INTRODUCTION AND DISTRICT BACKGROUND

The Oceanside Unified School District (OUSD, or the District) has requested Davis Demographics & Planning, Inc. (DDP) to assist in preparing a District-wide enrollment forecast based upon student residence. The projected student enrollments generated by DDP cover a seven year period that are based upon the actual Fall 2019 student enrollment figures. The projections conducted by DDP were calculated at the smallest level possible, the Study Area. The Oceanside USD has been broken up into 515 individual “study areas.” No study area straddles two District attendance areas. Therefore, the projected number of students in each of the District’s current attendance areas are derived by the simple addition of all of the study areas that comprise that particular region. The District-wide projections is the summary of all 515 study areas.

The concept of running projections at the “study area” level is ideal for a school district that plans on re-adjusting its current attendance areas. This then gives the District the ability to determine a variety of new attendance area scenarios and know approximately what the future number of students will be living in the proposed areas. Projections are also an excellent way for school district to prepare for a decline in student population and gives a district time to prepare and plan for possible future student population shifts.

A variety of factors go into the calculation of the “study area” projections. These components include the following: (1) examining the current and planned residential development over the next seven years; (2) calculating Student Yield Factors to apply to this new development; (3) determining birth factors for this District area; and (4) calculating Mobility Factors, which examine the in/out migration of students within existing housing units (this factor, for example, takes the “resale” of units into account).

The **Sources of Data** section details where the two sources of data, geographic and non-geographic, are collected and how each data item is used in the seven year student population projection model.

The **Seven Year Projection Methodology** section discusses, in detail, how the factors used in the study were calculated and why they were used. These factors include: the calculation of incoming kindergarten classes, additional students from new housing (referred to as student yield), the effects of student mobility, and a detailed review of planned residential development within the District.

The **Student Resident Projection Summary** sections are a review of SY 2019/20's student resident projection results. Included in these sections are a district wide student population projection summary and a projected resident student population summary for each existing attendance area and study area.

While reading this report, it is important to remember that this is a snapshot of current and potential student population based upon data gathered in fall 2019. Population demographics change, development plans change, funding opportunities can change, District priorities can change, and therefore, new projections and adjustments to the overall Facilities Master Plan will continue to be necessary in the future.

EXECUTIVE SUMMARY

Davis Demographics & Planning, Inc. is assisting the Oceanside Unified School District (OUSD) to plan for future student population changes. By factoring current and historical student data with demographic data and planned residential development, DDP calculated a seven year student population projection. This projection is based upon residence of the students and is designed to alert the District as to when and where student population shifts will occur.

OUSD student population is projected to decline by about 3,140 K-12 students over the projection time frame. The overall elementary (grades TK-5) student population is projected to decrease by -1,408 students. The middle school (grades 6-8) student population may decrease by around -787 students and the high school student population may decrease by a total 452 resident students by the end of the projection timeframe in fall 2026.

Over the next few paragraphs, the report will go over some generalities regarding OUSD projection variable information used to create the projections by residence. More specifics on these variables will be available in the report in noted sections.

Brief Overview of Projection Variables & Residential Development

The overall birth numbers in OUSD over the last several years have decreased from year to year. DDP has elected to let the true birth rate percentages stand due to the fact that the last several years have produced some pretty unpredictable population results. For years 2024-2026 DDP elected to use a rolling average of the three previous years.

(For more specifics on Birth Rates see Section One p. 5)

The mobility factors, which are an average of the in/out migration of all established areas of the district over the last four years (2016 - 2019), indicates that OUSD is losing students as they progress from grade to grade. Mobility tracks the movement of students for every grade at the elementary attendance area level and for the most part it appears that OUSD is losing students at every grade level with the exception of the Reynolds and Mission attendance area which shows some growth in some grades.

(For more specifics on Mobility Factors see Section One p. 6)

There are several residential development projects planned over the projection timeframe within the Oceanside Unified School District. They are located throughout the district and are expected to add new homes to the district over the projection time frame. Yield Factors were calculated by geographically linking assessor parcel data with student data. These rates were organized by using the District's predominant grade configurations (TK-5, 6-8 and 9-12). The Student Yield Factors used in these projections were a result of a large sampling of residential units built within the District's boundaries during 2005-2014.

(For more specifics on Residential Development see Section Two p.10-12)

SECTION ONE – METHODOLOGY

SOURCES OF DATA

Geographic Map Data

Five (5) geographic data layers were updated for use in the seven year student population projections:

1. Street Centerline Database
2. Study Areas
3. Schools
4. Students – Historical and Current
5. Planned Residential Development

1) Street Centerline Data

DDP has obtained a street database from the County of San Diego and has maintained the database for the District for many years. The street database has associated attributes that contains, but are not limited to, the following fields: full street name, address range and street classification

The main function of the streets is in the geocoding process of the student data. Each student is geocoded to the streets by their given residence address. The geocoding process places a point on the map for every student in the exact location that student resides. This enables DDP to analyze the student data in a geographic manner.

Another vital utilization of the digital street database is in the construction of study areas. Freeways, major streets and neighborhood streets are generally used as boundaries for the study areas.

2) Study Areas

Study areas are small geographic areas, similar to neighborhoods, and the building blocks of a school district. Study areas are geographically defined following logical boundaries of the neighborhood such as freeways, streets, railroad tracks, or rivers. Each study area is then coded with the elementary, middle and high school that the area is assigned to attend. By gathering information about the district at the study area level, DDP and the District can closely monitor growth and demographic trends in particular regions and identify potential need for boundary adjustments or new facilities.

3) Schools

The District provided school facility location information to DDP for the purpose of mapping the District facilities. The school information includes school name, address, unique code and capacity.

4) Student Data

a. Historical Student Data - Historical enrollment is used to compare past student population growth and trends as well as the effects of mobility (move in, move out from existing housing) throughout the District. DDP utilized the four (4) previous year's (16/17, 17/18, 18/19, 19/20) geocoded students as historical data.

b. Current Student Data - A student data file for October 2, 2019 (received by computer data file from the School District) summarized by grade level and by study area is used as a base for student population projections. Existing students were categorized by study area through the geocoding process that locates each student within a particular area based upon their given address. The projections run each of the next seven years from school year 2020/21 through school year 2026/27.

c. Student Accounting The Student Accounting Summary (Table 1) indicates the total student enrollment as of October 2019 and the number of students used in the seven year student population projections. The projection model is based upon student residence and excludes students residing outside of the District's boundaries, students unable to be address matched and special education students (special education students usually attend a school that services their particular need).

Student Accounting Summary
School Year 2019/20 Actual Enrollment (10/2/2020)

Total Students Provided by District File (October 2019)	16941
Students Living Out of District	545
SDC Students Living Out of District	64
Pre-Kindergarten Students	316
Adult Education Students	3
Unmatched Students	8
<hr/>	
RESIDENT STUDENTS USED IN PROJECTIONS	16,005

Table 1– Student Accounting Summary

5) Planned Residential Development

This data was obtained through discussions with the District, city agencies, county agencies and major developers within the District boundaries. Data includes development name, location, housing type, total number of units and projected move in dates (phasing). Phasing for planned housing is factored into the seven projections. (See **SECTION 2** for a detailed listing of the planned residential development). In the student population projection DDP includes all Approved and Tentative tract maps in addition to any planned or proposed development that possibly will occur within the projection timeframe. The planned residential development information and phasing estimates is a snapshot of the District at the time of this study.

Data Used for Variables

Three sets of data were compiled and reviewed for use in the seven year student population projections by residence:

1. Births by Zip Code
2. Mobility Factors
3. Student Yield Factors

1) Births by Zip Code Data

Birth data by postal zip code was obtained from the California State Department of Health for the years 2000-2018 and roughly correlated to the Oceanside Unified School District. Past changes in historical birthrates are used to estimate future incoming kindergarten student population from existing housing.

2) Mobility Factors

Mobility refers to the increase/decrease in the migration of students within the District boundary (move-in/move-out of students from existing housing). Mobility, which is essentially a modified cohort, is applied as a percentage of increase/decrease among each grade for every year of the projections.

3) Student Yield Factors (SYFs)

The Student Yield Factors, when applied to planned residential development units, determine how many additional students will be generated from new construction within the District.

The student yield factors, combined with planned residential development units are used to determine the number of students generated from new residential housing development projects. Student Yield Factor calculations will be discussed again in the **Seven Year Projection Methodology** section.

SEVEN YEAR PROJECTION METHODOLOGY

The projection methodology used in this study combines historical student population counts, past and present demographic characteristics, and planned residential development to forecast future student population at the study area level. District-wide projections are summarized from the individual study area projections. **These projections are based on where the students reside and where they should be attending school. We use the actual location of where the students reside, as opposed to their school of enrollment, in order to provide the most accurate estimate of where future school facilities should be located.** The best way to plan for future student population shifts is to know where the next group of students will be residing. The following details the methodology used in preparing the student population projections by residence.

Seven Year Projections

Projections are calculated out seven years from the date of projection for several reasons. The planning horizon for any type of facility is typically no less than five years, often longer. Seven years are usually sufficient to adequately plan for a new facility. It is a short to mid-term solution for planning needs. Projections beyond seven years are based on speculation due to the lack of reliable information on birthrates, new home construction and economic conditions.

Why Projections are Calculated by Residence

Typically, school district projections are based on enrollment by school. However, this method is inadequate when used to locate future school facility needs, because the location of the students is not taken into consideration. A school's enrollment can fluctuate due to variables in the curriculum, program changes, school administration and open enrollment policies. These variables can skew the apparent need for new or additional facilities in an area.

The method used by DDP is unique because it modifies a standard cohort projection with demographic factors and actual student location. **DDP bases its projections on the belief that school facility planning is more accurate when facilities are located where the greatest number of students reside.**

The best way to plan for facility requirements is to know where the next group of students will be residing. The following details the methodology used in preparing the student population projections.

PROJECTION VARIABLES

Each year of the projections, 12th grade students graduate and continuing students' progress through to the next grade level. This normal progression of students is modified by the following factors:

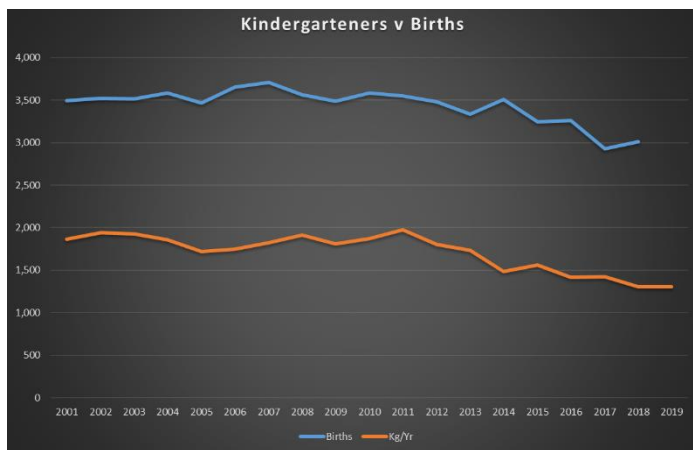

1) Incoming Kindergarten

Live birth data is reported to the California State Department of Health by the resident postal zip code of the mother. DDP uses the birth data by zip code roughly correlating to the District boundary and applies the data accordingly. If need be, a different birth factor can be applied to various areas of the District.

