Seeing the whole patient with digital phenotyping

Genetic phenotyping changed the way we understand health and disease. Digital phenotyping is next-level. It collects, organizes and activates digital data so we can deliver precise interventions in the moments that matter.

Data
- Medical and pharmacy claims
- Surescripts data
- Onduo app activity
- Food/activity/medication logs
- Coach interaction
- Sleep tracking

Doctors and Coaches
- Telemedicine visit
- Coaches set and monitor personalized goals

Drugs
- Medication optimization
- Care gap closure

Devices
- Individualized learning paths within the Onduo app
- Additional monitoring (e.g. continuous glucose monitor)

Onduo leverages digital phenotyping to deliver the personalized experience most likely to get results precisely when patients need it.
