

# Age UK South Lakeland Case Study

Sarah Parkes, Project Manager, Age UK

Hannah Kitching, Age UK South Lakeland

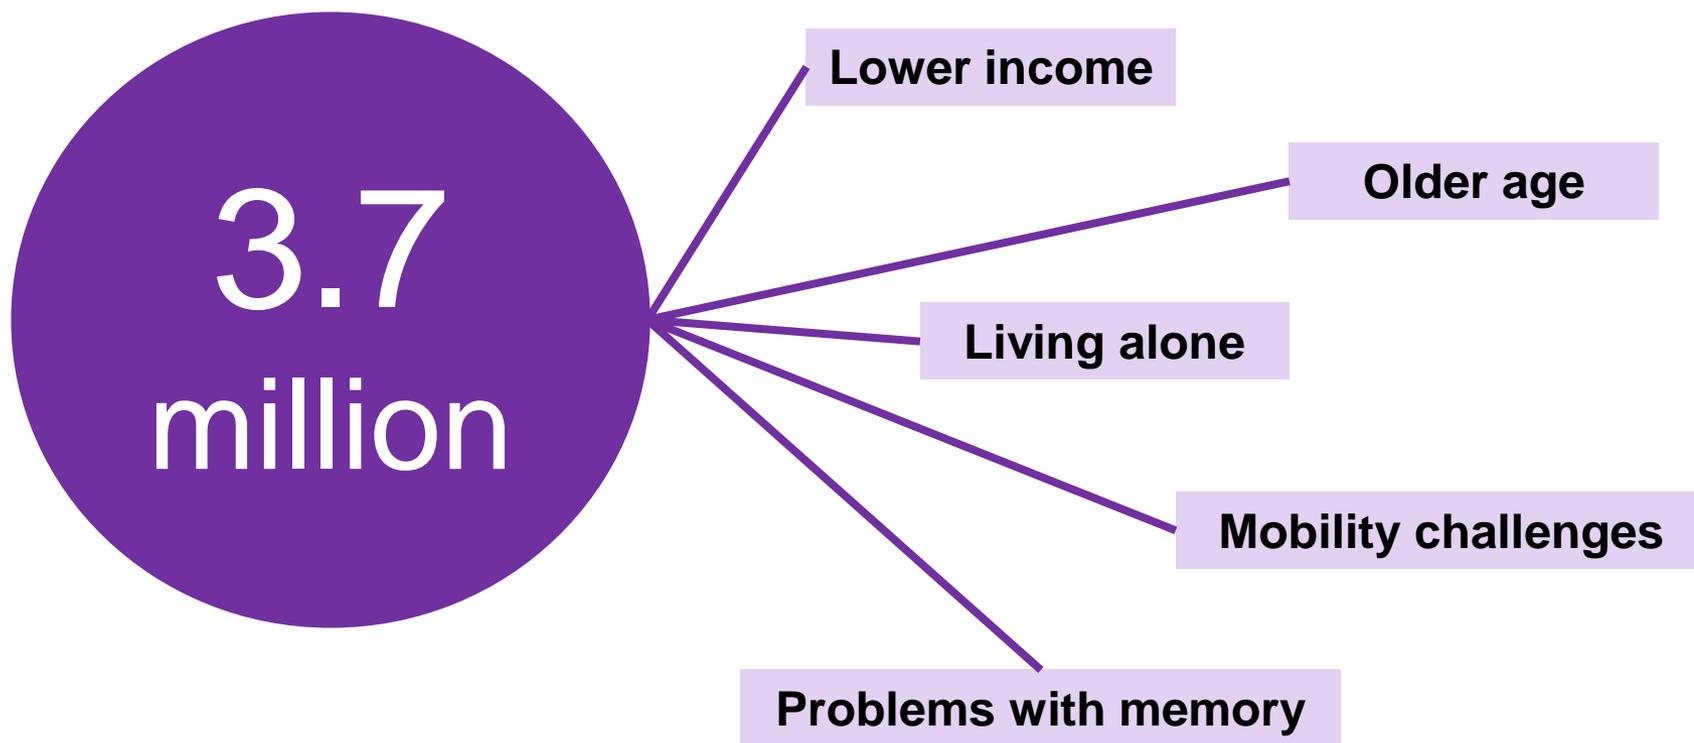

# Why One Digital?

Source: ONS, Internet Users, 2018

---

## Setting the scene

---

# Benefits of technology

Digital technology has the potential to offer many opportunities for people of all ages.

