RADAR Tasking and Archive User Guide

DEFENCE AND SPACE

Version 01.00 – May 2022

With the integration of the **RADAR Tasking and Archive** services (RADAR Portal) into our **OneAtlas** capabilities, Airbus is providing online **access to radar tasking and archive**.

The RADAR Tasking and Archive services are managed by an easy-to-use online interface that allows users **24/7 access** to directly **task the radar satellites** to acquire new radar data and/or access the comprehensive 15-year **radar archive**.

Airbus' Radar Constellation sensors offer 6 acquisition modes that range from 25cm to 40m in resolution with image swaths up to 270km.

Radar satellites provide weather and daylight-independent data collections that can be used to support image intelligence over sensitive areas, maritime surveillance, object and change detection, mapping, subsidence monitoring, and much more.

For related technical and supporting documents, please see the link included in the last page of this document.

**Radar Tasking & Archive**

Tasking our Radar satellites and receiving the imagery you requested has just become easy.

New! Access the Radar Tasking & Archive service and benefit from our brand new intuitive interface, enabling you to task our Radar satellites in just a few simple steps.

**Key Benefits**

- Best choice for maximizing the success of your collection campaign
- Streamlined offer to ease the ordering process and allow 24/7 tasking access
- Access to our Multi-resolution and -scale Radar Acquisition Modes supporting extensive maritime coverage to image interpretation close to optical
- An industry-leading acquisition success rate, for reliable and timely decision-making
- Weather and daylight independent data collections

**Key Features**

- Easy and intuitive acquisition planning and ordering tool
- Access to versatile and flexible Radar sensors with 6 Acquisition Modes: (from up to 25cm res. to 40m res. and up to 270km swath)
- Choice between 4 different Data Processing Levels
- Comprehensive 15 year Radar Archive (coming soon)

New to Radar imagery? See our [Free Sample Data](#) to give it a try.

Looking for more technical information on polarization modes, processing parameters download options and more? [See our technical resources here.](#)

## ‘Getting started’

The following slides shall serve as a **guideline for our RADAR Tasking and Archive (RADAR Portal) users, explaining the basic Tasking/Ordering procedure.**

Please also see our **Tasking/Ordering Video Tutorial**, explaining the simple order procedure (*for a Link – please see ‘Additional Information’ slide at the end of this document*).

Please note that an **additional ‘text only’** user guide is also embedded in the RADAR Portal. It is available by clicking the **‘Getting started’** button in the navigation bar.

