
We make healthy easy

Explore our industry-leading outcomes

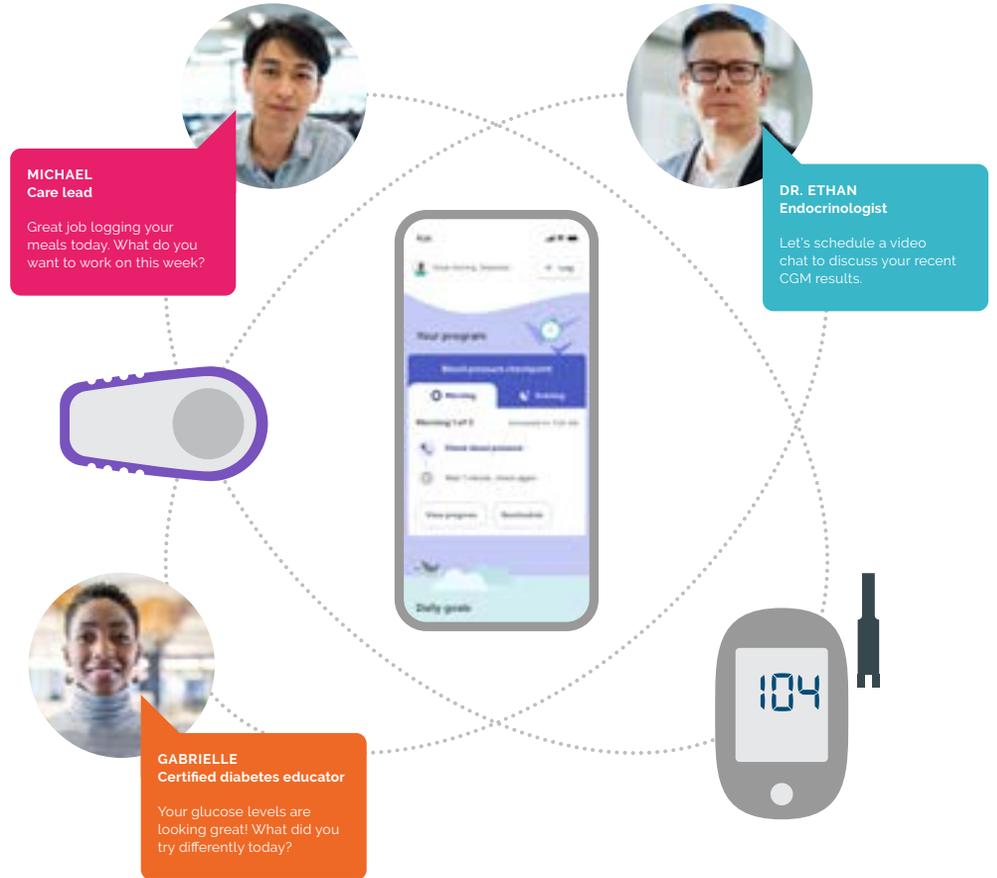

Innovative whole-person care

At Onduo, we make "healthy" easy with our next-generation, customized approach to chronic condition management.

Our **virtual care model**, centered around the **Onduo app**, offers individualized learning paths; **health coaching** based on goals; **connected sensing devices** like blood glucose meters (BGMs) and continuous glucose monitors (CGMs); **in-app telemedicine visits**; and more.

And each journey is personalized to provide your employees the care they need when they need it.

