WE BELIEVE IN YOU
WE INVEST IN YOU

About Us

Helping entrepreneurs and small business owners deliver their products and services at a rapid speed by providing software support and web/user analytics support, all without additional financial burden.

OUR MISSION

NURTURE

Nurture provides access to -

- The nLoop - highly intuitive and powerful team and task management portal.
- A framework for rapid development/maintenance of web, mobile, & desktop applications; and web analytics related services.

Nurture systems provide support to startups on membership basis.

Depending on the stage of your startup, you may be eligible for Silver, Gold or Platinum membership.

In addition to free access to nLoop and other Nurture services, members also get exclusive discounted rates for application development.

This helps startups to focus more on development of their core business ideas and takes off some worry of technical issues and financial challenges that comes with it.

WHAT IS THE IDEA/MOTIVATION BEHIND NURTURE?

We have noticed that many students, especially the graduate students, have interesting ideas and caliber to build a startup, but most often lack the technical and infrastructure support needed to grow - like a good internal communication system, task & team management system, and application development.

To get this support either they have to put up their savings & hired a software developer or got an investor to do that.

Again, most students do not have this kind of monetary support available and not everyone easily gets an investor, eventually giving up the idea.

Our aim is to provide technical and infrastructure support to these budding startups at as low as just 100$/month.

What is nLoop?

nLoop is Nurture's one stop solution to team and task management service with integrated emailing ability.

The team members can host meetings, chat, manage emails, create and manage tasks for easy organization and enhance the productivity.

IDEA

Members get FREE access to the following services!

Website Development
