

A robust WiFi infrastructure is an essential component of the modern workplace - employees now expect complete mobility within their office environment. At Optimity, we are helping more and more SMBs realise the advantages of a managed WiFi infrastructure. These tangible benefits include fast reliable WiFi where you want, increased levels of security, customer loyalty and employee productivity.

## Benefits

- **End-To-End Service** - Optimity survey, install and support the service end to end. No 3rd party suppliers, this is a fully dedicated & managed service
- **Fully Managed** - Firmware/software upgrades can be rolled out remotely with no service disruption thanks to the benefits of a centralised management plane
- **Return On Investment** - Monetize your WiFi investment via an Optimity provided captive portal, which enables you to collect user data; location, preferences, social media etc. Plus a customisable splash page which delivers an impeccable wireless experience to the end user
- **Enterprise Hardware** - Optimity are strategically partnered with best in class hardware providers, tailored to the specific requirements of the end user
- **Experienced** - Optimity have been installing WiFi solutions for our customers for over 14 years
- **Support** - Fully supported 24/7

## Solution specs

- Ensure your WiFi network is covering your key areas, with a survey by an Optimity engineer
- Reduce wireless noise in your office with beamforming\* technology; less congestion, the smoother the experience
- Can be deployed across any L2/L3 network and can bridge traffic onto the local network, tunnel to a central location using L2TP or route between WAN and NAT'ed private subnets
- Multiple SSIDs allow you to logically separate networks such as Corporate and Guest
- Utilises 802.1x for a secure & fast connection