Incoming kindergarten classes, for existing homes, are estimated by comparing changes in past births in the area. Table 2 illustrates the total births for each zip code in the Oceanside Unified School District from 2000 to 2017. Incoming kindergarten classes are determined by multiplying the existing kindergarten class (2018/19) by the percent increase/decrease in the birthrate for the year the kindergarten class was born (2013). Assuming that the 2018/19 school year kindergarten class was born in 2013; DDP compared the total births in 2013 to the total births in 2014, to determine a factor for next year's kindergarten class (2019/20). The 2013 births were compared to 2015 (2020/21's K class) and 2013 to 2016 (2021/22's K class).

The birth rate numbers over the last few years have slowly declined for the most part and have been dropping off gradually with just a small drop occurring annually. The District should note that birth rates have continued to remain somewhat steady hovering around 3,500 births annually with the exception of 2013, 2015, 2016 and 2017 where there were declines. Camp Pendleton continues to have higher birth rates than the overall district average. On the left is a side by side comparison of on/off base birth factors. The graph shows that Oceanside USD received 39.1% of the children born in the immediate area by the time they are ready for Kindergarten for the Fall 2018 school year. Births peaked in 2007 and have been in steady decline. Something we have seen throughout the country and other areas of California. The Districts capture rate has declined in tune with the decline in births for the area. In fall 2011 the Districts capture rate was 54.1% and has steadily declined to its lowest point at 39.1% for Fall 2018, a difference of about 15%.

Table 2—Birth Rate Factors

Areas on Base	
Rate	Year
1.002	2020
0.913	2021
0.785	2022
0.889	2023
0.897	2024
0.871	2025
0.860	2026

Areas off Base	
Rate	Year
0.934	2020
0.929	2021
0.870	2022
0.836	2023
0.892	2024
0.882	2025
0.870	2026

2) Student Mobility Factors

Student mobility factors further refine the seven-year student population projections. Mobility refers to the increase/decrease in the migration of students within the District boundary (move-in/move-out of students from existing housing). Mobility, similar to a cohort, is applied as a percentage of increase/decrease to each grade for every year of the projections.

A net increase or decrease of zero students over time is represented by a factor of **1.00**. A net student loss is represented by a factor less than **1.00** and a net gain by a factor greater than **1.00** (see Table 4).

Example:

$$\begin{array}{r}
 100 \text{ Kindergarten students in fall 19/20} \\
 \times \quad .97 \text{ (Del Rio Elementary)} \\
 \hline
 = \quad 97 \text{ 1st grade students in fall 20/21}
 \end{array}$$

Having historical student data categorized by study area is extremely helpful in calculating accurate Student Mobility Factors. DDP was able to utilize the last four years' (fall 16/17, 17/18, 18/19 and 19/20) student data. The 16/17 student data was compared to 17/18, 17/18 to 18/19, and 18/19 to 19/20 (this year's student data) at the Study Area level. A sample of 499 study areas (from a total of 515) were chosen within the District's boundaries that had no new residential development over the last five years for mobility research. Mobility calculations using all study areas would double count active areas of forecasted development. Grades K-12 Mobility was calculated to correspond with elementary attendance areas.

Table 3– Mobility Factors

SCHOOL	K to 1	1 to 2	2 to 3	3 to 4	4 to 5	5 to 6	6 to 7	7 to 8	8 to 9	9 to 10	10 to 11	11 to 12

Stuart Mesa School	0.93	0.91	1.08	0.91	0.97	0.87	0.95	0.88	0.91	0.88	0.98	0.86

4) Student Yield Factors

The Student Yield Factors, when applied to planned residential development units, determine how many additional students will be generated from new construction within the District. The district has several residential development projects so we elected to use Student Yield Factors (SYFs) provided by OUSD. Student Yield Factors were calculated by geographically linking assessor parcel data with student data. These rates were organized by using the District’s predominant grade configurations (TK-5, 6-8 and 9-12). The Student Yield Factors used in these projections were a result of a large sampling of residential units built within the District’s boundaries during 2005-2014.

0.155	0.051	0.047

Table 4– Student Yield Factors

5) Planned Residential Development

Closely related to the Student Yield Factors are planned residential development units. Planned residential development data is collected to determine the number of new residential units that will be built over the time frame of the student population projections. The units built within the next seven years will have the appropriate SYF applied to it to determine the number of new students the planned residential development will yield. There are several projects expected to be built within the district over the projection timeframe. These projects has been included in the projections calculation using the above SYFs.

APPLYING THE VARIABLES TO GENERATE THE PROJECTIONS

The following paragraphs summarize how DDP uses the factors to determine the student population projections. Remember that these projections are based on residence.

Oceanside Unified School District has been divided into 515 study areas. Every study area is coded with the school code of the elementary, middle and high schools attendance area it falls within. The residential projections are calculated at the study area level. This means that DDP conducts 515 individual projections that are based upon the number of students residing in each study area.

The first step in calculating the projections is to tally the number of students that live in each study area by each grade (Kindergarten through 12th grade). The current student base (school year 2019/20) is then passed onto the next year's grade (2019/20's K become 2020/21's 1st graders, 2019/20's 1st graders become 2020/21's 2nd graders, and so on). After the natural progression of students through the grades is applied, then Birth Factors are multiplied to the current kindergarten class to generate a base for the following year's kindergarten class.

Next, a Mobility Factor is applied to all grades. Again, these factors take into account the natural in/out migration of students throughout the District. The mobility factor is applied to each student in every grade (K-12). A unique mobility factor is applied to each elementary school attendance area determined by the mobility factor study.

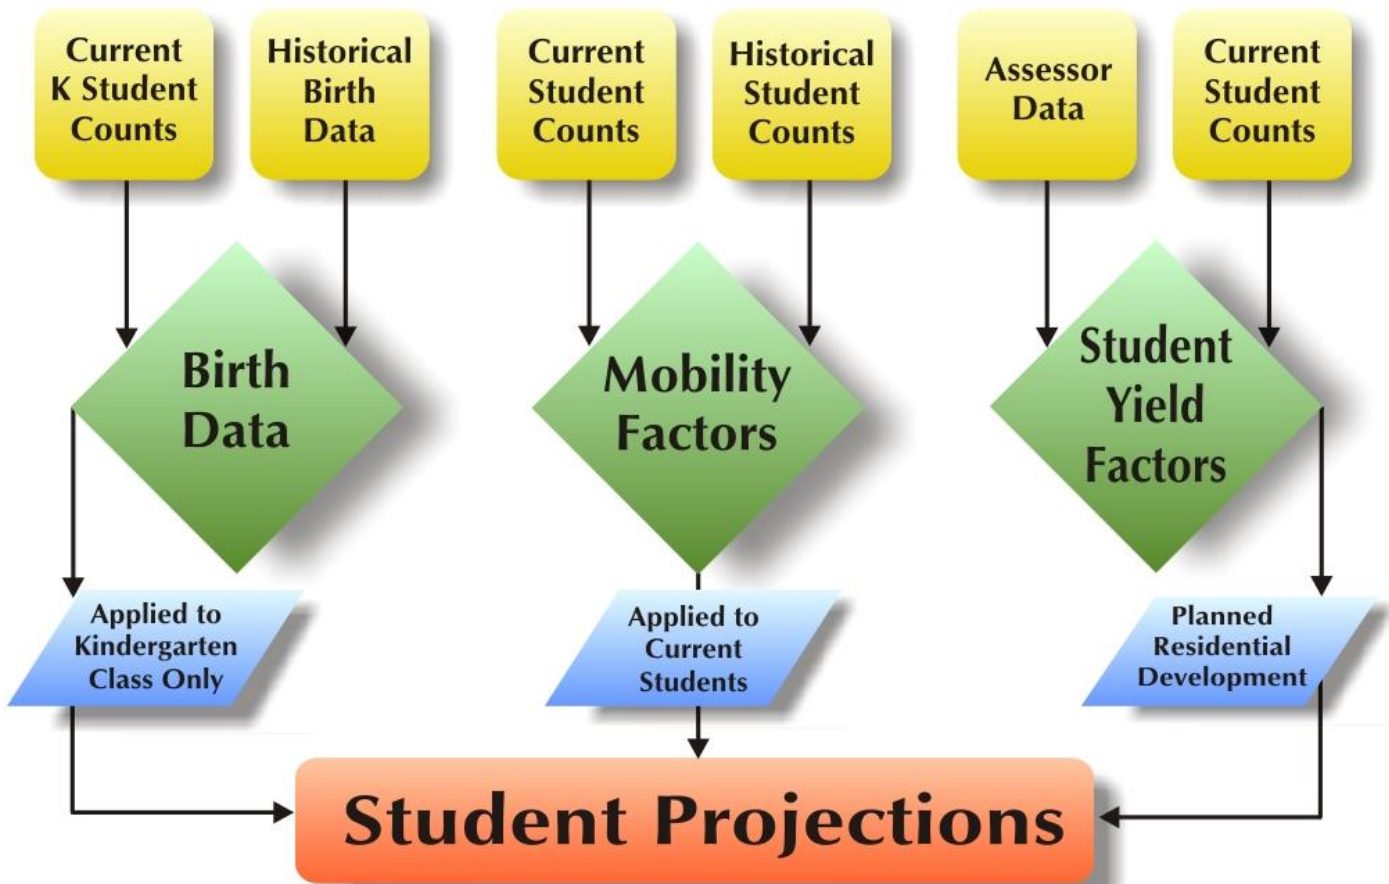

The last essential layer applied to the projections deals with additional students from planned residential development. This is a simple calculation, again conducted at the study area level, where the estimated number of new housing units for a particular year is multiplied by the appropriate Student Yield Factor. For example, if 100 single family detached (SFD) units are to be built in a specific study area in a given year, then you would multiply this number (100) by the SFD TK-5 student yield factor (.134) and the resulting number (13) is divided evenly among the seven grades.

To finish generating the projections by residence, the same process is conducted for each of the 515 study areas. Once the projections have been run at the study area level, then it is simple addition to determine projections for each of the District's attendance areas or for a district-wide summary. For example, the residential projections for the Oceanside Elementary School attendance area is simply the summary of all of the study areas that make up this specific attendance area (see Sections Three and Four) for the projections of each elementary, middle and high school attendance areas).

The District Summary for the projections (Section Three) is a total summary of all 515 study areas. The projections exclude all of the students that attend a District school but live completely outside of the District's boundaries. These students are factored back into the projections by calculating their current overall percentage of student population, applying the percentage to future years and adding it to the resident projections (please see the Attendance Matrices in Section Two for a breakdown of the out-of-district and SDC students school). DDP adds the current total out-of-district students to each year of the projections because there is no way to accurately forecast these students in the future.

Current and historical students, geographic data and non-geographic data are used to calculate the factors used in the student population projections by residence. These factors are applied using SchoolSite and projections are calculated for each study area for each grade.

