deleted them later the same evening!

Nothing

out-lensed!!

... and so, in the morning when
the campers awoke, they found one of
their number frozen solid to the toilet...

It was obvious that
he had "difficulties"
during the night
and had spent
rather a long time
sitting still!!

Bill

... and so fully packed for the adventure he set off for the ship!

Jim

A number of passengers had difficulty whilst crossing the Drake Passage.

AFTER

... and so, when they returned home after the Antarctica voyage, the seas were rougher, the waves enormous, the sky darker ... everyone at home was amazed by the stories!

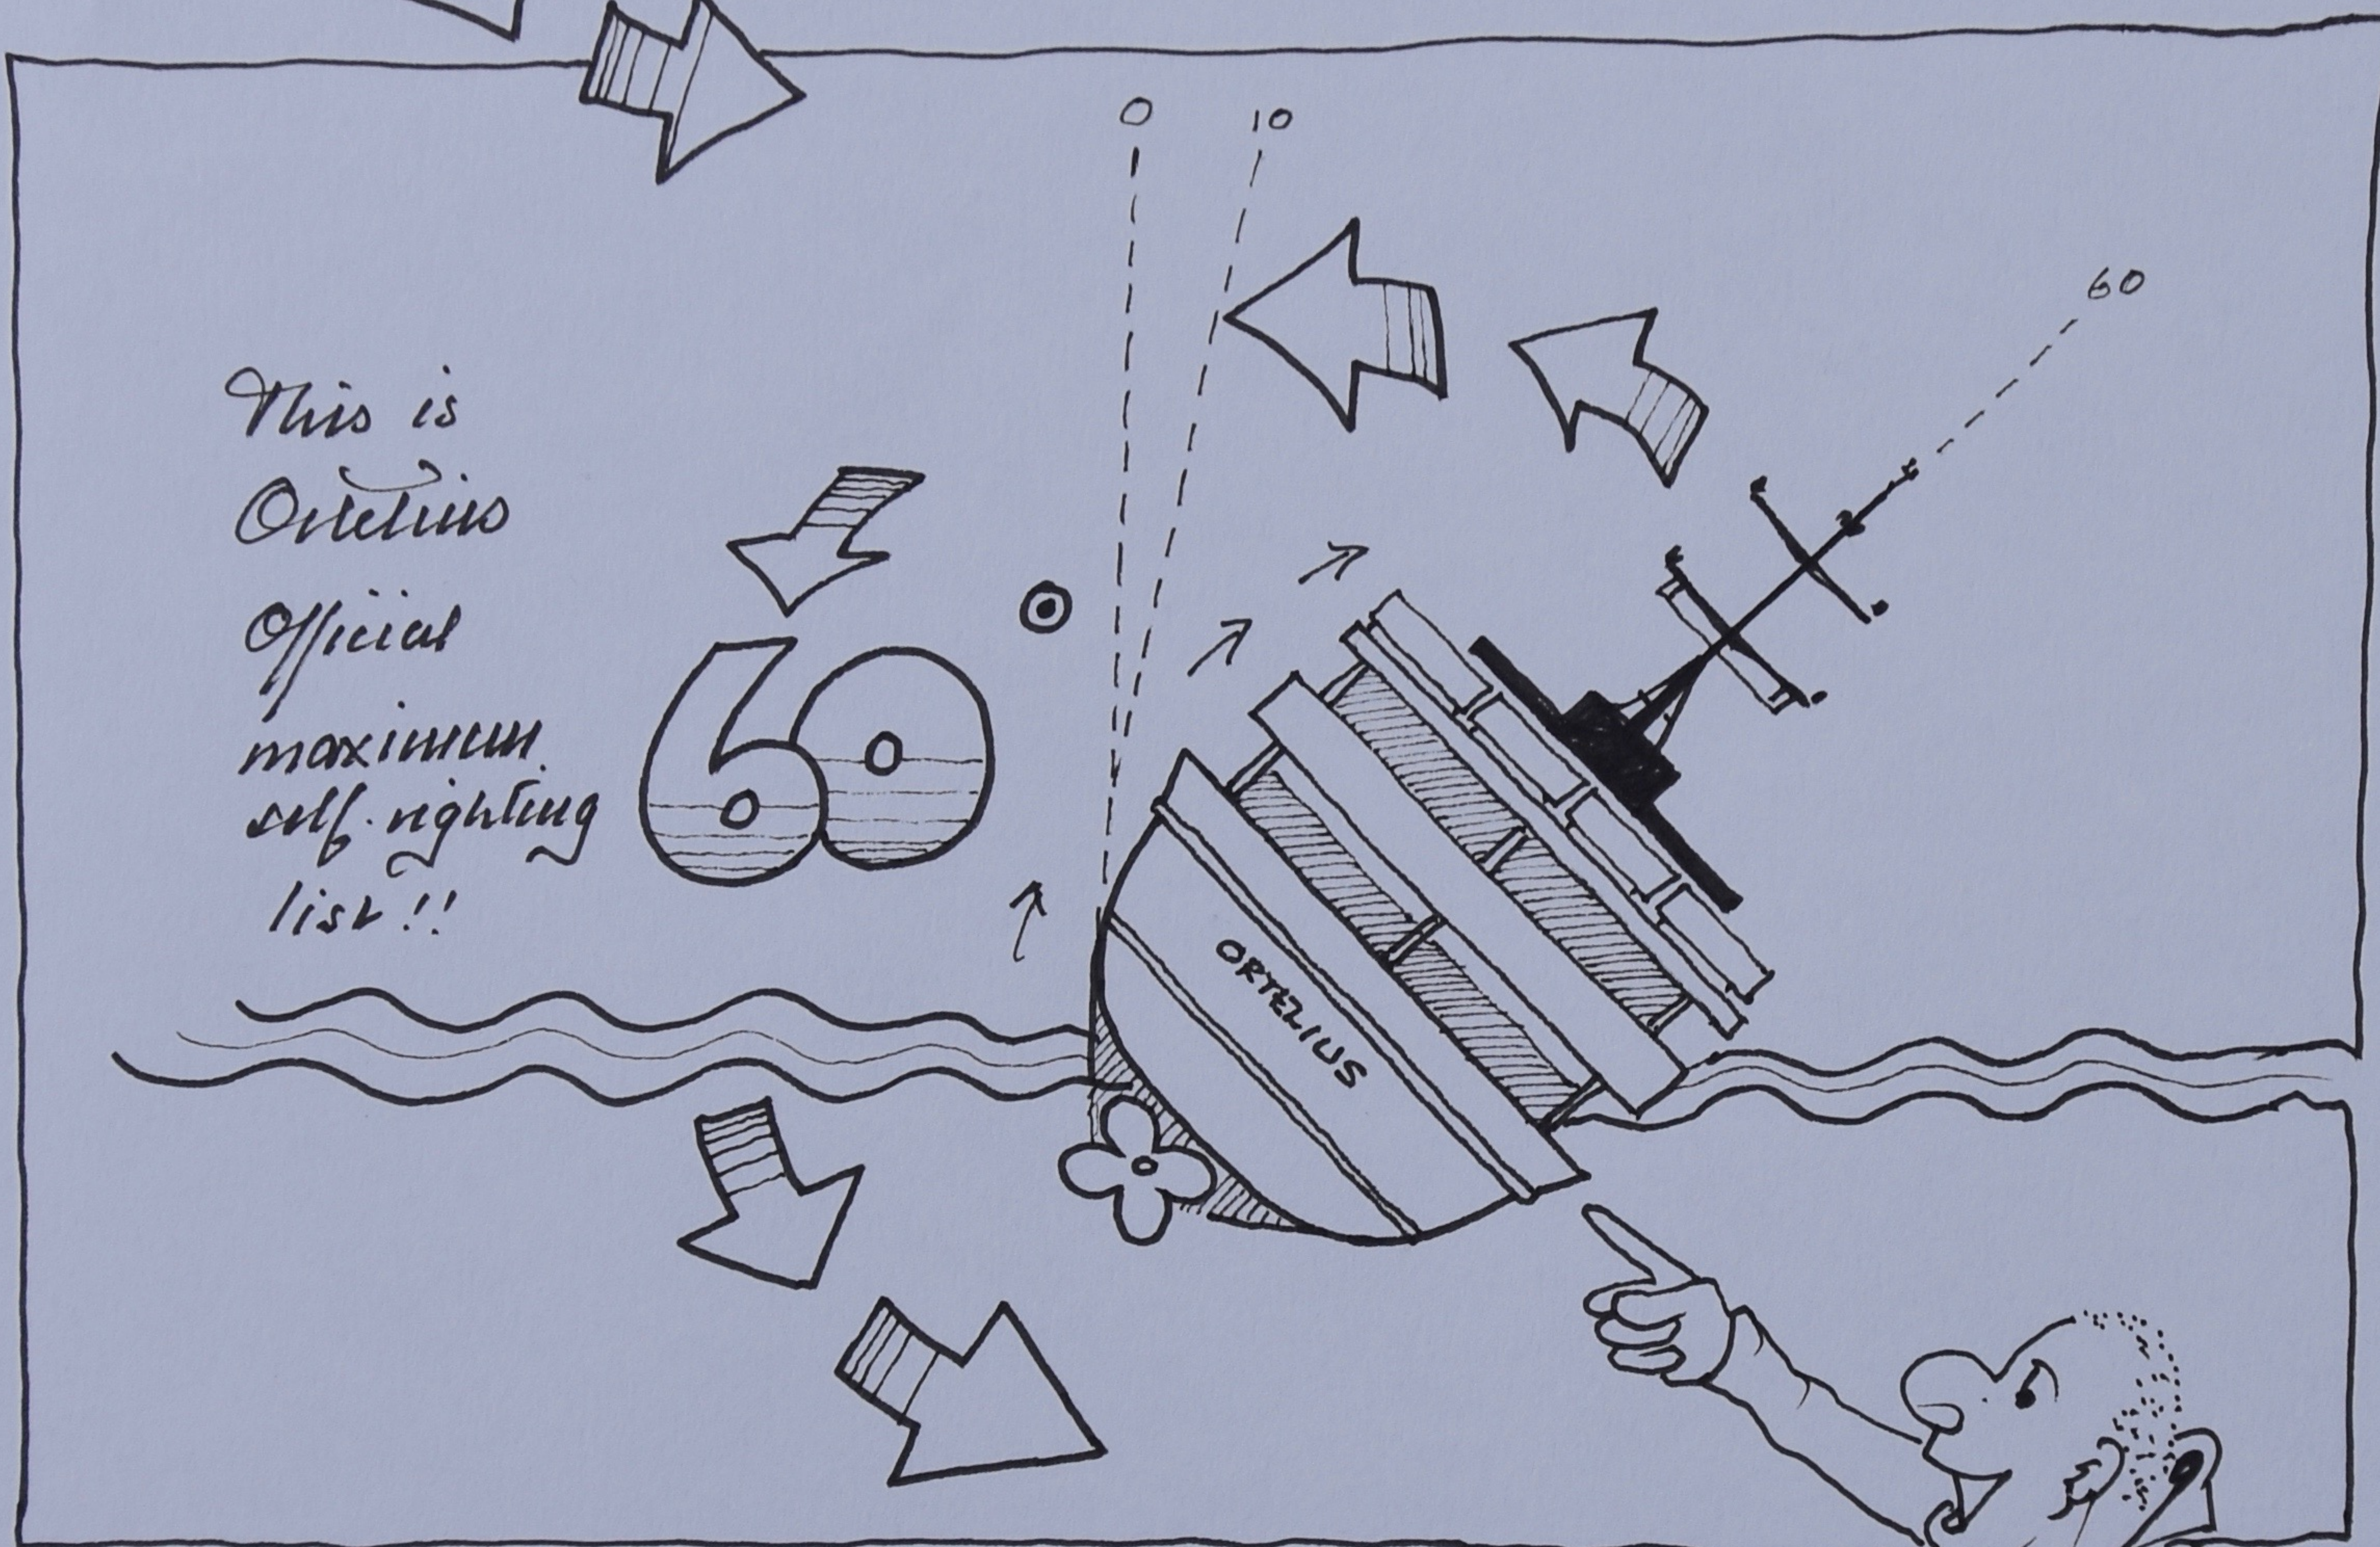

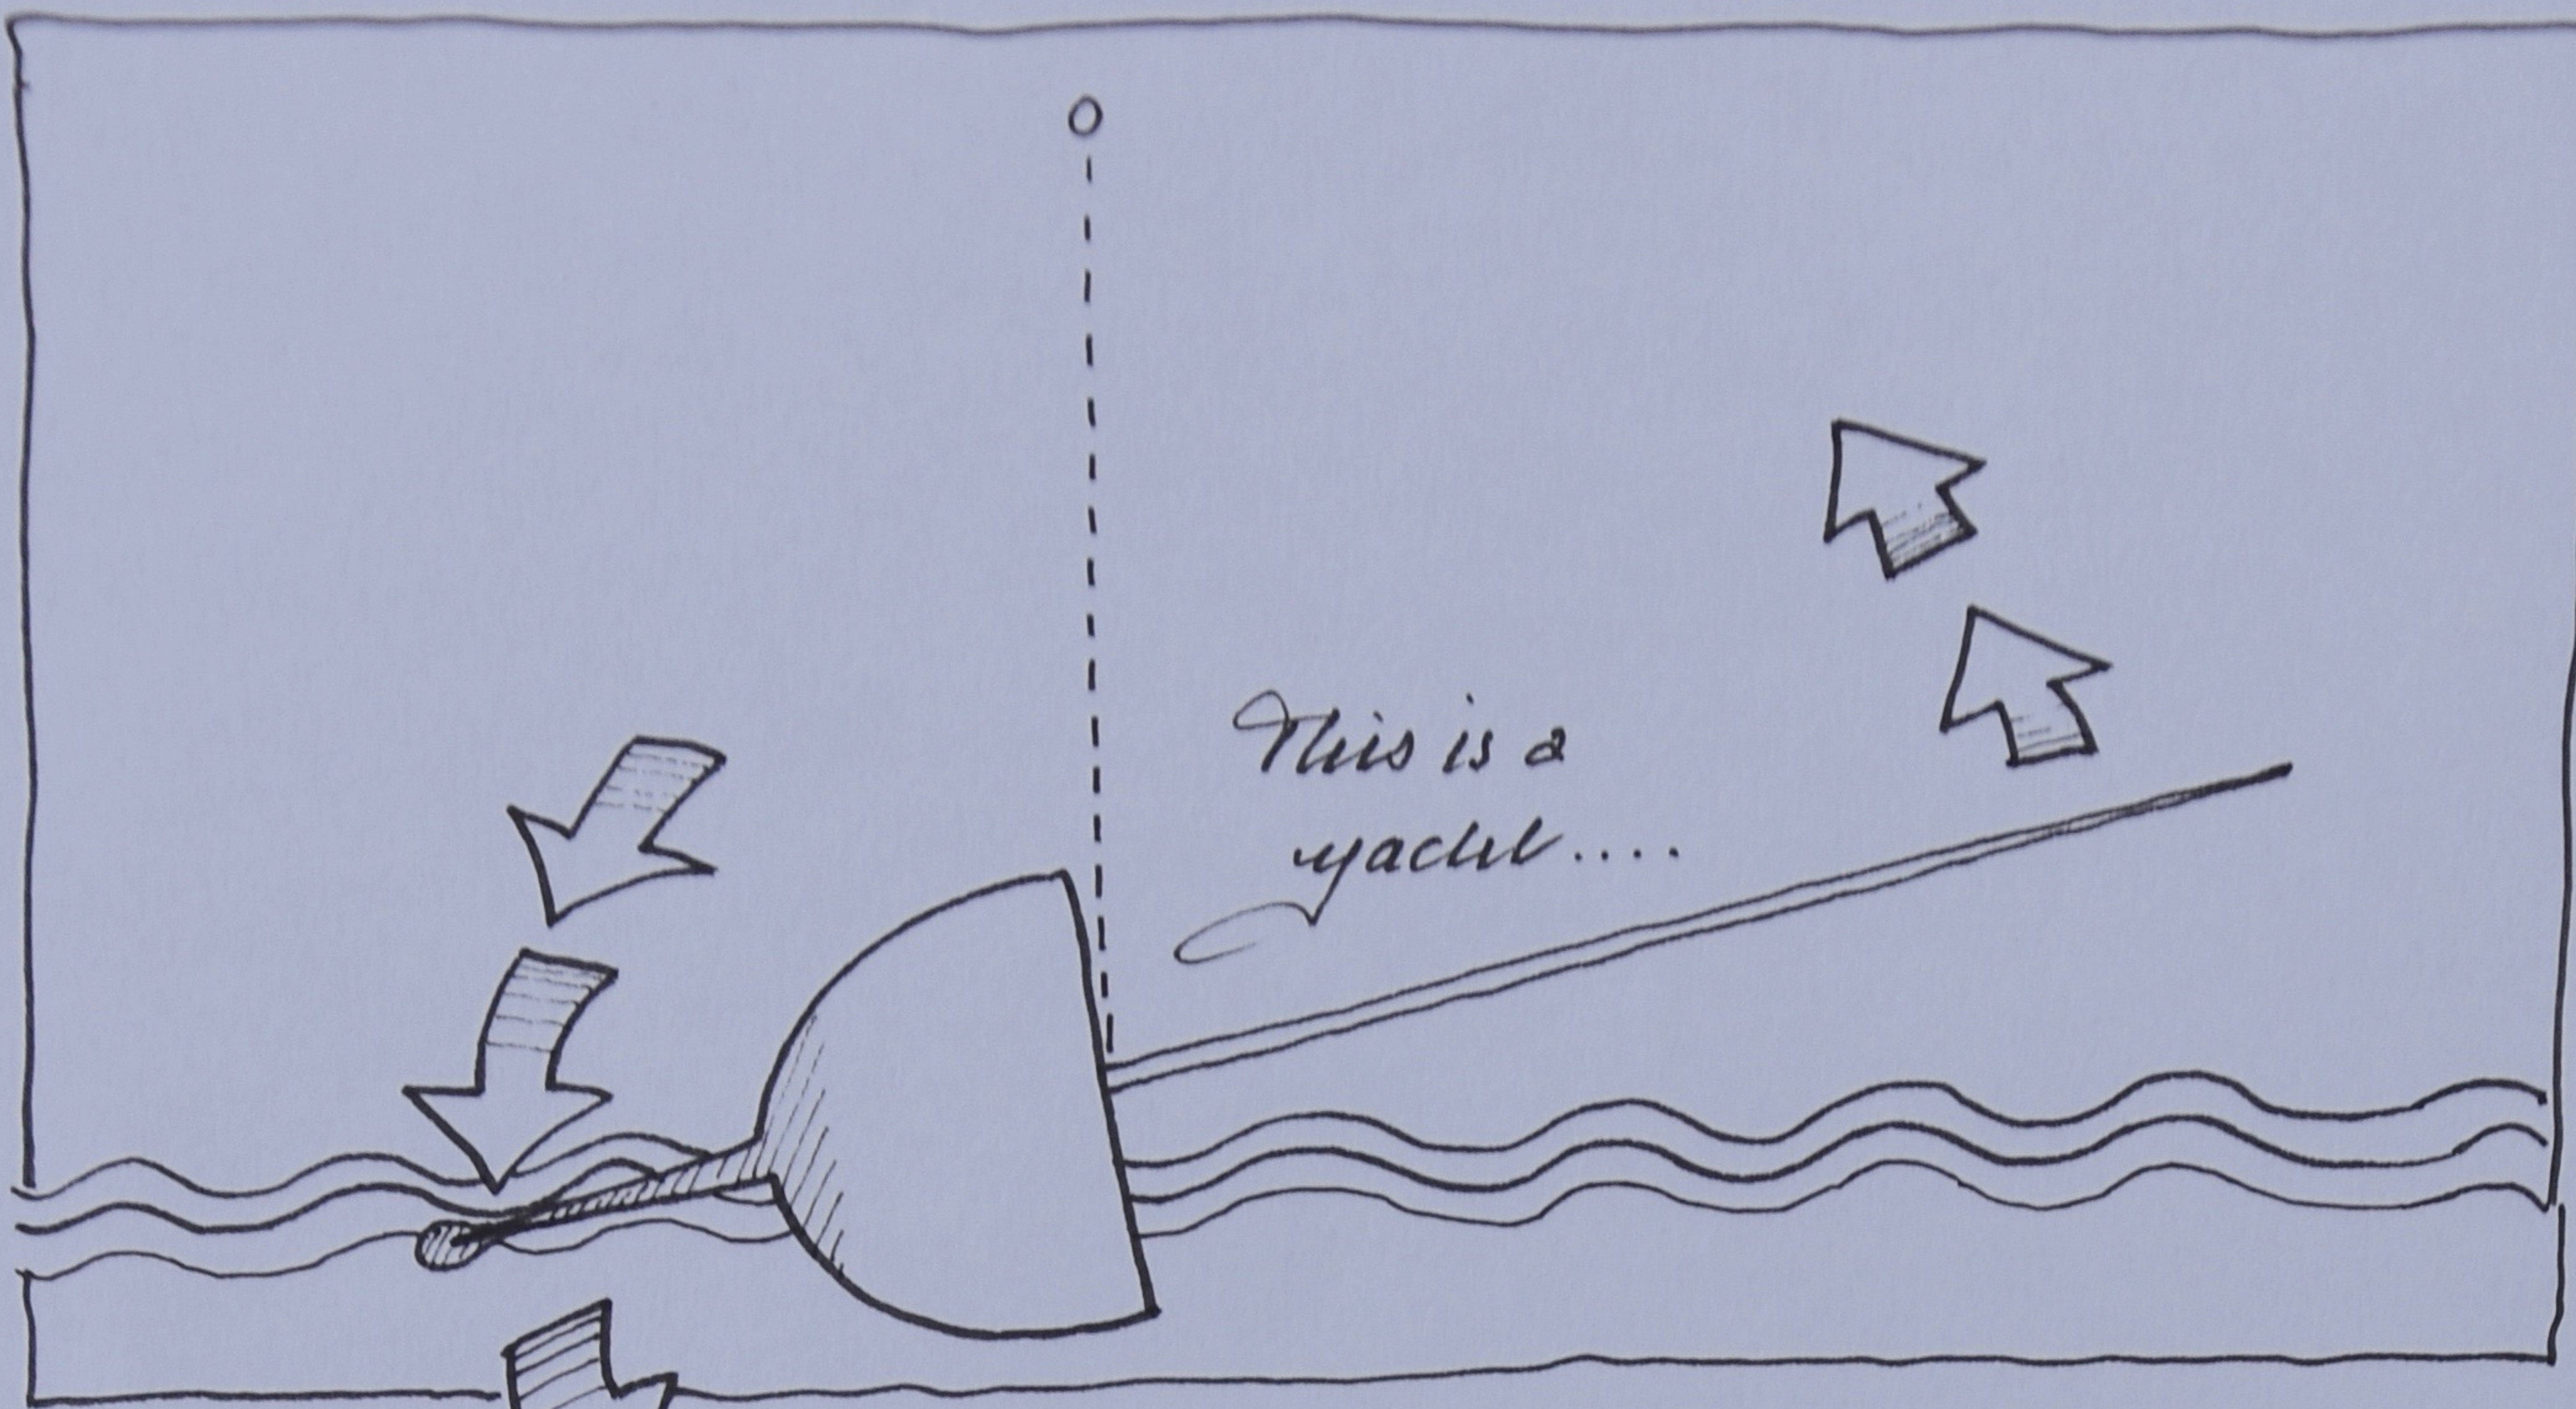

Bill produced a drawing prior to entering the Drake Passage

of Ortelius...

This was designed to reassure passengers once movement started....

The drawing was a failure for some passengers!
