan to respond to the risks that are identified

Lessons Learned 1 - CIP-002-5.1a

Identify and categorize all BES Cyber Systems and their associated BES Cyber Assets

Identified Failure

- Some entities did not identify each medium impact BES Cyber System at a single plant location identified by a Reliability Coordinator as critical to the derivation of IROLs and their associated contingencies, as required by Attachment 1, Section 2.6.

Requirement Language R1.1.2 – Attachment 1 Section 2.6

- Identify each of the medium impact BES Cyber Systems, not included in Section 1, associated with “Generation at a single plant location or Transmission Facilities at a single station or substation location that are identified by its Reliability Coordinator, Planning Coordinator, or Transmission Planner as critical to the derivation of Interconnection Reliability Operating Limits (IROLs) and their associated contingencies.”

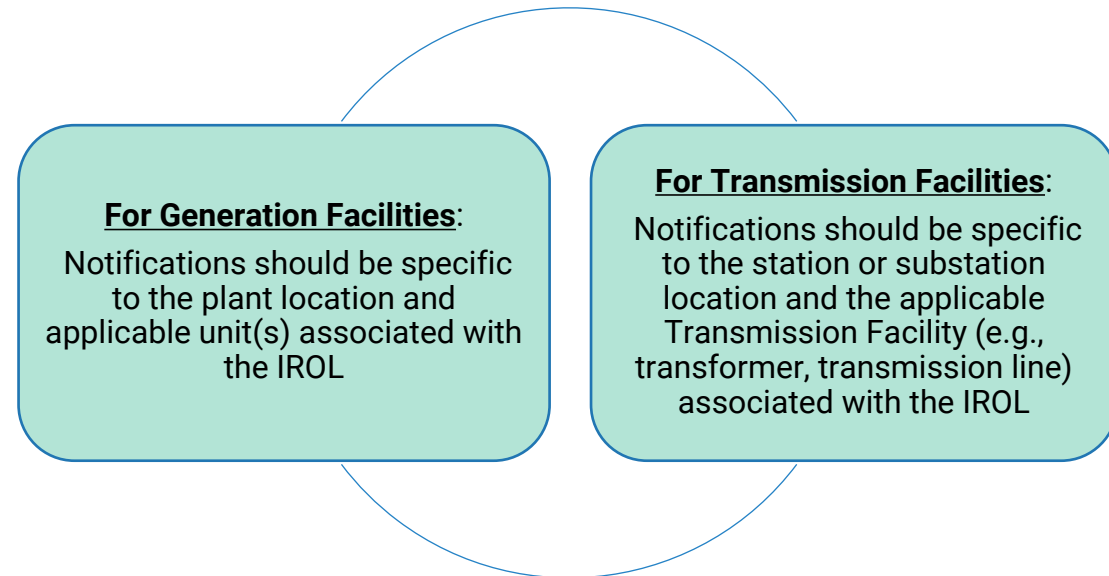

Lessons Learned 1 - CIP-002-5.1a

Identify and categorize all BES Cyber Systems and their associated BES Cyber Assets

Reliability Coordinators (RC), Planning Coordinators (PC), or Transmission Planners (TP)

- **Notify** Generator Owners (GO) and/or Transmission Owners (TO) that their “Generation or Transmission Facility” is critical to the derivation of any Interconnection Reliability Operating Limits (IROLs) and their associated contingencies

Specific BES Cyber Systems pertaining to the specific Generation or Transmission Facility are left to the GO or TO for identification and categorization

