PEAK6 LABS — QUICKSETTLE TEST CONTRACT

IMPORTANT NOTICE — TESTING ONLY

This document describes a simulated event contract used exclusively for internal development, integration testing, and system validation within the PEAK6 Labs Non-Traditional Assets Platform (NTAP).

THIS IS NOT A REAL EVENT CONTRACT.

This document is not filed with, reviewed by, or approved by the U.S. Commodity Futures Trading Commission (CFTC) or any other regulatory authority. The contract described here is not affiliated with the CFTC or any regulated exchange.

No real-money trading occurs in connection with this contract. Any orders, positions, executions, or settlements referencing this contract occur only within development or integration environments and have no financial value.

Contract Name
PEAK6 Quicksettle Test Market

Contract Type
Simulated Event Contract (Testing Only)

Underlying
The outcome of this contract is determined programmatically by the PEAK6 Quicksettle testing emulator. The result does not correspond to any real-world event and exists solely to test order flow, settlement processing, and system integrations.

Settlement
The emulator may resolve the contract to one of the following outcomes:

- YES — Settlement Value: $1.00
- NO — Settlement Value: $0.00

Settlement timing and outcomes are determined by the testing system and may occur immediately after contract creation to validate Quicksettle functionality.

Restrictions
This contract may only be used in development, staging, or integration testing environments operated by PEAK6 Labs or its integration partners. It must not be used for production trading or exposed to retail customers.

Document Version: 1.0
Maintained By: PEAK6 Labs NTAP Engineering
Purpose: Quicksettle Settlement Testing
