

It rained for Forty Days on Noah and his family!

Why don't you try some of these experiments with water!

1. Opening Lily pads

Draw some flowers, colour them and cut them out

Fold in the petals

Float them carefully on the water and watch them open!

2.Magic water bag

Fill a sealable bag with water

Get an adult to hold the bag and then pierce it with DRY kebab sticks. The bag shouldn't leak until you take the sticks out!

3. Try dropping some grapes into a bottle of fizz and see them jump up and down.

4. Try the M and M experiment that we did for Pentecost (it is on the website) to remind you of the rainbow that God sent as a promise to Noah.
