

Disinfection made simple.

Clean and disinfect high-touch surfaces to help prevent the transmission of COVID-19, in one step.

Reopening for business means more and more people will move through your facility increasing the opportunity for COVID-19 transmission. As part of your COVID-19 preparedness and control plan, high-touch surfaces — such as door and window handles, bathroom surfaces, and work surfaces — should be cleaned and disinfected on a regular basis¹ to help lower the risk of spreading infection. For customer and employee safety using EPA-approved disinfectants are an important part of reducing the risk of exposure to COVID-19.²

Just spray, wipe and done.

3M™ TB Quat Disinfectant Ready-To-Use Cleaner is a one-step cleaner and disinfectant that is highly effective against a broad spectrum of pathogenic microorganisms, including COVID-19. It is formulated for use on hard, non-porous environmental surfaces like: floors, walls, metal surfaces, stainless steel surfaces, glazed porcelain, glazed ceramic tile, plastic surfaces.*
