

MAKE YOUR OWN MUSICAL INSTRUMENTS

Shofar horn. (Similar to the horns that Joshua might have used!)

Gather 3 toilet paper rolls per horn, a party horn, masking tape, glue, paint brush, scissors and white and brown paint.

Cut all they way across one roll lengthwise.

Remove fringe or cardboard from the party horn so you are only left with the plastic noise maker. Wrap the cut cardboard tube around the plastic noisemaker.

Fasten cardboard to plastic noisemaker securely with masking tape.

With the other two rolls fold the edge to make a pleat in the bottom side. You are making the bottom small enough to fit inside another roll. This will give the Shofar a nice curve.

Place the tubes inside each other.

Wrap the toilet paper rolls with masking tape. (Or you can use papier mache but this is messier!)

Paint with white paint

Finished! Now you can play your horn and make some noise!

Drums

All you need to create your own drums are some old tin cans, balloons, scissors, and some tape.

Cut the nozzle off the balloons and stretch them around the can. You can double layer the balloons for durability and cut the top layer for a fun effect.

Tape them in place, and you are ready to make music!