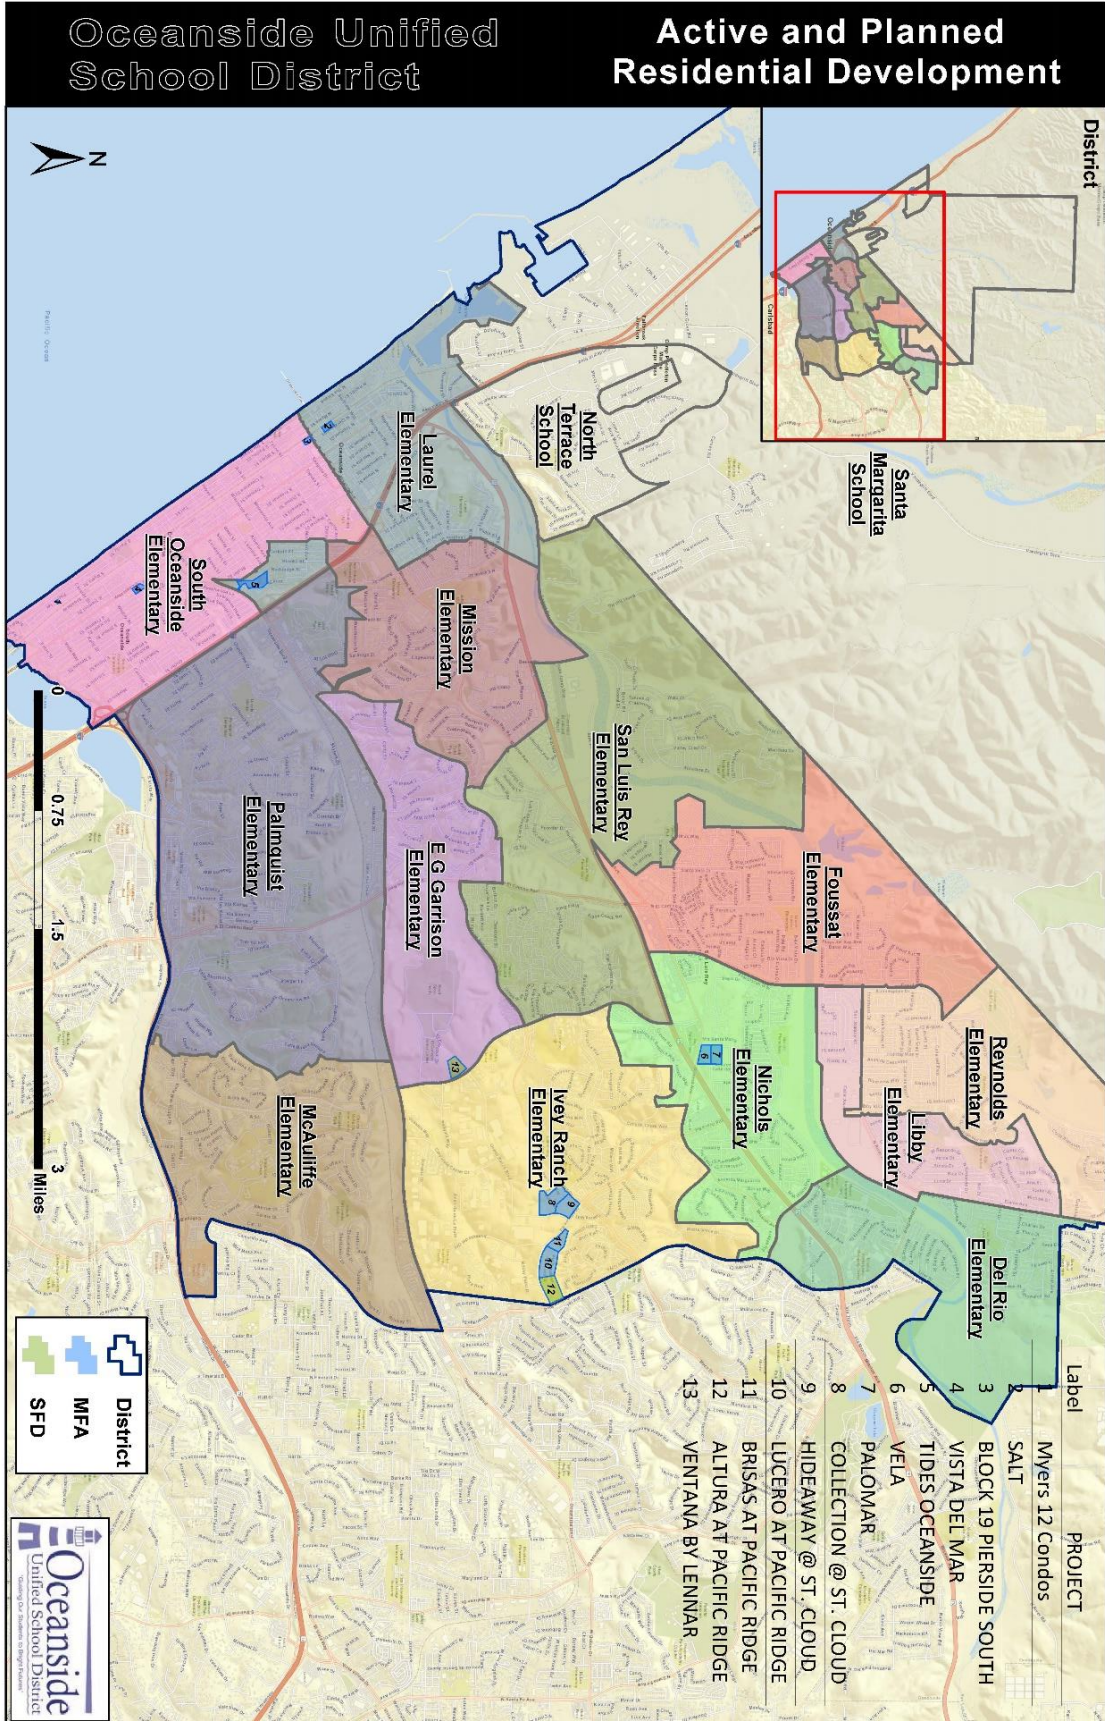

Projections by Residence Flowchart

SECTION TWO – PLANNED RESIDENTIAL DEVELOPMENT

This data was obtained through discussions with the District staff, City Planning Department, visited active housing projects and contacted developers/owners of future projects . Phasing estimations were made by DDP and city planning. A database and map of the planned residential development was created, including, when available, project name, location, housing type, total number of units and estimated move in dates (phasing schedule). Projected phasing is based upon occupancy of the unit and is used to help time the arrival of students from these new developments.

In the student population projection by residence DDP includes all Approved and Tentative tract maps in addition to any planned or proposed development that possibly will occur within the seven year projection timeframe. The planned residential development information and phasing estimates is a snapshot of the District at the time of this study. All of the information may change and should be updated annually.

Total SFD = 117 Total MFA = 672

SECTION THREE – ATTENDANCE MATRICES

Three Attendance Matrices have been included to provide a better understanding of where students reside and where they attend school. **Remember, DDP projections are based upon where the students reside, not the students school of enrollment. This method allows DDP to provide the most accurate forecast of where shifts in student population may occur and changes to future facilities (if necessary) should be located.** Therefore, since the projections are based upon where the students reside, the figures we use as a base for each school's resident projection may be slightly higher or lower than the actual reported enrollment for each school. The best way to plan for future facilities is to know where the next group of students will be coming from, not necessarily which school they are currently attending.

Attendance matrices act as a check and balance for student accounting; illustrating where the students reside (in what School of Residence) based upon their geocoded address and which school they attend (School of Attendance) based upon District provided student data. It is essential to show how the students used in the projections match up to the District's records of enrollment for each school. Furthermore, intra-district transferring patterns can be determined by comparing School of Residence data to the School of Attendance data.

READING THE MATRIX

Starting with the TK-5 Elementary School Attendance Matrix, let's begin with Del Rio ES as an example. Following down the first column with the Del Rio ES heading, there are 266 TK-5 grade students attending Del Rio ES that also reside in the Del Rio ES attendance area. Continuing downward, 2 student attends Del Rio ES but resides in the Garrison ES attendance area. Next, it shows that 6 students attend Del Rio ES and reside in the Fousat ES attendance area, and so on.

There are 96 Pre-Kindergarten students attending Del Rio ES. Unmatched refers to students who we were unable to geocode to a map but attend schools within the district, there are 0 unmatched students for Del Rio ES. The row Out of District refers to students living completely outside of the Oceanside Unified School District, but attending one of the District's schools. There are 6 Out of District students attending Del Rio ES. The row Special Ed refers to special education attending Del Rio, there are 26 Special Ed Students attending Del Rio. Total Students Enrolled in Elementary School is the total number of students attending a school regardless of where they reside, and reflects the District's enrollment counts for each school. There are 448 students attending Del Rio ES.

The next step is to read across the matrix, beginning with the Del Rio ES attendance area row. We know 266 represent the total number of TK-5 grade students residing and attending Del Rio ES. The next column, Garrison ES refers to the number of TK-5 grade students residing in the Del Rio ES attendance area, but attend Garrison ES. There are 4 students residing in the Del Rio ES attendance area but attending Garrison ES.

The Students Residing in Attendance Area Residence column is the total number of students living in that particular attendance area. There are 343 TK-5 students residing in the Del Rio ES attendance area. The Total In-District Enrollment row is the actual number of students used as the base or actual number for each attendance area in the 2019/20 projections. The Oceanside Unified School District has a total of 7,033 resident students residing within the OUSD elementary attendance areas. All other matrices can be read in the same manner. The following matrices are include for the elementary, middle and high school grade configurations and can be used as a checks and balance between the total number of students enrolled at each school and the attendance area where the students actually live.

SECTION FOUR – DISTRICT WIDE STUDENT POPULATION PROJECTION

The student population is projected out seven years for each of the study areas, attendance areas and for the entire Oceanside Unified School District. The District Wide Summary enables the District to see a broad overview of future population shifts and what impact these shifts may have on existing and future facilities. Each attendance area is summarized to give a more local view of population changes and identify variances in the district. The study area listings enable the District to monitor student population growth or decline in neighborhood areas within the District.

Together, these projection summaries, present the means for identifying the timing of future population shifts and overall facility adjustments needed to accommodate these shifts. At any time, study areas and their projected resident students can be shifted between schools to assist in balancing enrollment, school consolidation among various other analyses.

District Wide Student Projection Trends

Oceanside Unified School District student population is projected to decline by -2,647 TK-12 students over the projection time frame. The overall elementary (grades TK-5) student population is projected to decrease by -1,408 students. Elementary grades may share the largest decline in the district. The middle school (grades 6-8) student population may decrease by around -787 students. The overall high school student population may decline by 452 resident high school students by fall 2026. One of three non-geographical factors explained in our seven year projection methodology and detailed in the following middle school summary below, may be a contributing factor in the decline in student population throughout the district coupled with declining births and areas of the district showing maturity with little development may be contributing factors.