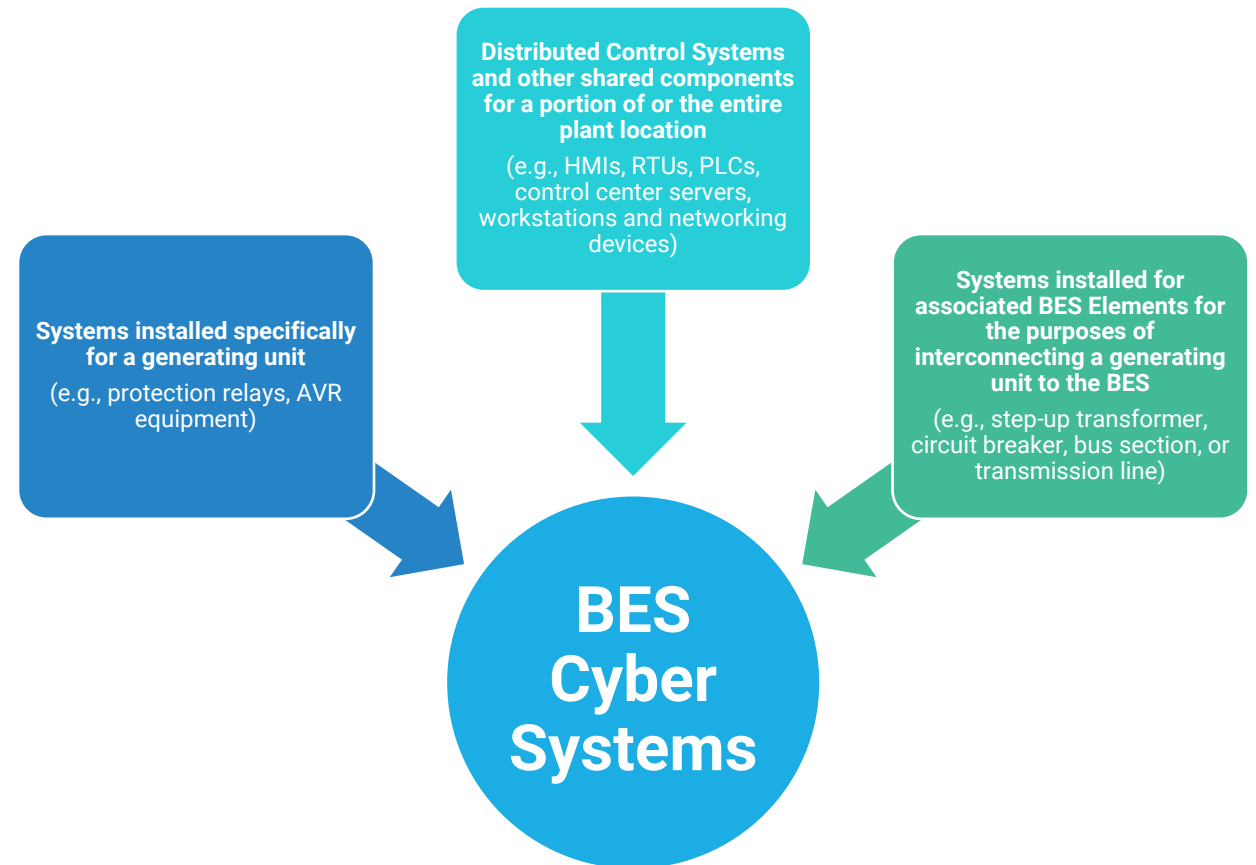

Lessons Learned 1 - CIP-002-5.1a

Identify and categorize all BES Cyber Systems and their associated BES Cyber Assets

Generator Owners

- **Upon notification** that you have specific Generation Facilities applicable to the derivation of an IROL:
- Identify and categorize all BES Cyber Systems and associated BES Cyber Assets that are associated with the specific Generation Facility