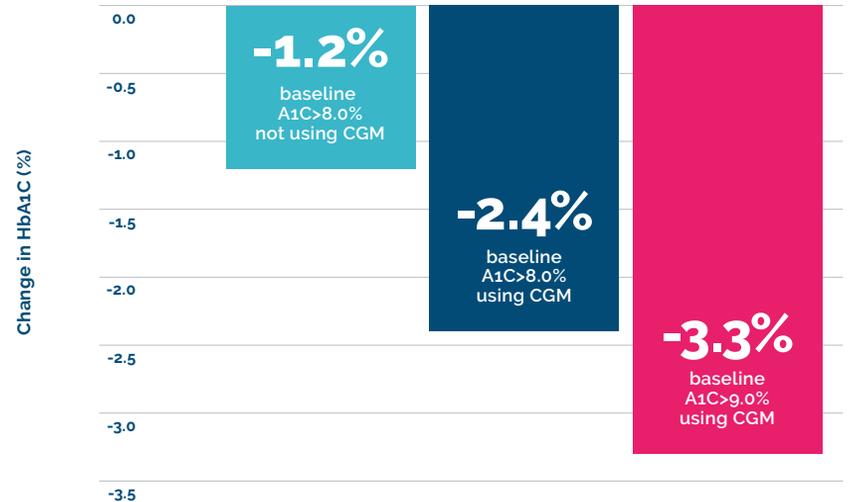

Unmatched outcomes

Onduo's published results show that our virtual care model can deliver life-changing outcomes for people with type 2 diabetes and other chronic diseases. By achieving better blood glucose control, lowering blood pressure and cholesterol, and losing weight, our members can lower their risk of serious and costly diabetes complications.