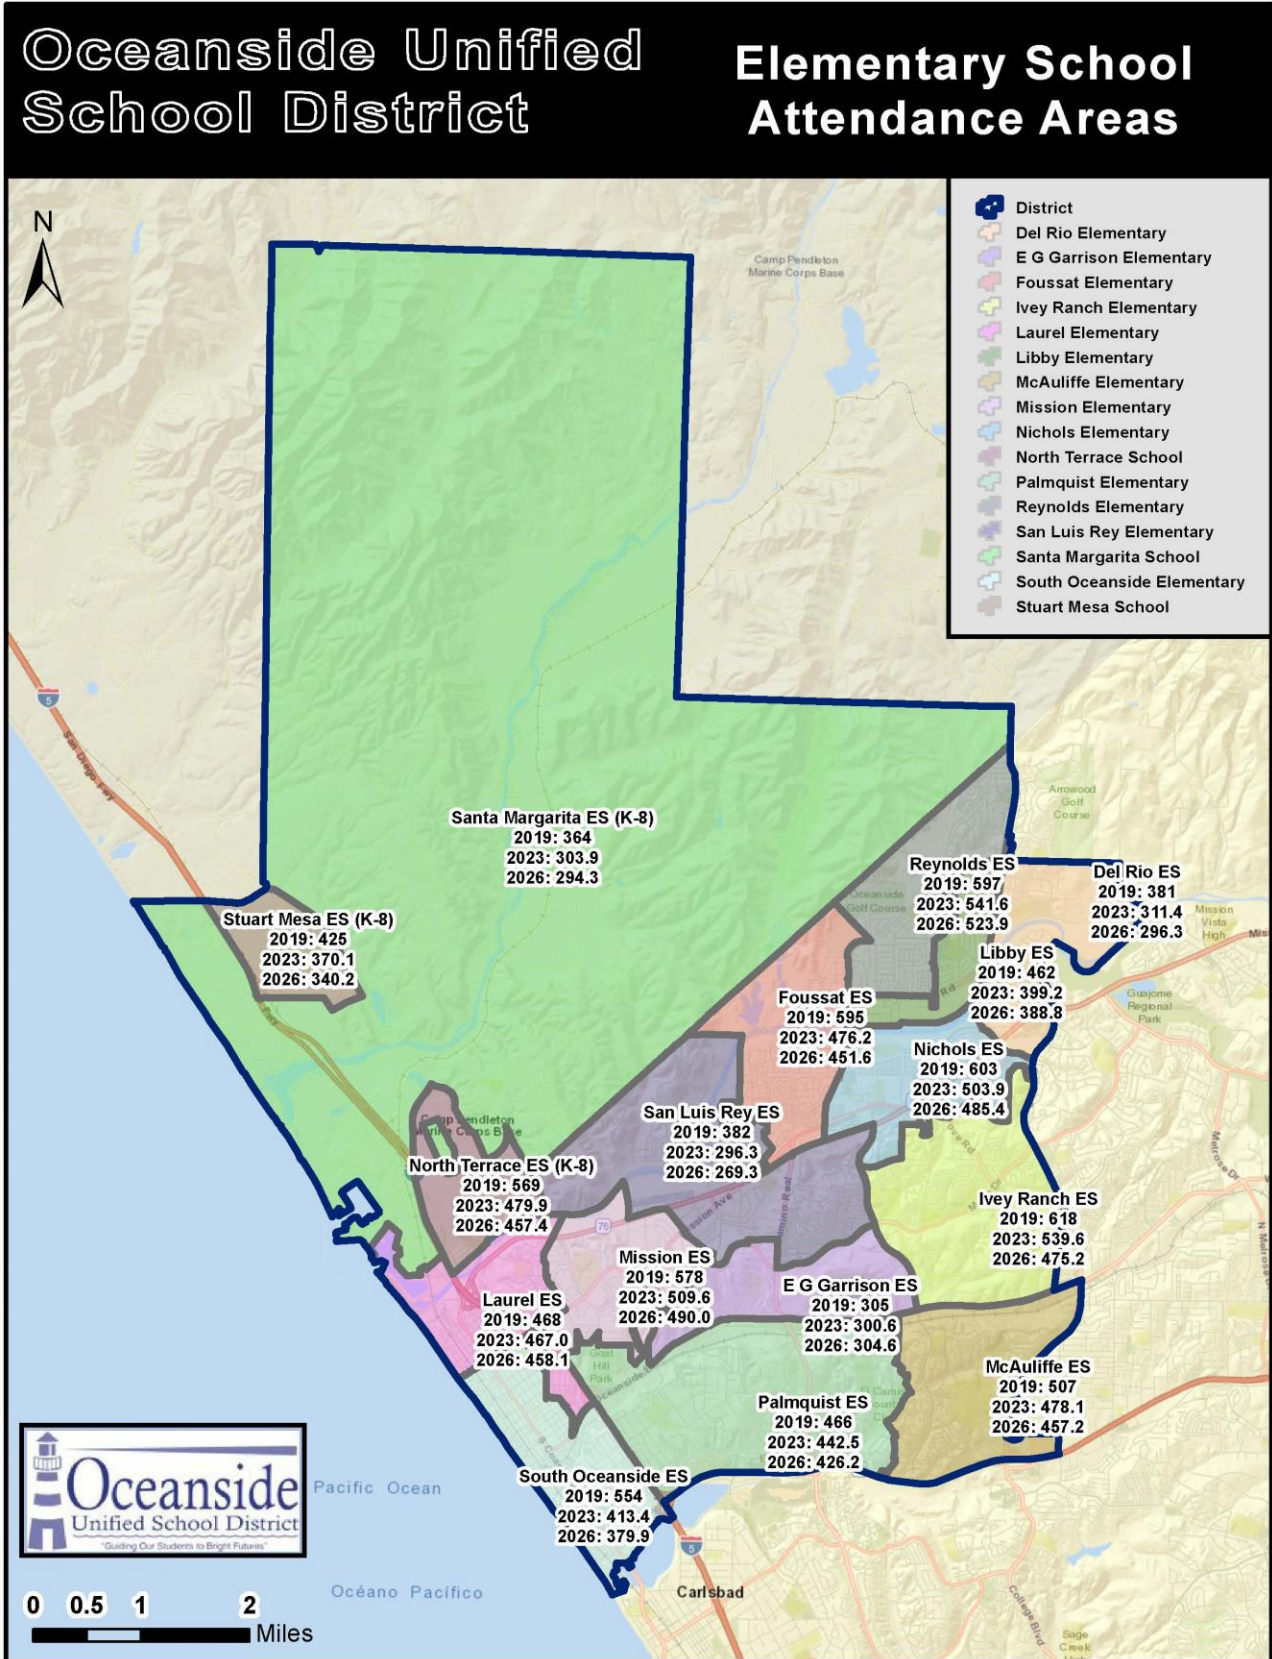

By next year (Fall 2020), the District can potentially expect a total of about 7,903 TK-5 students enrolled in the district, a total of about 3,775 6-8 students and a total of 4,806 9-12 high school students. About 16,486 TK-12 students are projected for Fall 2020, a total decline of -136 students from Fall 2019. The TK-5 student population is projected to decline next year by about -183 and in Fall 2021 decline again by around -315 students and continuing throughout the projection timeframe with a possible decline of about -1,408 TK-5 students. The District overall has had consistent births with the exception of one area in the district. The coastal areas have seen a dramatic decline in births since 2007 possibly due to many variables, one of them being rising home values making it difficult for young families to settle in the area. According to the California Department of health, the zip code for this area (92054) once had 2,097 births in 1996. This number of births has declined slowly over the years to 1,394 in 2007. After 2007 the rate of decline increased as there were only 804 births the following year in 2008. There has been a continued decline since 2008 through 2015 when there were only 499 births and then increased slightly to 536 in 2016 and then decreased again to 480 births in 2018 according to the California Department Health. The coastal area has also seen residential housing converted to seasonal 2nd homes, an area more suited for empty nesters with higher incomes.

The projections indicate 6-8 student counts may decline over the next seven years but not to the extent of the elementary TK-5 student population. 6-8 student population may see a decline through the projection timeframe fall 2026. The decline will continue through 2024 with year 2024 possibly having the largest decline in 6-8 students of about -226. Mobility measures the movement of students moving in and out of the district due to several factors such as housing resales, drop outs, renter migration and also military at the elementary attendance area level. Mobility combines four years of student data that is used to see the movement of students throughout the district. Currently at all grades there appears to be an outward migration of students leaving the district. The outward migration of students in areas outside the base have more decline and also have attendance areas indicating decline in some grades such as the King, Lincoln, Jefferson and Cesar Chavez middle attendance areas.

High school projections for the district also indicate a possible decline in 9-12 high school student population. Currently the district has, according to data reported to the state a high school student population of 4,678. According to the seven year projections the high school student population may increase fall 2020 through 2021 and then decline gradually through fall 2026 when the student population may decline to 4,226. The following years of the projection indicate a decline in the high school student population of -182 for fall 2023, -171 for fall 2025 and a possible decline of -129 for fall 2026 showing an overall high school student population of 4,226.