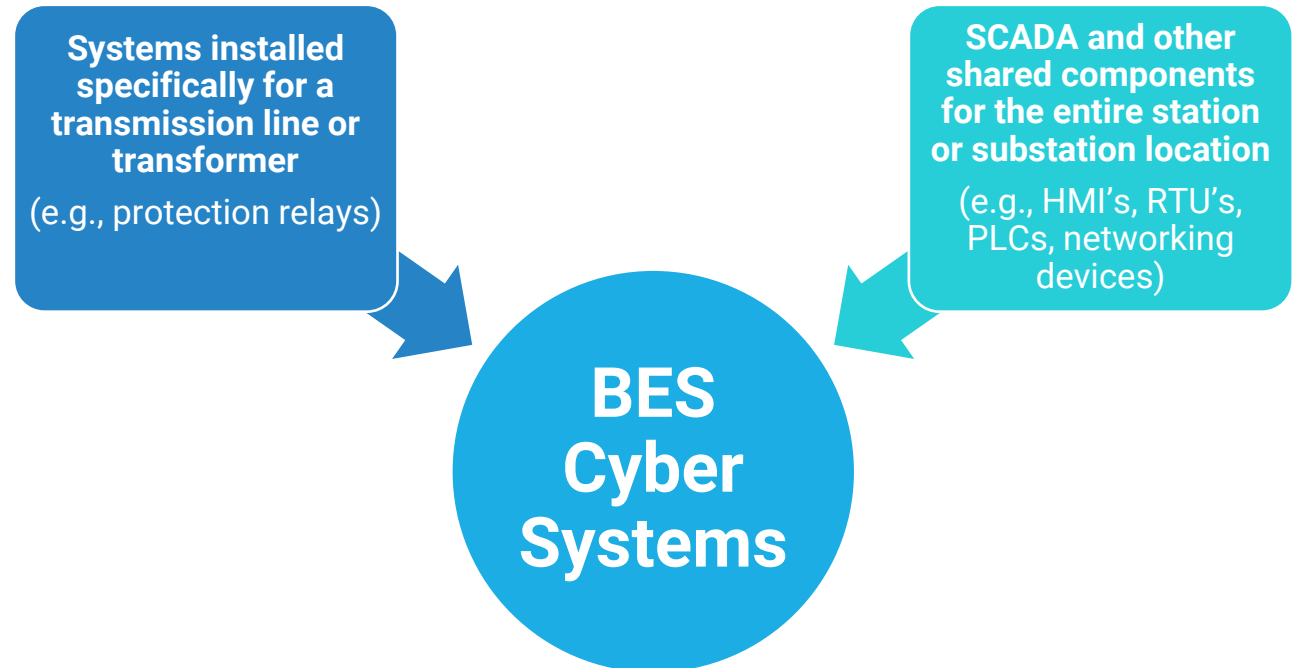

Lessons Learned 1 - CIP-002-5.1a

Identify and categorize all BES Cyber Systems and their associated BES Cyber Assets

Transmission Owners

- **Upon notification** that you have specific Transmission Facilities applicable to the derivation of an IROL:
- Identify and categorize all BES Cyber Systems and associated BES Cyber Assets that are associated with the specific Transmission Facility

Lessons Learned 2 - CIP-003-8 R2 Section 4, CIP-007-6 R4, CIP-008-6 R4

Ensure reportable Cyber Security Incidents and attempts to compromise that were identified as Cyber Security Incidents are reported to Electricity Information Sharing and Analysis Center (E-ISAC) and Cybersecurity and Infrastructure Security Agency (CISA)

Cyber Security Incident Response Plan

- **Compromise or attempt to compromise**
 - Potential security events required by Reliability Standard CIP-007-6, Requirement R4

Lessons Learned 2 - CIP-003-8 R2 Section 4, CIP-007-6 R4, CIP-008-6 R4

Ensure reportable Cyber Security Incidents and attempts to compromise that were identified as Cyber Security Incidents are reported to Electricity Information Sharing and Analysis Center (E-ISAC) and Cybersecurity and Infrastructure Security Agency (CISA)

Three entities encounter
malware

Incorrectly determined that the
incident was not reportable

Entity 1

- BCS network isolation

Entity 2

- Malware in BCS recycle bin

Entity 3

- BCS continued to operate

Lessons Learned 3 - CIP-005-7, R1.3

Restrict all inbound and outbound access permissions, including the reason for granting access and denying all other access by default

Unrestricted Internet Control Message Protocol usage

No documented justifications for communications

Overly permissive access permissions

No 'deny all'

Lessons Learned 3 - CIP-005-7, R1.3

Restrict all inbound and outbound access permissions, including the reason for granting access and denying all other access by default

FERC recommendations:

- Ensure all access permissions are accounted for
- Review policies quarterly
- Block IPv6 at the network border

Lessons Learned 4 - CIP-013-1, R1

Enhance supply chain risk management programs to include evaluating the supply chain risks of existing vendors and develop a plan to respond to the risks that are identified

Multiple entities did not properly implement their supply chain risk management plans

Plans did not include processes to respond to identified risks, specifically for “grandfathered” contracts

Recommend entities voluntarily apply CIP-013 to agreements that pre-date the standard.

Lessons Learned 4 - CIP-013-1, R1

Enhance supply chain risk management programs to include evaluating the supply chain risks of existing vendors and develop a plan to respond to the risks that are identified

FERC identified best practices

- Prioritize vendors based on risk
- Identify the vendor's country
- Ensure all purchases go through reviews that include a cybersecurity review
- Implement controls for purchasing IT equipment
