A woman in an orange swimsuit is splashing in dark blue water, surrounded by icebergs. She has a pained or intense expression on her face. In the background, a person in a black inflatable boat is visible on the left, and a large, jagged iceberg dominates the center background. The sky is a deep, dark blue.

An aerial photograph of a ship, likely a research vessel, navigating through a dense field of ice floes. The ship is positioned in the upper right quadrant, moving towards the center. The ice floes vary in size and shape, creating a complex, textured pattern of white and light blue against the darker water. The ship has a green hull and a white superstructure with a yellow funnel.