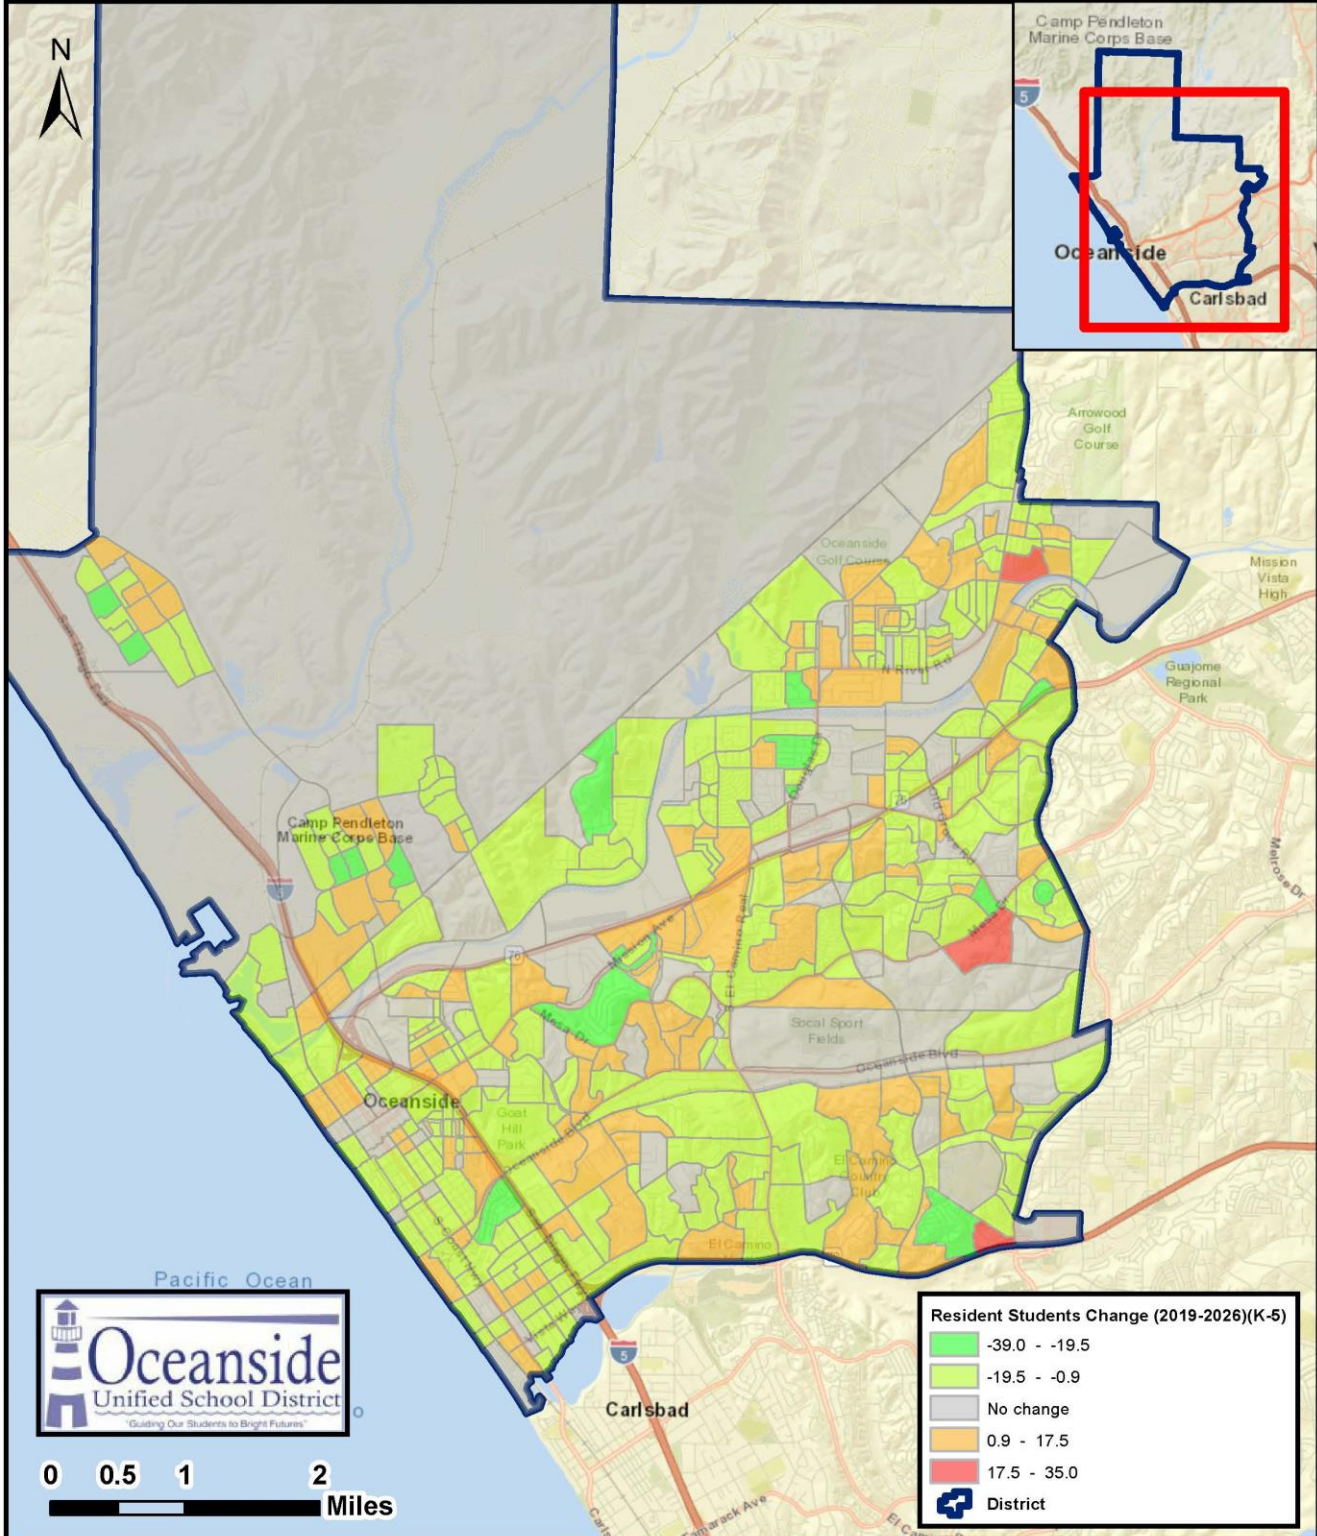

The preceding projection numbers are based upon "residence", not actual enrollment at each school. The Out of district and Special Education students were not included in these projection numbers unless otherwise noted.

Elementary Attendance Area Student Population Projection Trends

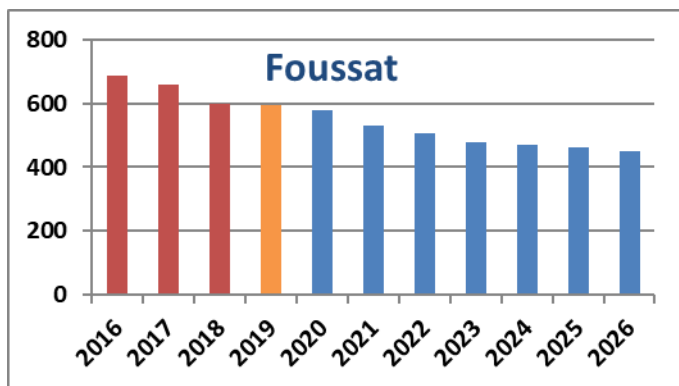

The District Wide Student Population Projections, in fall 2019 had a total of 8,087 TK-5 students enrolled in the district. The overall elementary (grade TK-5) students are projected to be around 6,679 by the end of the seven-year projection time-frame and includes special education and out of district students.

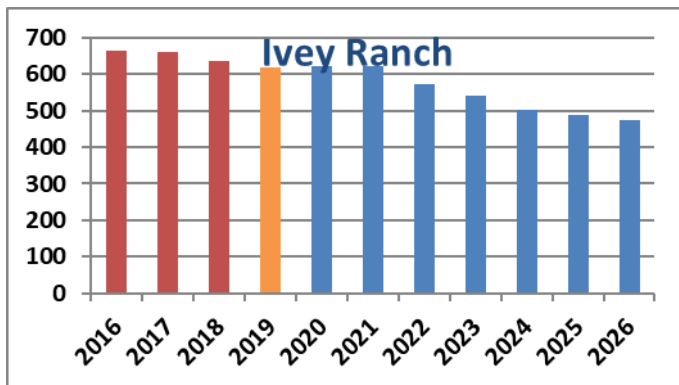

The **Del Rio ES** attendance area had a total of 381 TK-5 resident students Fall 2019. The resident students are projected to decline annually by an average of -12.1% students through 2026. In the Fall 2019 Elementary Attendance Matrix, Del Rio ES had a total of 448 enrolled students. The school had a total of 6 out of district transfer students. 86 TK-5 students are attending Del Rio from other Attendance Areas. The school had 19.2% open enrollment.

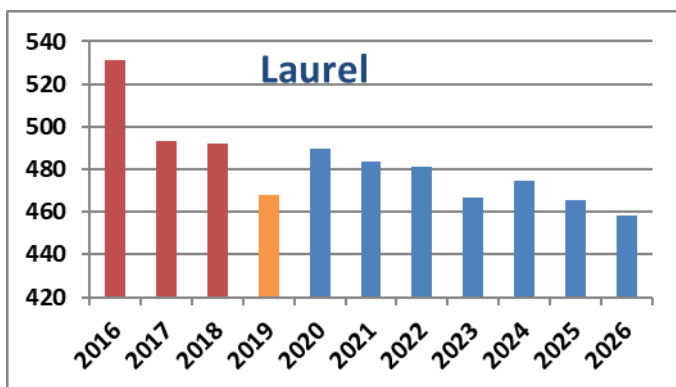

The **EG Garrison ES** attendance area had a total of 305 TK-5 resident students in Fall 2019. The resident students are projected to remain static over the projection timeframe. The TK-5 students may stay static throughout the projection timeframe to 304.6 students by Fall 2026. In the Fall 2019 Elementary Attendance Matrix, the EG Garrison attendance area had a total of 323 enrolled students. The school had a total of 13 out of district transfer students. 121 TK-5 students are attending EG Garrison from other Attendance Areas. The school had 37.5% open enrollment.

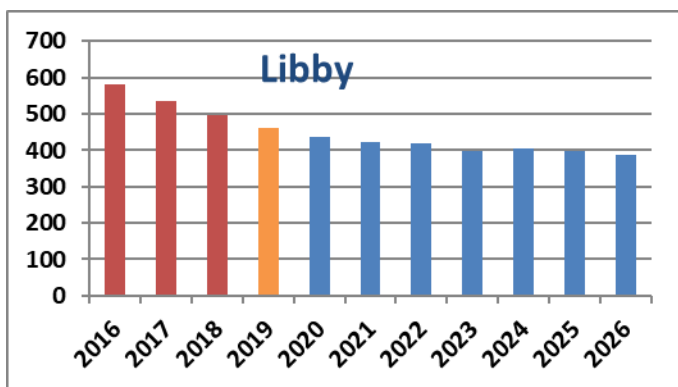

For Fall 2019, the **Foussat ES** attendance area had a total of 595 TK-5 resident students. The Foussat ES attendance area is projected to decline through 2026. According to the projections the attendance area may see 143 decline TK-5 resident students by Fall 2026. In Fall 2019, Foussat ES had a total of 567 TK-5 students enrolled, of which 139 were transfer students (7 from outside the district boundary) and had an open enrollment of 24.5%. Of the 567 enrolled students, 427 actually resided within the Foussat attendance area.

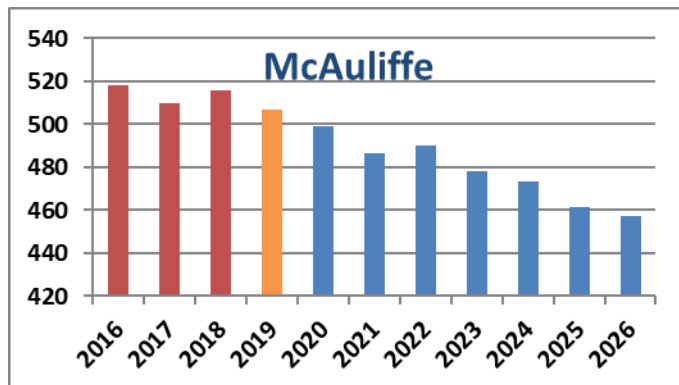

Ivey Ranch ES, according to the projections, has a total of 187 TK-5 resident students. By 2026, the school is projected to have about 475 TK-5 resident students. In reviewing the Elementary Attendance Matrix, the school had a total of 687 total TK-5 students enrolled in the Fall of 2019, of which 159 were transfer students and 30 were from outside the OUSD boundary with a total open enrollment of 23.1%. Of the 687 enrolled student population at Ivey Ranch 521 students actually resided within the Ivey Ranch attendance area.

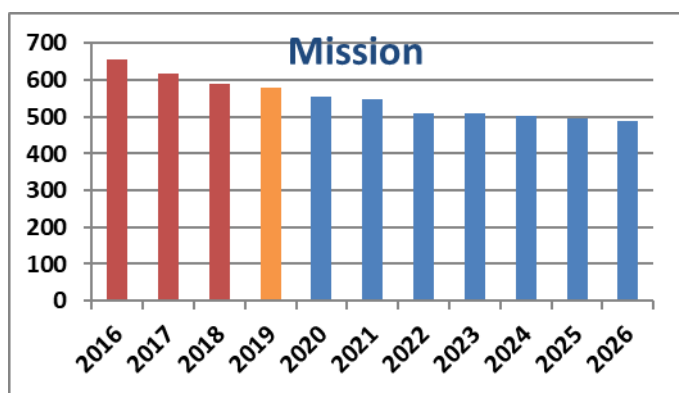

The **Laurel ES** attendance area had a total of 468 resident students in Fall 2019. According to the projections, the area is projected to decrease after growing slightly through 2021 over the next seven years. The school is projected to have about 458.1 TK-5 resident students by 2026. In the Elementary Attendance Matrix, Laurel ES had a total of 439 TK-5 enrolled students. Of the 439 enrolled students 267 resided within the attendance area. The school had a total of 171 transfer students of which only two students are from outside the district and an open enrollment of 39.0%.

