Number of Non-Hunter Guests:

Your Dates:

Namibia is one of Africa's safest countries. There aren't any geopolitical issues, and there is an excellent understanding between the different ethnic groups. No vaccines are required and direct flights to **Windhoek**, the capital, fly-off on a daily basis.

The **35,000 hectares** - over 86,000 acres - wide hunting grounds are of a breathtaking beauty, with its tremendous spaces, endless horizons, its unspoiled and wild beaches, grand valleys, wavy dunes... This zone is part of the **Kalahari white sands**, covered by trees and forests on vast grasslands and shrubby savane. The animals there are in immense amounts. Namibia is truly a space of liberty and nature. You will come back with vivid memories of beautiful colors and fascinating sceneries.

In general, the hunting season stretches from **March** until **October**. Our partner does not receive numerous hunters at once and prevents animals that have not reached maturity from being removed, and still 70% of the trophies are qualifiable for a **gold medal**.

You will be received in an architecturally unique and comfortable **Lodge**. The owner is an architect who designed and built it. It is all **luxury and comfort**.

We also propose special stays for « novice » hunters and the culling hunt devotees.
