

## SENIOR DEVELOPER FOR NEW MOBILITY

We are currently looking for an experienced software engineer to join us as SENIOR DEVELOPER. Our journey to revolutionise the way customers access mobility has just begun. This is your opportunity to join us in our expansion phase.

### About us:

A car rental for 1€ sounds too good to be true? At Movacar we make it a reality.

With our unique vehicle logistic solution, we crowdsource drivers for fleet operators by marketing their vehicle transfers as one-way rentals for 1€ to our users, saving up to 50% in logistic cost. Our win-win proposition delivers significant savings to fleet operators by monetizing unused capacities of their vehicle logistics (= empty seats) and creating unbeatable travel options from city to city for our users in the process. A veteran team combines 40 years of experience in the car rental industry. This is an excellent opportunity to join the team in creating a leading mobility provider in the Mobility as a Service market of tomorrow.

### Perks:

- Competitive Salary & Employee Options
- Hybrid working environment
- Working location at the largest Mobility coworking environment in Europe, [The Drivery](#).
- The opportunity to be part of an early-stage startup aiming to make a difference in the changing mobility landscape
- An experienced leadership team dedicated to your growth and development

### Tasks:

- Create new features that are well tested and easily maintainable
- Discuss and review the pull requests of your team members
- Drive forward our architecture and CI set up

**Requirements:**

- At least 10 years of professional experience as a Software Developer
- Expert git knowledge
- Strong experience with automated testing with unit and integration tests
- Excellent communications skills
- Prior experience working in a start-up environment

**Current Tech Stack:**