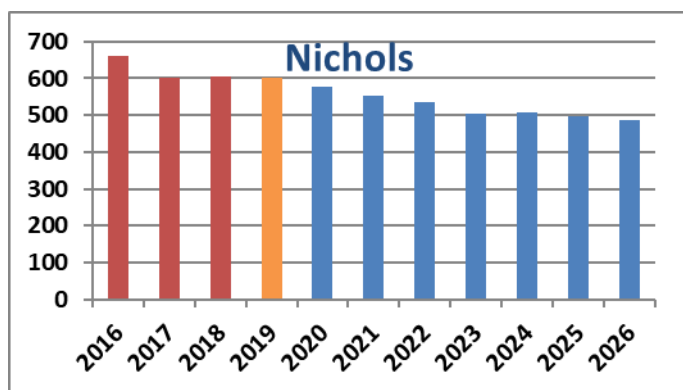

In reviewing the projections, in 2019, the **Libby ES** attendance area school had a total of 462 TK-5 resident students. By the end of the projection (Fall 2026), the elementary school area may have about 389 TK-5 resident students living within the attendance area. The projected decline will be gradual beginning this year. According to the Elementary Attendance Matrix, Fall 2019, the school had a total of 460 TK-5 enrolled students. The school had a total of 107 transfer students (5 from outside the district) and an open enrollment of 23.3%.

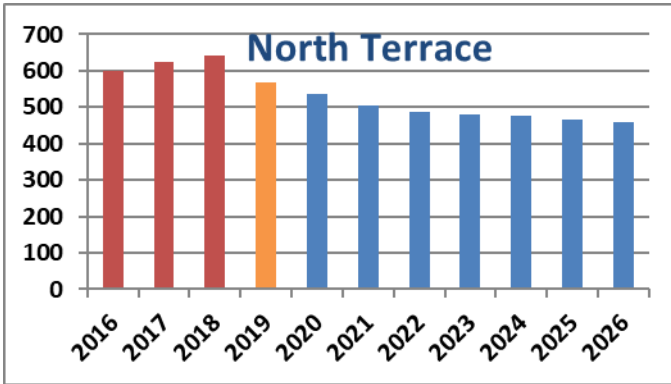

In the 2019/20 school year, the **McAuliffe ES** attendance area had a total of 507 TK-5 resident students. In reviewing the projections, by Fall 2026 the school may have about 457 resident students. According to the Elementary Attendance Matrix, the McAuliffe ES attendance area had a total of 559 TK-5 students enrolled, of the students enrolled 171 were transfer students (23 from outside the district, one is a TK out of district student and 1 student is Special Ed out of district students) and an open enrollment of 30.6%.

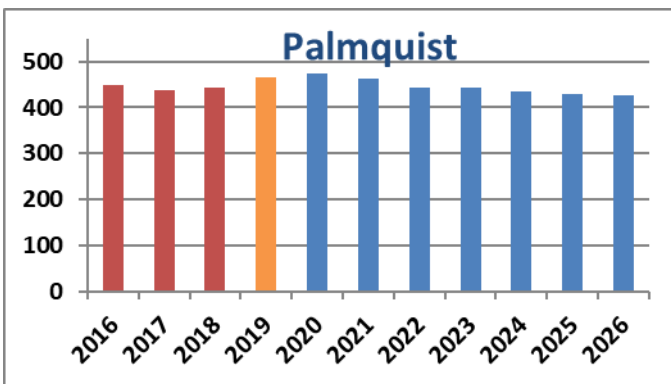

The **Mission ES** attendance area had a total of 578 TK-5 resident students living within the attendance area in Fall 2019. According to the seven year projections, the projected TK-5 resident students may decline gradually over the next 7 years. By the end of the projections (2026) Mission ES is projected to have about 490 TK-5 resident students. According to the Elementary Attendance Matrix, the attendance area had a total of 601 TK-5 students enrolled in 2019, and had a total of 204 transfer students (5 from outside the district) and an open enrollment of 33.9%.

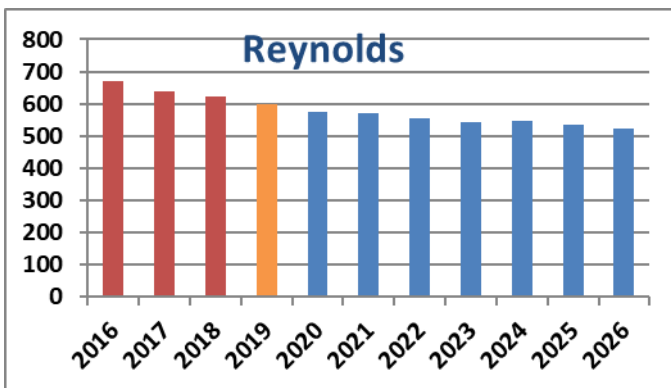

The **Nichols ES** attendance area had a total of 603 TK-5 resident students living within the attendance area in Fall 2019. According to the projections, the projected TK-5 resident students may decline throughout the projection timeframe fall 2026. The Nichols ES attendance area is projected to have about 485 TK-5 resident students by 2026. According to the Elementary Attendance Matrix, the attendance area had a total of 628 TK-5 students enrolled in Fall 2019, and had a total of 195 transfer students with 17 outside the district and an open enrollment of 31.1%.

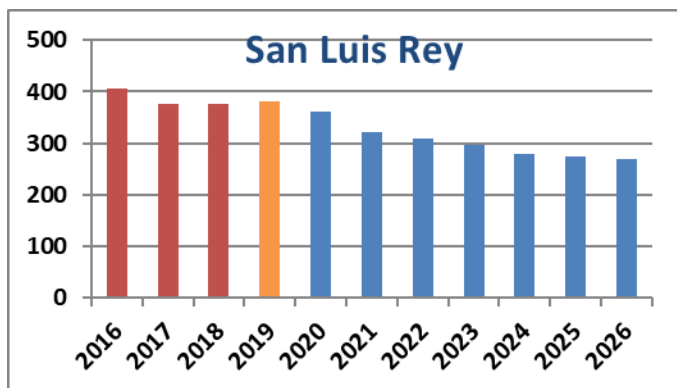

According to the projections for **North Terrace ES**, the school had a total of 569 TK-5 students in 2019/20 school year. At the end of the seven year projections (Fall 2026), the attendance area may have a total of 457 TK-5 students, a possible decline of about -111 resident students. In reviewing the Elementary Attendance Matrix, the school had a total of 663 students enrolled in Fall 2019. There are 145 transfer students with 23 from outside the district and an open enrollment of 21.9%.

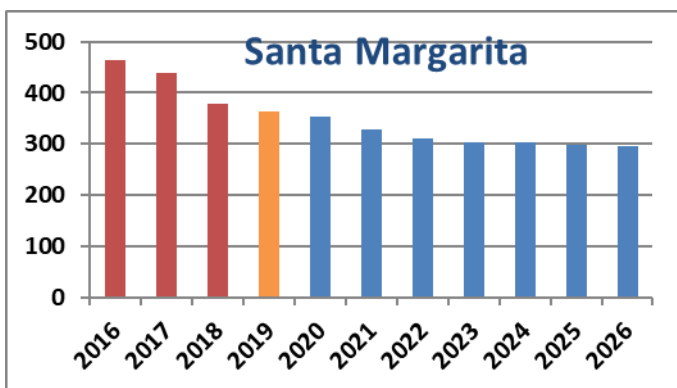

In the Fall 2019/20 school year, the **Palmquist ES** attendance area had a total of 466 TK-5 resident students. In reviewing the seven year projections, by 2026 the school may have about 426 resident students, a decline of about 40 students throughout the projection timeframe. According to the Elementary Attendance Matrix, the Palmquist ES attendance area had a total of 636 TK-5 students enrolled, of the students enrolled 272 were transfer students with 19 attending from outside the district, two student are Special Ed out of district. By far the largest number of intra-district transfers at 42.8%.

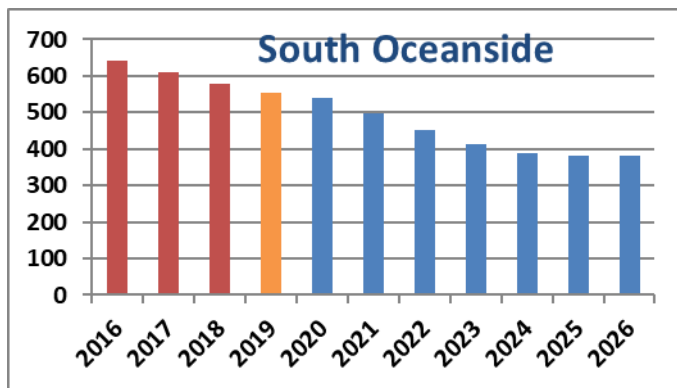

The **Reynolds ES** attendance area had a total of 597 TK-5 resident students living within the attendance area in Fall 2019. By the end of the projection timeframe (Fall 2026) the Reynolds ES attendance area is projected to have about 523 TK-5 resident students. According to the Elementary Attendance Matrix, the school had a total of 627 TK-5 students enrolled in Fall 2019 with 217 transfer students with 15 out of district students and a total open enrollment of 34.6%.

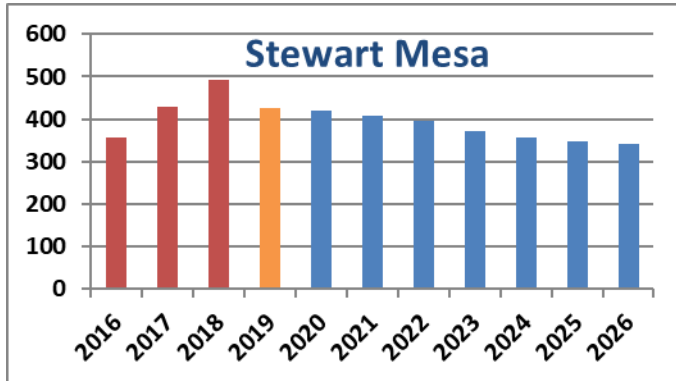

According to the seven-year projections for **San Luis Rey ES**, the school had a total of 382 TK-5 students in 2019/20. By the end of the projections (Fall 2026), the attendance area may have a total of about 269 TK-5 resident students. A possible decline of about -112 resident students. In reviewing the Elementary Attendance Matrix, the school had a total of 256 students enrolled in Fall 2019. Of the 256 enrolled students, 191 actually resided within the attendance area. San Luis Rey ES had 49 TK-5 transfer students of which two live outside the district boundaries and a total open enrollment of 19.1%.

According to the seven-year projections for the **Santa Margarita ES** attendance area, the school had a total of 364 TK-5 students in Fall 2019/20. By the end of the projections (Fall 2026), the attendance area may have a total of about 294 TK-5 resident students. In reviewing the Elementary Attendance Matrix, the school had a total of 509 students enrolled in Fall 2019. Of the 509 enrolled students, 305 actually resided within the attendance area. Santa Margarita ES had 141 TK-5 transfer students with 9 out of district students and an open enrollment of 27.7%.