# RADAR Tasking and Archive

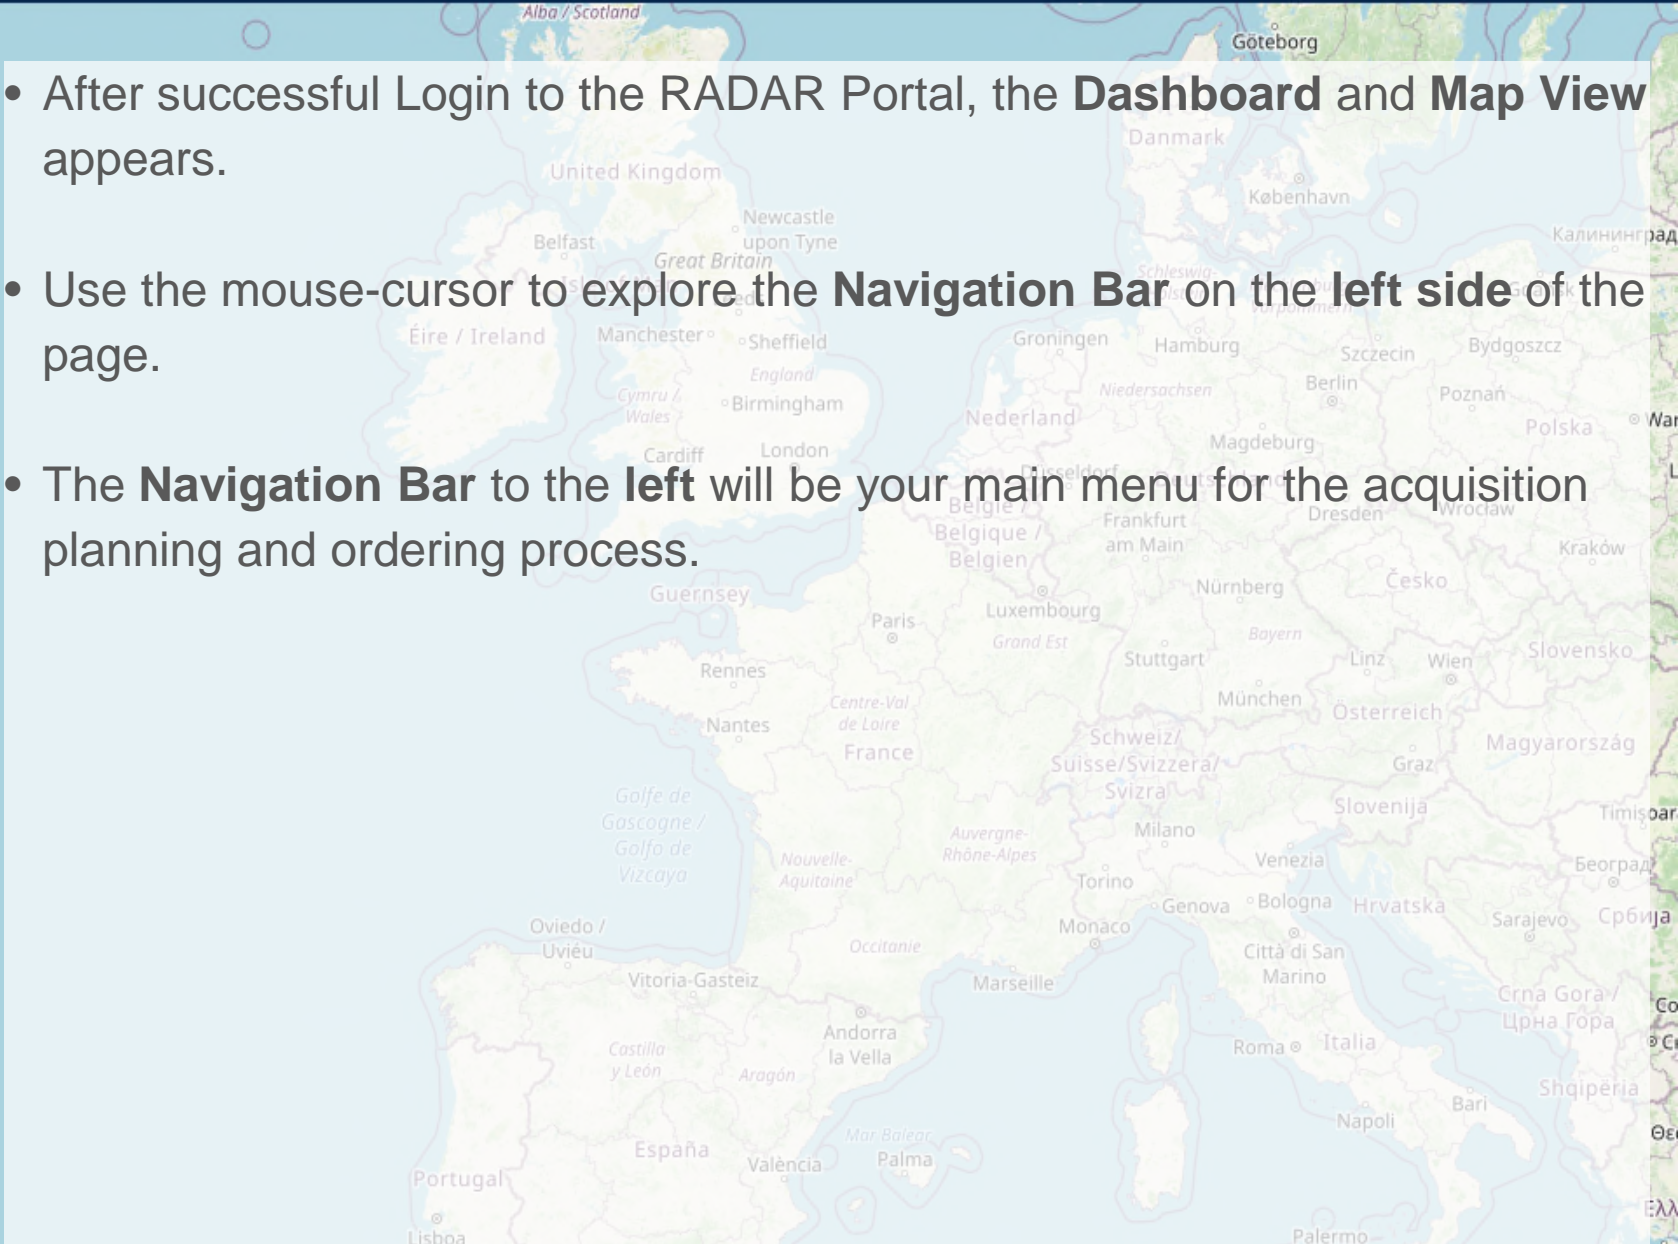

## ‘Getting started’

- After successful Login to the RADAR Portal, the **Dashboard** and **Map View** appears.
- Use the mouse-cursor to explore the **Navigation Bar** on the **left side** of the page.
- The **Navigation Bar** to the **left** will be your main menu for the acquisition planning and ordering process.

- Once familiar with the dashboard, the acquisition planning starts with the **selection** of your **AOI**.
- Move the cursor to the Navigation Bar on the left and click on the **Draw** button.
- **Select either Polygon or Bounding Box or Point** as your preferred AOI shape.
- Move to the Map and **navigate/zoom towards** your desired **area**.
- Use the cursor to **draw the AOI**.
- Once done, either double-click placing the last point or click the first one you placed. Corners can be moved by dragging and deleted by clicking them while keeping the Alt key pressed. You can insert additional points by dragging away from the edges of the AOI.
- You can remove the AOI with the delete button.

- As an alternative to drawing an AOI, you can **import** your **AOI** as a file instead (GeoJSON, KML, KMZ and zipped Shapefiles).
- Move the cursor to the Navigation Bar on the left and click on **Import AOI**.
- A **window** opens allowing you to **select** your **AOI file**.
- Klick **Open** to import your AOI into the Map.
- Alternatively, you can import an AOI by dragging it onto the map.
- If needed, adjust the Map View (zoom in/out) for full display of your AOI.
- Note: The AOIs are currently limited to a maximum of 100.000 points.
- You can remove the AOI with the delete button.
