

S55

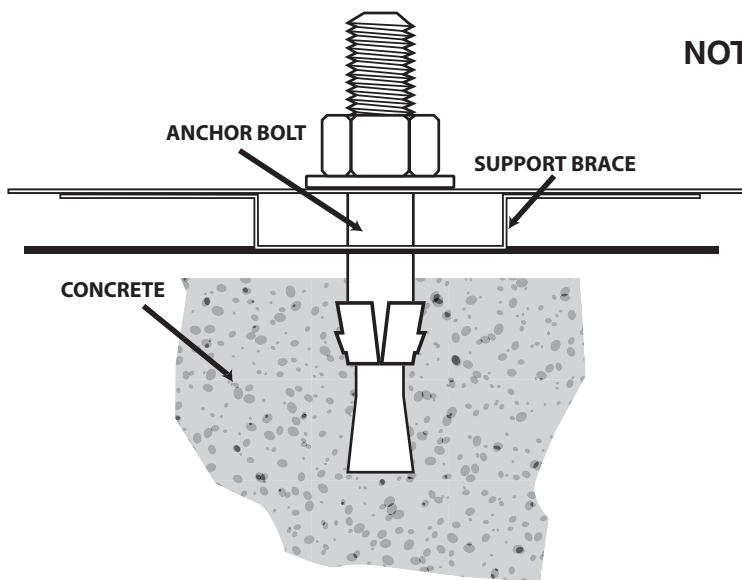

To assure years of trouble free performance, we recommend that you do the following before placing the unit into service:

S3

Leg Leveler Installation

- 1 Tip receptacle and locate four leg leveler receivers. Note: turning receptacle upside down on an abrasive surface can damage the finish.
- 2 Screw in leg levelers (4 included). May require pliers.
- 3 Adjust leg levelers as needed to compensate for uneven surfaces.

NOTE: OPTIONAL Anchoring Kit (Product #KRS55) are available for permanent placement and to deter vandalism. The bolts are designed for use in conjunction with the leg levelers. Your present source of supply for Howard Products can provide you with Anchoring Kits and information on other quality United Receptacle products.