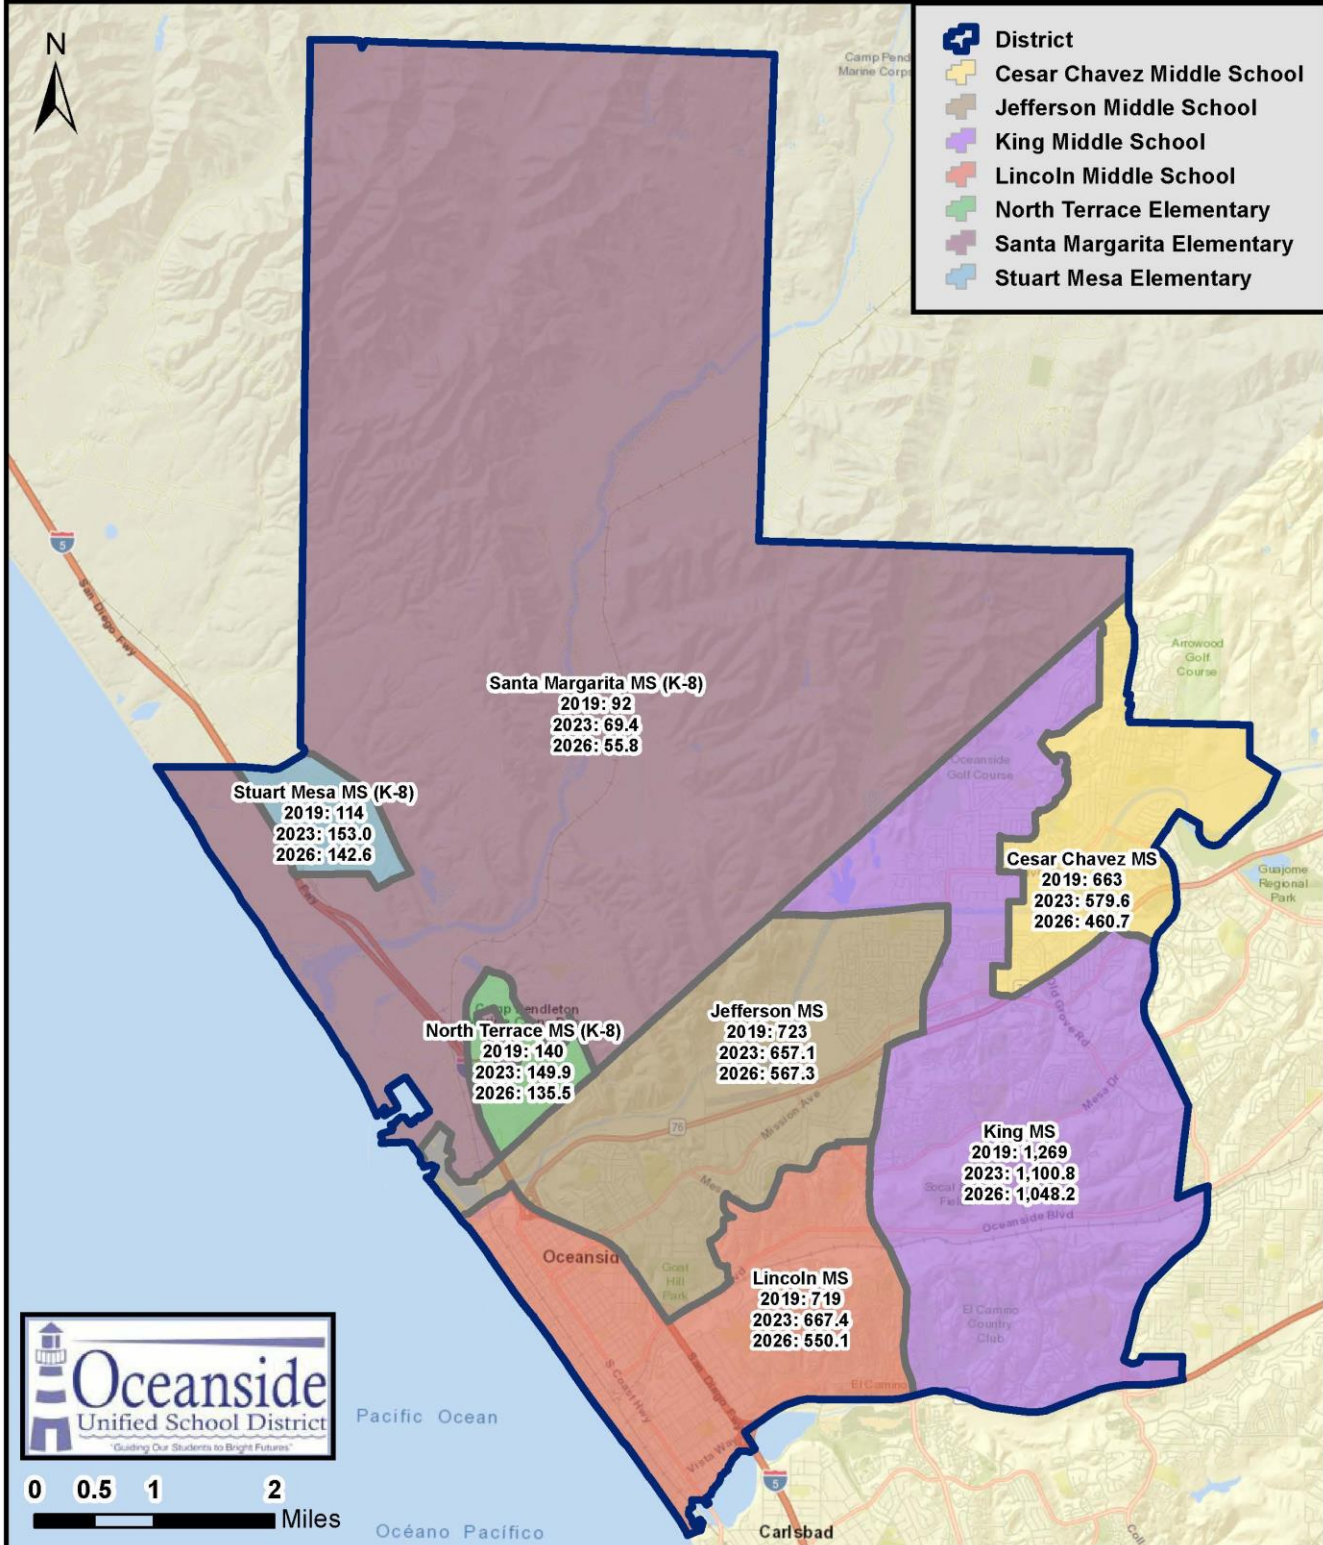

According to the seven year projections for **South Oceanside ES**, the school had a total of 554 TK-5 students in Fall 2019/20. By the end of the projections (Fall 2026), the attendance area may have a total of about 380 TK-5 resident students. In reviewing the Elementary Attendance Matrix, the school had a total of 606 students enrolled in Fall 2019. Of the 606 enrolled students, 403 actually resided within the attendance area. South Oceanside ES had 203 TK-5 transfer students with 5 out of district students and an open enrollment of 33.5%.

According to the seven year projections for **Stuart Mesa ES**, the school had a total of 425 TK-5 students in Fall 2019/20. By the end of the projections (Fall 2026), the attendance area may have a total of about 340 TK-5 resident students. In reviewing the Elementary Attendance Matrix, the school had a total of 398 students enrolled in Fall 2019. Of the 398 enrolled students, 314 actually resided within the elementary school attendance area. Stuart Mesa ES had 29 TK-5 transfer students with 7 out of district students including one TK. Stuart Mesa ES had an open enrollment of 7.3%, the lowest open enrollment in the District.

Middle School Attendance Area Student Population Projection Trends

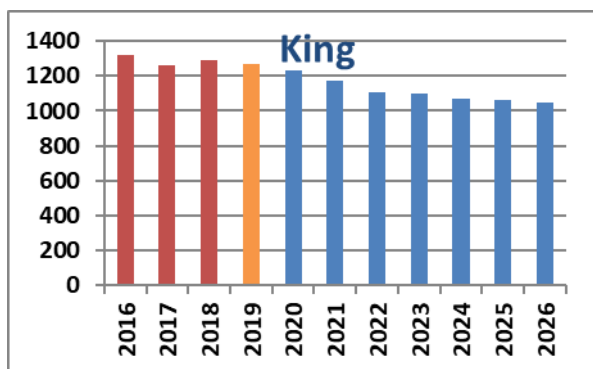

According to the District Wide Student Population Projections, in the Fall 2019 there were a total of 3,857 6-8 students enrolled in the district. The overall middle school (grade 6-8) students are projected to decline throughout the projection timeframe to about 3,069 by the end of the seven-year projection in fall 2026, a possible decline of about -787 resident students.

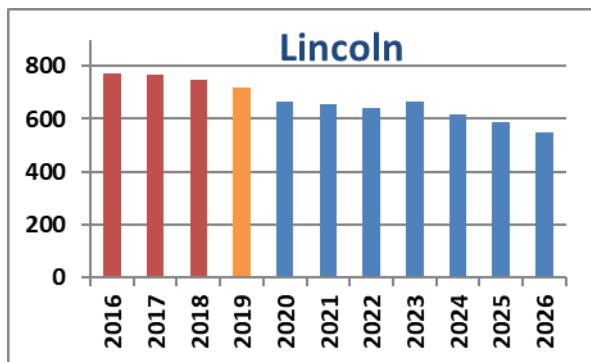

According to the seven year projections for **Cesar Chavez MS**, the school had a total of 663 6-8 students in 2019/20 school year. By the end of projections (Fall 2026), the attendance area may have a total of about 460 6-8 resident students. In reviewing the Middle Attendance Matrix, the school had a total of 690 students enrolled in Fall 2019. Of the 690 enrolled students, 565 resident students actually attended the school. Cesar Chavez MS had 124 transfer students (21 are from outside the district, 3 are Special Ed out of district students) and an open enrollment of 18.0%.

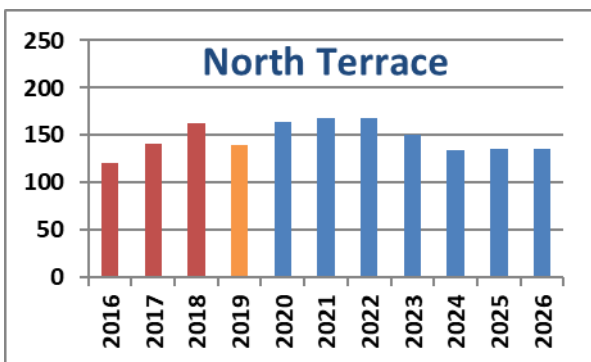

In the 2019/20 school year, the **Jefferson MS** attendance area had a total of 723 6-8 resident students. Jefferson MS is projected to see an decline over the projection timeframe. By 2026 the area may have around 567 potential resident 6-8 grade students. According to the Middle Attendance Matrix, Jefferson MS had a total of 537 6-8 students enrolled, of the 537 students enrolled, 81 were transfer students. The attendance area has an open enrollment of 15.1% with 2 students attending the school from outside the district.

