Uncategorized One of the most important and much discussed features of SEO in 2017 is how to write the meta title and meta description tags. This is important because people read these tags in order to get information about the site they're visiting. If you don't have a good meta title and meta description, you will not get any traffic. Here are some things you should be thinking about when writing meta title and meta description tags. Copy these meta title and meta description tags into your page. This is where a lot of people make a mistake. They think that their keyword is going to show up in a tag like SEO powered by CopyScape.net, but instead they just write the word SEO in the title or something like that. But that's not the case. The title of your page is not what is going to appear in the title tag of your HTML. That's the title of your page that is visible on your page when people use the mouse to roll over the link. What you want to do is make the title of your page say “The best SEO tips you need to know” or “SEO Tips” or something like that. And you want to make sure to put that first in your title tag. Here is an example of a page I have right now. As you can see, you can make it say whatever you want in the title tag. Now, what about the meta description? The meta description is the tag that is displayed underneath the title tag in the search results. If you don't have a meta description, that is not going to show in the results of the search engines. That means that you are not going to get any visitors from Google or Yahoo or Bing. But again, that's not going to happen if you don't write a good meta description. What's important about the

Jul 18, 2020 Anti-virus software doesn't detect the virus, but Norton's latest version tells us it has. It says it has removed the virus, but the message that appears again after 30 minutes shows that the virus is still active. Jul 19, 2020 Anti-virus software tells us the virus has been removed. Jul 20, 2020 Anti-virus software tells us it has removed the virus and that the virus is not back again. Jul 22, 2020 Anti-virus software says the virus is not active.
