

## Pipe Guards

Because pipes move energy through the ground beneath your home they can sometimes be disruptive for sleep and contemplation. They can make it difficult to settle into the space to rest and restore. Creating a **Pipe Guard** will settle your land down and enable you to live on it with greater ease. As you are mapping your pipe locations, drawing an EW map of your property is not a bad idea. Note problem areas and spots where you have done work. Keeping an EW Journal is also helpful for future garden planning.

1. Using the Lower Hemi Edge and with full permission.
2. Map the path of your pipes.
3. Surround them with *Universal Love and Light*.
4. Then finish your **Pipe Guard** with *Sanctuary* as a way to more fully integrate the pipes into the ground and to have them be more compatible with the Earth.