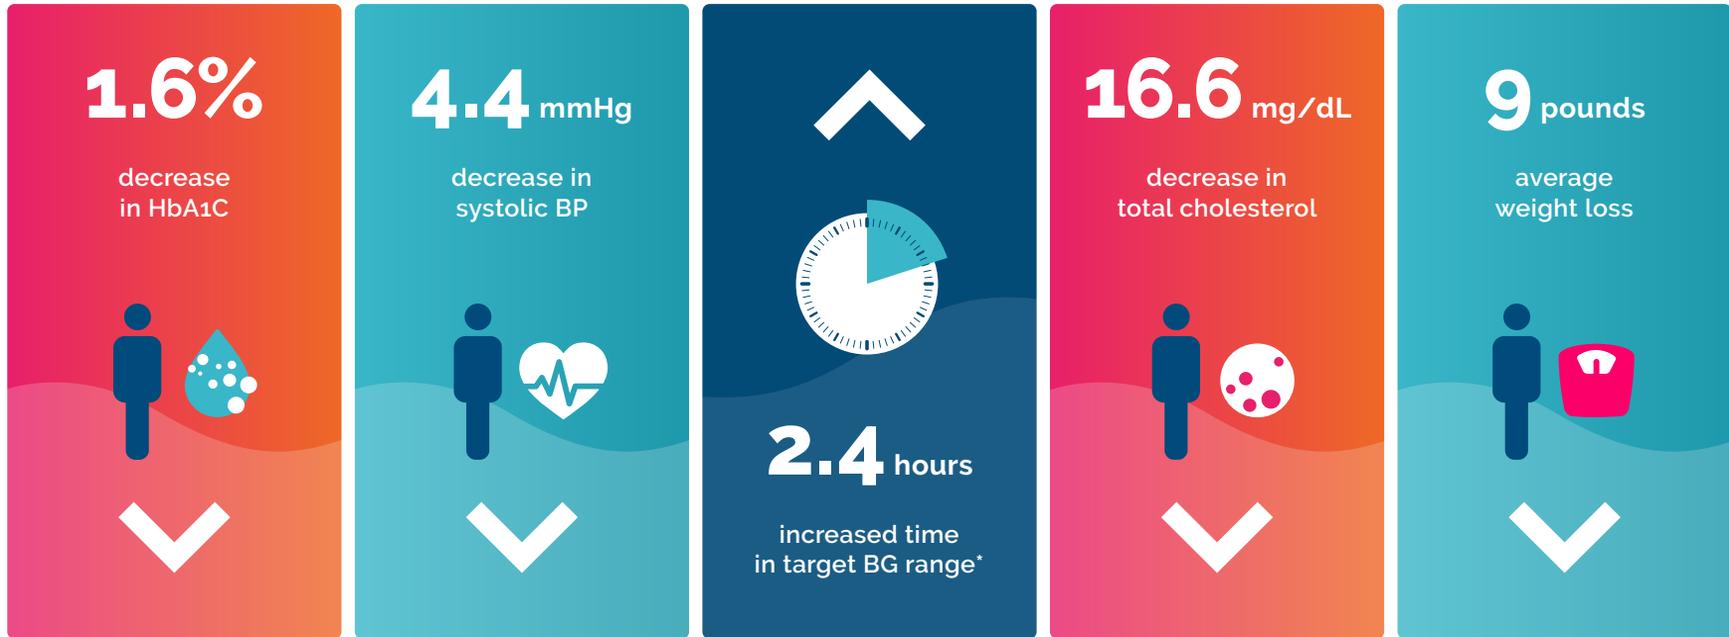

Even better results with CGM

Onduo delivers a clinically meaningful decrease in A1C with participants at a baseline A1C > 8.0%. In adding novel devices — in this case a continuous glucose monitor — we demonstrate a 2.4% reduction in A1C, and in looking at our highest risk group, participants with a baseline A1C > 9.0, that reduction in A1C with Onduo and using a CGM is 3.3%, **which is unmatched in the industry.**

- Clinically meaningful decrease in A1c in participants with A1c > 8.0%
- Two-fold greater improvement in A1c with CGM use
- Use of CGM in highest risk group (baseline HbA1C over 9.0%) resulted in the greatest average HbA1C drop (-3.3%)

Meaningful change across multiple conditions

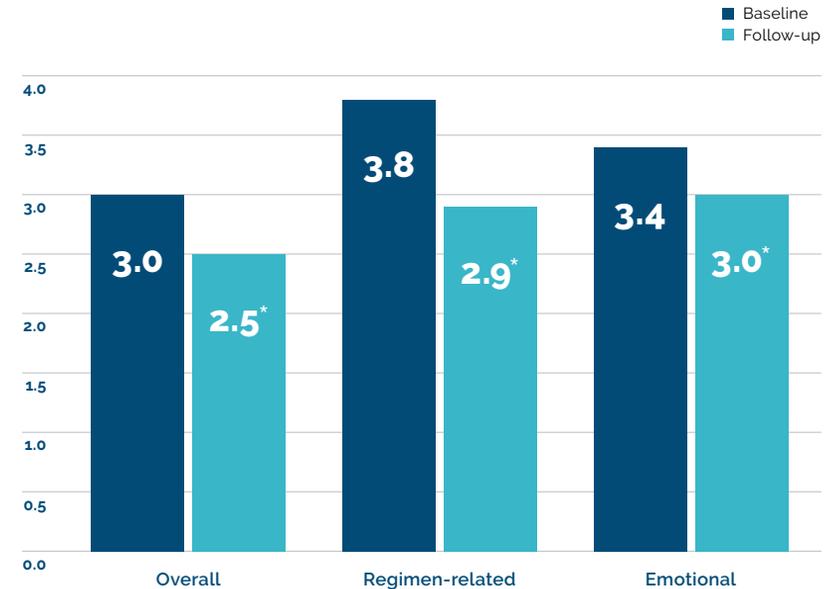

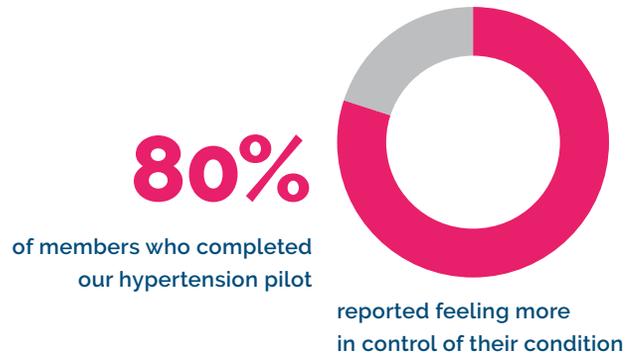

n=55; 60 days intermittent CGM wear, *n=43

An experience to feel good about

By working with each member to understand their goals — and stressors — Onduo delivers the right path to help each member make improvements. This contributes to members feeling good about how they're managing their condition and their overall emotional state.

Demonstrable value and ROI

Unlike digital care solutions that can't show a clear return on investment (ROI), Onduo's impressive diabetes results demonstrate the difference we can make as we expand to a whole-health approach. And since our data-driven interventions are highly tailored, we can allocate resources appropriately and adjust the intensity of care management as needed, resulting in even more cost savings for your organization.

Talk to us about how we can provide you a complete, integrated care solution to help your employees on their path to better health. Email us at partners@onduo.com to learn how.
