## 2. HAZARDS IDENTIFICATION

#### 2.1 INFORMATION and CLASSIFICATION

Overview: This mixture, like most organic powders, can cause a dust explosion if particles form thick clouds. This

mixture contains titanium dioxide listed by IARC as Group 2B (possibly carcinogenic to humans); however, no significant exposure to titanium dioxide is thought to occur during the use of the product because titanium dioxide is mostly in a bound form in this mixture. This mixture complies with the

requirements of the RoHS Directive 2011/65/EU and its amendment directives.

## 2.2 **LABEL ELEMENTS**

Applicable Pictograms:

Danger Indications: These label elements are not required if this mixture (toner) is in cartridges or sealed bottle. Refer to

Section 16 for details.

Risk Phrases: Combustible Dust - Warning - May form combustible dust concentrations in air. Keep away from all

ignition sources including heat, sparks and flame.

Safety Phrases: Keep container closed. Prevent dust accumulations to minimize explosion hazard.

Recommended Extinguishing Media: Water, foam, dry chemical

Extinguishing Media Not to be Used: None known.

5.2 **SPECIAL HAZARD** 

Unusual Fire/Explosion Hazards: Toner, like most organic powders, is capable of creating a dust explosion when

particles form thick clouds in the presence of an ignition source. Carbon monoxide and

carbon dioxide are hazardous resulting gases.

Extinguishing Media Not to be Used: None known.

#### 5.3 ADVICE FOR FIRE FIGHTERS

Avoid inhalation of smoke. Wear protective cloting an wear self-contained breathing apparatus

#### 6.1 PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES

#### 6.1.1 PRECAUTIONS FOR NON-EMERGENCY PERSONNEL

Avoid dispersal of dust in the air. (Do not clear dust surfaces with compressed air.). Do not breathe dust. Wear personal protective equipment as described in Section 8.

#### 6.1.2 ADDITIONAL FIRST AID INFORMATION

N/A

#### 6.1.3 PERSONAL PROTECTION

Wear personal protective equipment as described in Section 8.

## 6.2 **ENVIRONMENTAL PRECAUTIONS**

Regulatory Information: Keep product out of sewers and watercourses.

## 6.3 METHODS AND MATERIAL FOR CONTAINMENT AND CLEANUP

Spill or Leak Cleanup Procedures: Eliminate sources of ignition including sparks and flammables. Nonsparking tools should be

used. Shelter the released material (powder) from wind to avoid dust formation and scattering. Vacuum or sweep the material into a sealed container. If a vacuum cleaner is used, it must be dust explosion-proof. Dispose of the material in accordance with

Federal/state/local requirements.

Recommendations for Handling: No special precautions when used as intended. Keep containers closed, avoid creating dust.

Keep away from ignition sources.

Advice on General Hygiene: Never eat, drink or smoke in work areas. Practice good personal hygiene after using this

material, especially before eating, drinking, smoking, using the restroom, or applying

cosmetics.

#### 7.2 **CONDITIONS FOR SAFE STORAGE**

Avoid high temperatures, >100°F/32°C

#### 7.3 **SPECIFIC END USES**

Printing devices

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

#### 8.1 **CONTROL PARAMETERS**

The best protection is to enclose operations and/or provide local exhaust ventilation at the site of chemical release in order to maintain airborne concentrations of the product below OSHA PELs (See Section 3).

Local exhaust ventilation is preferred because it prevents contaminant dispersion into the work area by controlling it at its source.

## 8.2 **EXPOSURE CONTROLS**

#### Respiratory protection:

IMPROPER USE OF RESPIRATORS IS DANGEROUS. Seek professional advice prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134 and 1910.137) and, if necessary, wear a NIOSH approved respirator. Select respirator based on its suitability to provide adequate worker protection for given work conditions, levels of airborne contamination, and sufficient levels of oxygen.

## Eye/Face Protection:

Contact lenses are not eye protective devices. Appropriate eye protection must be worn instead of, or in conjunction with contact lenses.

#### Hand/Skin Protection:

For emergency or non-routine operations (cleaning spills, reactor vessels, or storage tanks), wear an SCBA. WARNING! Air purifying respirators do not protect worker in oxygen deficient atmospheres.

#### **Additional Protection:**

N/A

#### **Protective Clothing and Equipment:**

Wear chemically protective gloves, boots, aprons, and gauntlets to prevent prolonged or repeated skin contact. Wear splash-proof chemical goggles and face shield when working with liquid, unless full face piece respiratory protection is worn.

### **Safety Stations:**

Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.

#### **Contaminated Equipment:**

Separate contaminated work clothes from street clothes. Launder before reuse. Remove material from your shoes and clean personal protective equipment. Never take home contaminated clothing.

#### Comments:

Never eat, drink or smoke in work areas. Practice good personal hygiene after using this material, especially before eating, drinking, smoking, using the restroom, or applying cosmetics.

#### 11. INFORMATION ON TOXICOLOGICAL EFFECT

Mixtures: N/A

**Acute Toxicity:** Oral: LD50 rat > 5,000 mg/kg (OECD 425) (a similar product).

Skin Corrosion/Irritation: This mixture is classified as a nonirritant to the dermal tissue of rabbit. (OECD 404) (a similar

product)

Serious Eye Damage: This mixture is classified as a nonirritant to the ocular tissue of rabbit. (OECD 405) (a similar

product)

Inhalation: N/A

**Sensitization:** Respitory Sensitization: None of the substances in this mixture is classified as a respiratory

sensitizer.

Mutagenicity: Ames test (Salmonella typhimurium, Escherichia coli) negative. (a similar product)

**Carcinogenicity:**Titanium dioxide is listed by IARC as Group 2B (possibly carcinogenic to humans); however, inhalation tests of titanium dioxide by Muhle et al. (Reference 2) showed no significant

carcinogenicity. Moreover, IARC monograph vol. 93 states that exposure levels are assumed to be lower in the user industries, with the possible exception of workers who handle large quantities of titanium dioxide. Titanium oxide in this mixture is within small quantity and mostly in a bound form. Therefore, no significant exposure to titanium dioxide is thought to occur during the use of

the product.

Reproductive Toxicity: No test data available.

STOT - Single Exposure: No test data available.

**STOT - Multiple Exposure:** Inhalation test of a toner for two years showed no significant carcinogenicity. (Reference 1). In rats

chronic exposure to toner concentrations 4 mg/m3 and over lead to an accumulation of particles in the lung as well as to persistent inflammatory processes and slight to moderate fibrotic changes in

the lungs of rats. In hamsters these effects were only observed at significantly higher

concentrations (> 20 mg/m3). The particle accumulation in the lung tissue of the experimental animals is attributed to a damage and overload of the lung clearance mechanisms and is called "lung overloading". This is not an effect specific to toner dust but is generally observed when high concentrations of other, slightly soluble dusts are inhaled. The lowest-observable-effect-level (LOEL) was 4 mg/m3 and the no-observable-effect-level (NOEL) was 1 mg/m3 in rats. The NOEL was greater than 6 mg/m3 in hamsters. (Reference 2) Toner concentration under the normal use

of this product is estimated less than 1 mg/m3.