**Accessing public services**

**Accessing other services and goods**

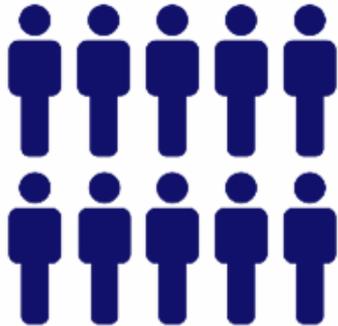

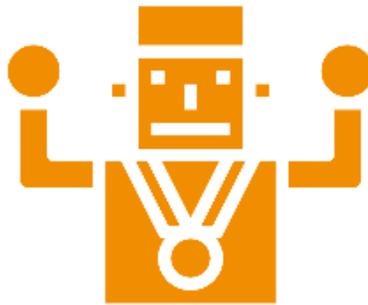

**Alleviating loneliness and social isolation**

**Quality of life and wellbeing**

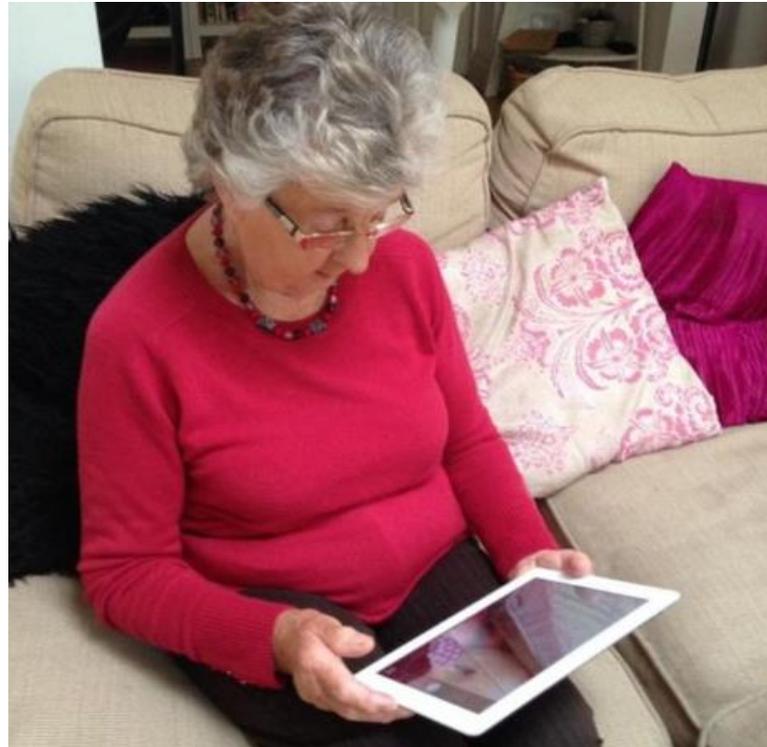

---

# OneDigital

# Digital Engagement

## Embedding & Sustaining a Digital Champion Project

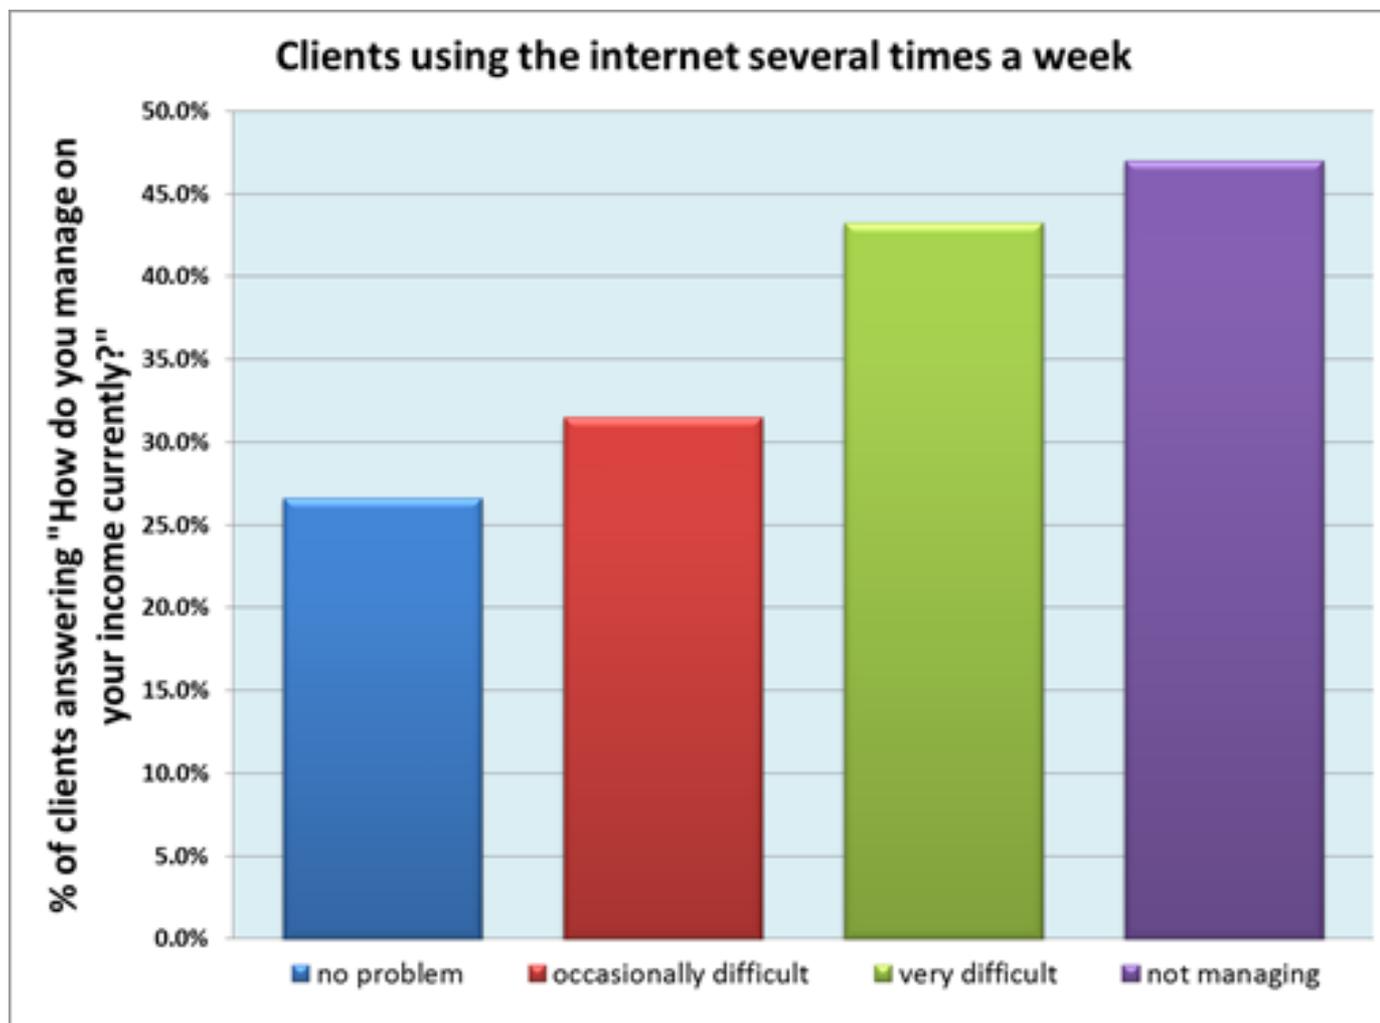

# Understanding Our Client Cohort

- **20.27%** Live Rurally
- **52.9%** of our clients live alone
- **33.6%** of our clients report some financial difficulties
- **28.4%** of our clients are in fuel poverty
- **46.7%** of our clients get out socially less than once a week
- Over **90%** of clients feel their health affects their daily living

