## Employment history

**Boolean Software Engineering Course** , Full-Stack Software Engineer Student    Mar 2021 - Oct 2021

`React`  `CSS`  `TypeScript`  `HTML`  `Node.js`  `Postgres`

- 6 month full time program where I received practical skills in full-stack JS and using React, Typescript, Express, PostgreSQL. I've worked on individual projects and as part of a group, which has helped me develop my skills in git workflow, agile development, and pair programming.

**Automation Anywhere**, Office Administrator    Oct 2019 - Sep 2020

- Keep the flow of busy office life
- Primary point of contact for visitors and employees
- Providing new starters induction, creating an induction week
- Arranging catering for meetings and events
- Rising PO's

**Matchesfashion.com** ↗ Receptionist    Nov 2016 - Sep 2019

- Greeting visitors and ensure that the relevant person inform on their arrival
- Providing a welcoming and efficient service to all visitors and staff
- Arranging catering for meetings and events
- Manage the Shard visitor's booking system and ensuring security by following procedures and controlling access (monitor logbook, issue visitor badges)
- Rising PO's
- Arrange couriers, transport and accommodation as required by the personnel needs
- Liaising with suppliers to implement the ordering and distribution of items required by the head office
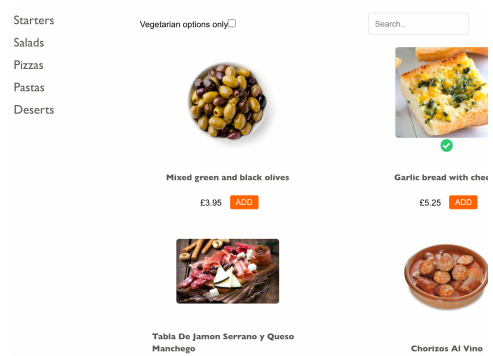

## Education

**State Polytechnic College, Minsk (Belarus)**    Sep 2007 - May 2010

Marketing

# Snippets

## Graduation Project

My graduation project (https://delizioco.netlify.app) is a from-scratch online restaurant. Customers can view the menu, create accounts and place orders. Admins can review user orders on the dashboard and make changes to the menu. You can create a new account or login: usernames james22 or admin, password test. The code can be viewed here: - frontend: https://github.com/tati89/boolean-uk-solo-project-client - backend: https://github.com/tati89/boolean-uk-solo-project-serve

# More about me

## I'm making a career change because...

I have the skills and training needed to help develop and maintain software programs and to make improvements.I have a great desire to learn more and continue to develop my knowledge.