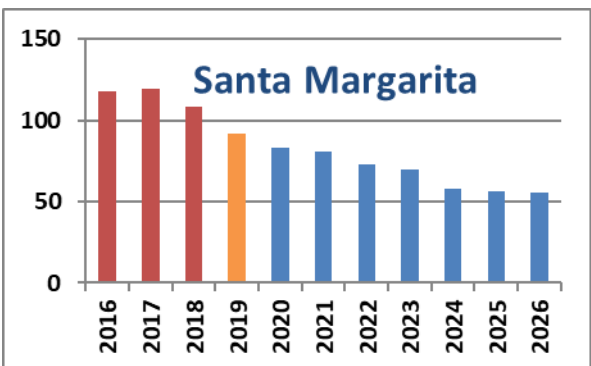

King MS attendance area had a total of 1,269 6-8 resident students living within the attendance area in Fall 2019. According to the projections, the projected 6-8 resident students may decrease over the projection timeframe. By the end of the projections (Fall 2026) King MS is projected to have about 1,048 6-8 resident students. According to the Middle Attendance Matrix, the school had a total of 1,377 6-8 students enrolled in Fall 2019, and had a total of 237 transfer students with 58 from outside of the district and 6 are Special Ed out of district students. King MS had an open enrollment of 17.2%.

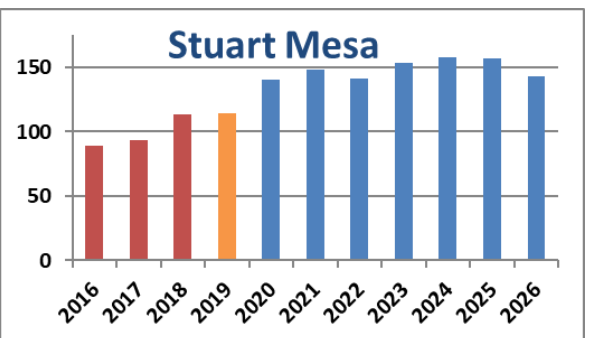

According to the seven year projections for **Lincoln MS**, the school had a total of 719 6-8 students in 2019/20 school year. Lincoln MS is projected to decrease over the projection timeframe to a possible 550 potential 6-8 students by 2026. In reviewing the Middle School Attendance Matrix, the school had a total of 840 students enrolled in 2019. Of the 840 enrolled students, 625 residents actually attended the school. Lincoln MS had 215 6-8 transfer students, 26 from outside the district and 4 are Special Ed out of district students. Lincoln MS had an open enrollment of 25.6%.

In the Fall 2019/20 school year, the **North Terrace Community School** attendance area had a total of 140 6-8 resident students. The projections indicate a slight increase in the 6-8 student population may occur bringing the total potential students to 168 by 2022 and then decline to about 135 resident students by 2026. According to the Middle School Attendance Matrix, North Terrace had a total of 190 6-8 students enrolled, of the 190 students enrolled 56 were transfer students with the majority coming from other schools and 8 students from outside the district and 3 are Special Ed out of district students resulting with an open enrollment of 29.5%, the highest in the District.

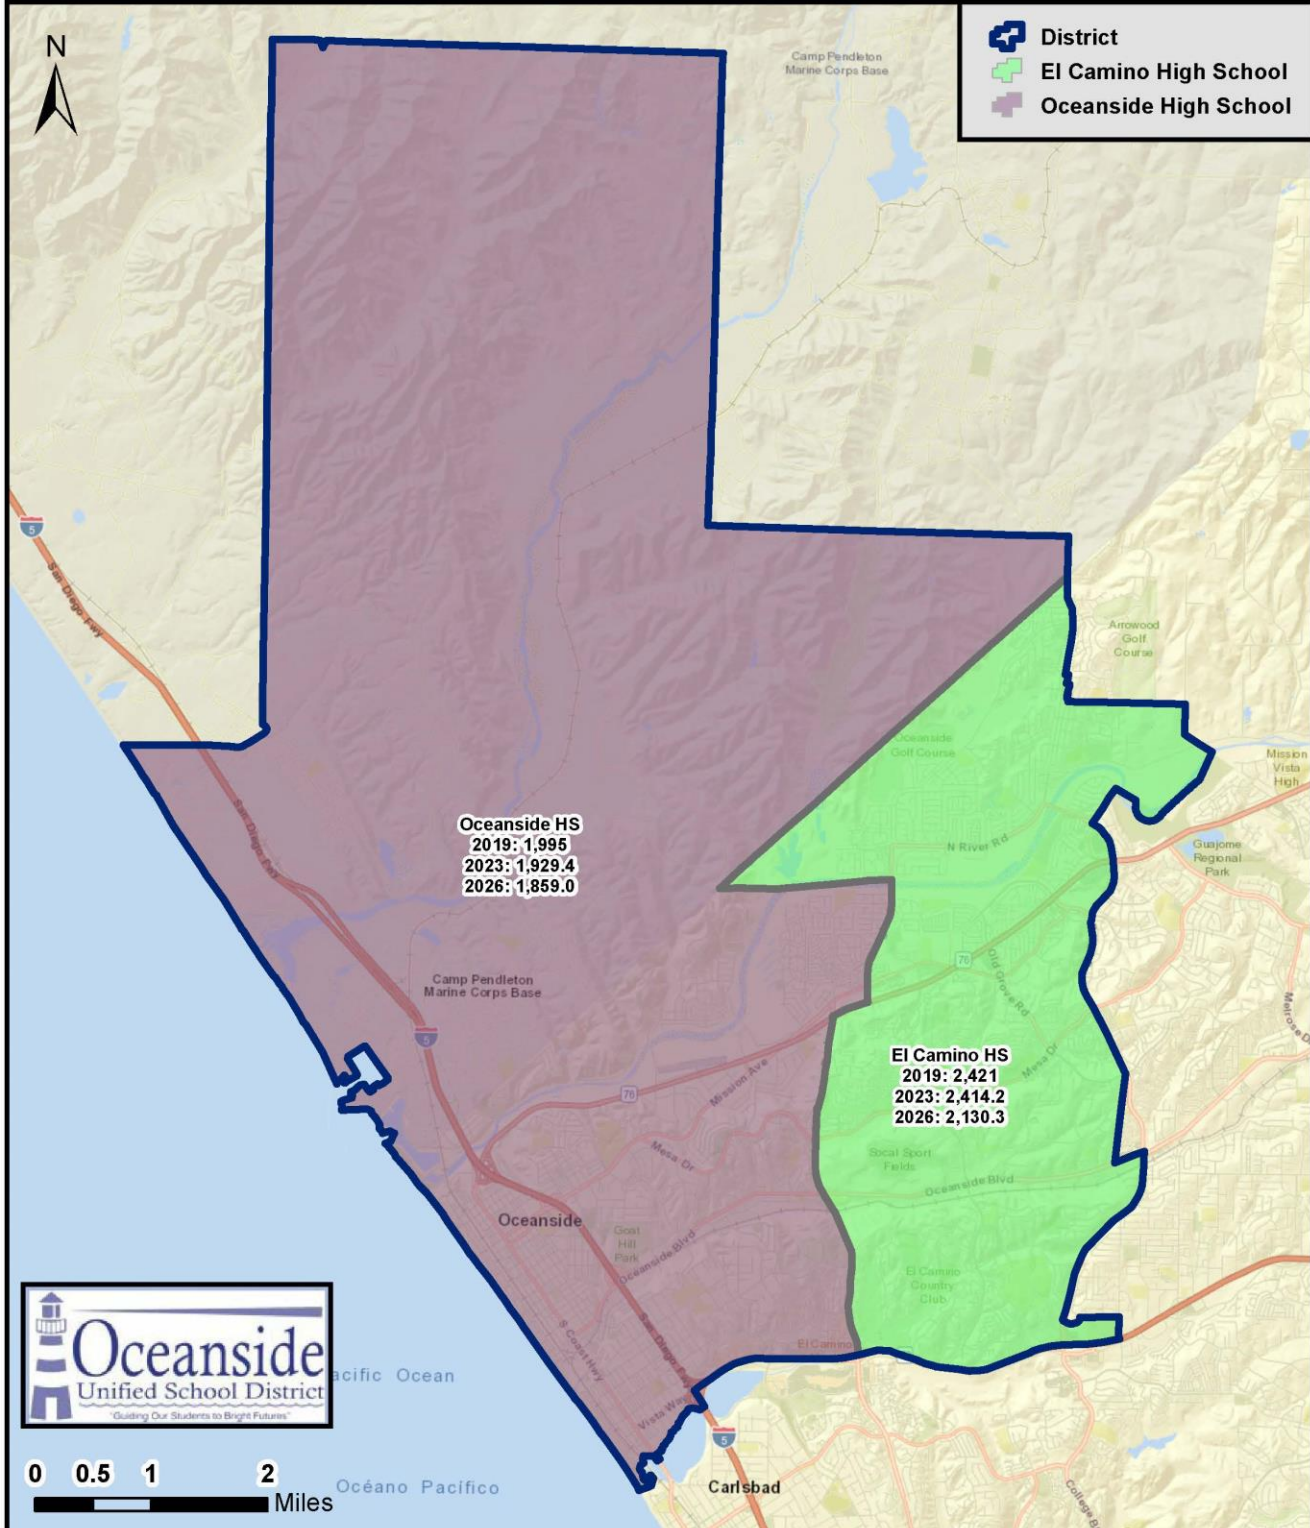

According to the seven year projections for **Santa Margarita Community School**, the school had a total of 92 6-8 students in 2019/20 school year. By the end of projections (Fall 2026), the attendance area may have a total of about 56 6-8 resident students. In reviewing the Middle Attendance Matrix, the school had a total of 105 students enrolled in Fall 2019. Of the 105 enrolled students, 85 actually resided with the schools attendance area. Santa Margarita Community School had 20 transfer students (2 are from outside the district). Santa Margarita CS had an open enrollment of 19.0%

Stuart Mesa Community School attendance area had a total of 114 6-8 resident students living within the attendance area in Fall 2019. According to the projections, the projected 6-8 resident students may increase over the projection timeframe. By the end of the projections (Fall 2026) Stuart Mesa Community School is projected to have about 142 6-8 resident students. According to the Middle Attendance Matrix, the school had a total of 118 6-8 students enrolled in Fall 2019, and had a total of 12 transfer students. Stuart Mesa CS had an open enrollment of 10.2%.

High School Attendance Area Student Population Projection Trends

According to the District Wide Student Population Projections, in the Fall 2019 there were a total of 4,678 9-12 students enrolled in the district. The overall high school (grade 9-12) students are projected to decline throughout the projection timeframe to about 4,226 students by the end of the seven-year projection in fall 2026.

The **El Camino HS** attendance area is expected to decline over the next 7 years possibly declining by about 290 students. Resident student population may decline through the projection timeframe possibly due to a decline in residential development. There are several projects throughout the district that have remained dormant after the recession and have not yet been reinstated. According to the Attendance Matrix, El Camino HS had 2,633 enrolled high school students and a transfer rate of 16.1%. El Camino had 424 transfer students with 148 of those students from outside the district and 16 Special Ed out of district students.

In reviewing the projections, in 2019, the **Oceanside HS** attendance area school had a total of 1,995 9-12 resident students. By the end of the projection (Fall 2026), the high school area may have about 1,859 9-12 resident students living within the attendance area. The projected decline will begin in 2023. According to the High School Attendance Matrix, Fall 2019, the school had a total of 1,924 9-12 enrolled students. The school had a total of 254 transfer students (82 from outside the district and 5 Special Ed out of district students) and an open enrollment of 13.2%. Decline may be attributed to a decline in high school student population off the base.