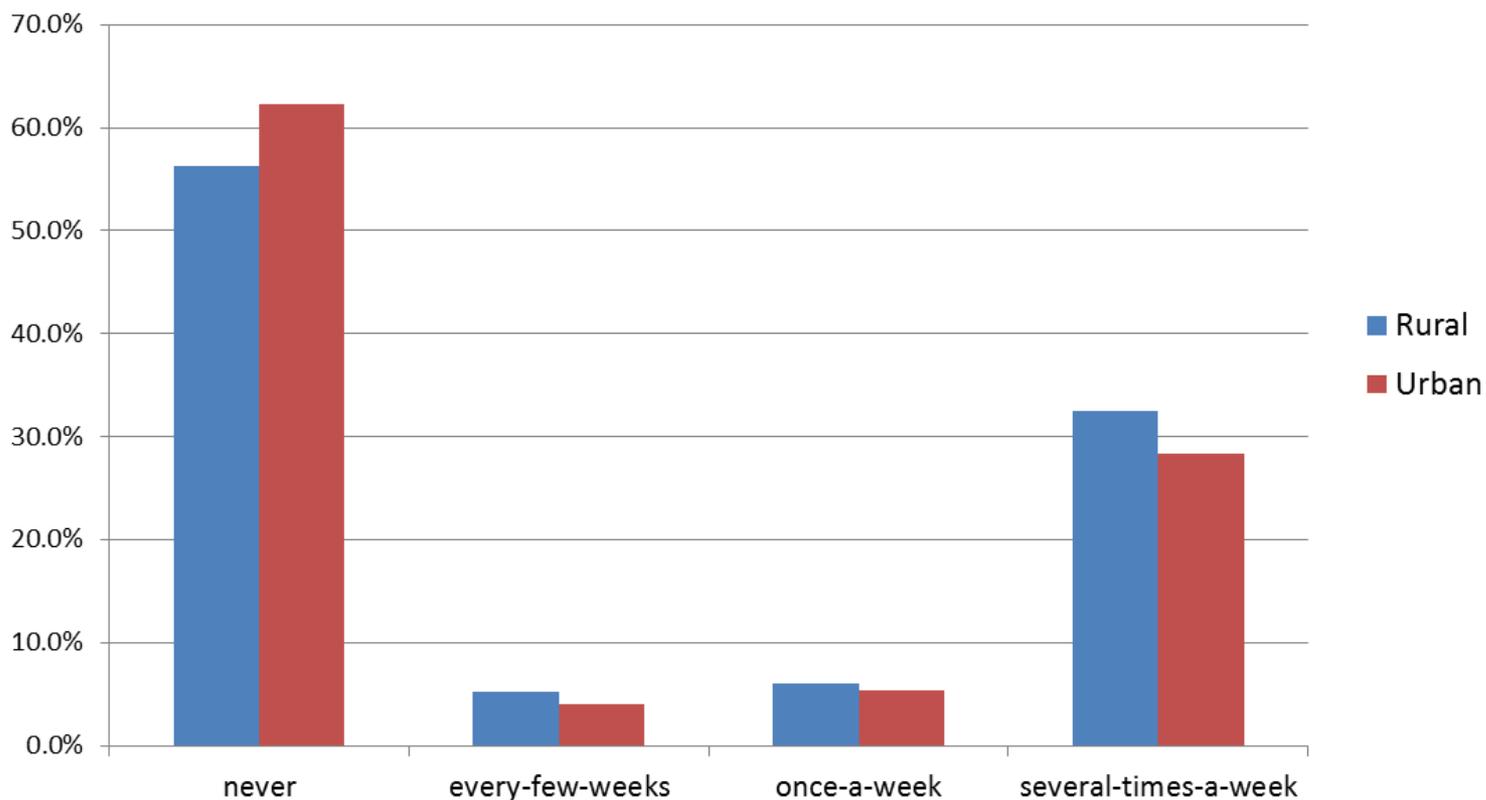

# Barriers to Digital Engagement

- Age of clients – minimal need for online access through life means clients may not see purpose, benefits or ease of online facilities
- Advancements in technology leading to declining confidence, regardless of client age
- Cost and location – **Active or adopted barriers?**

# Disproving the Myths

# Disproving the Myths

**How often do you use the Internet?**

# What did we want to achieve?

- To provide a service which helps clients to overcome their barriers to Digital Engagement, be it active or adopted
- Aim to support older people to engage with digital technologies in order to:
  - improve their access to services
  - improve their wellbeing
  - increase their social connectedness
- A collective and sustainable organisational led response to Digital Engagement

# Project Overview

- Clients identified through holistic casework
- One-off introductory Taster Sessions to introduce the basics of using tablets
- Free Tablet Loan Service for three months, with wireless Mi-Fi units for clients who do not have Wi-Fi at home
- Regular community drop-in groups in a variety of locations
- One-to-one tuition at home

# The Key to Success

- Designing a project to meet the identified needs of the client cohort and our demographic
- Digital Engagement relies heavily on other factors, therefore a holistic approach is needed to overcome the barriers
- Ensuring the whole organisation understands the reasons, importance and scope of the project
- Providing Digital Champion training to all client facing staff to ensure the knowledge and service is embedded long-term within the team
- Effective support for volunteers
- Working towards sustainability, from both an organisational and client point of view

# Challenges

- Change management when embedding a new way of working
- We as human beings do not fit in to boxes – although we have a project outline, support has had to be fully tailored to ensure clients are not excluded
- Partnership working with condition specific organisations
- Balancing demand with resource
