

A view into your energy bills, providing clear visibility into your energy consumption enabling the use of actionable data to drive the best possible energy-related decisions. Using our advanced technology, your energy billing data is loaded into the Aview platform to provide a straightforward and convenient view of your entire energy portfolio. This data supplies each of the functions and features within Aview, allowing you to quickly understand what is happening at each of your facilities. Additionally, all energy contracts are collected on the Aview platform, giving your business a central location for all existing supplier contracts, allowing easy access with the click of a button.

The Benefits of Having Aview

Data Management

Provides a one-stop destination for all energy bill and contract data. This allows for improved budgeting and strategic planning with future contracts.

Benchmarking

Establish a baseline for future energy consumption by comparing usage and other data points for all properties in your portfolio.

Continuous Monitoring

Using real-time information, an easy to navigate user interface, and simple to understand visuals, you will always be well-informed with your facilities.

Increased Efficiency

Save time and money by eliminating tedious tasks associated with gathering and managing utility bills.

Sustainability

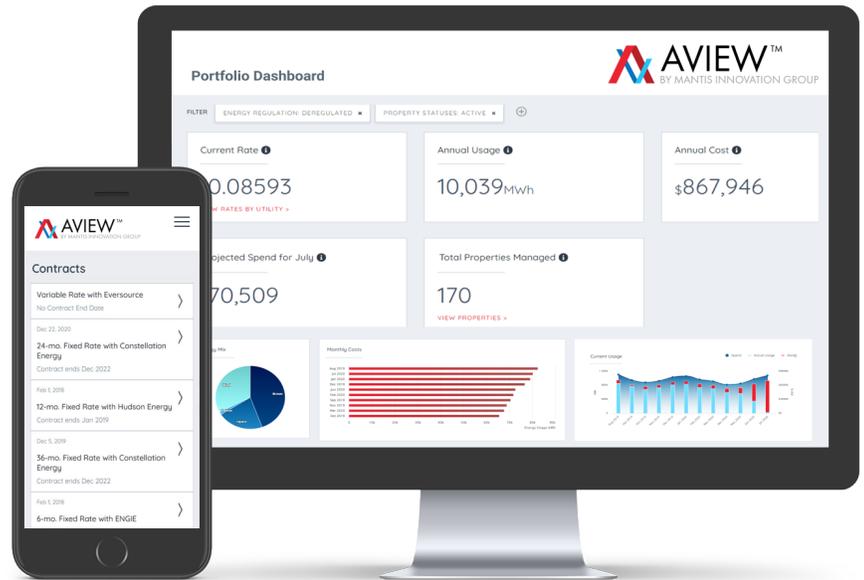

Clearly distinguish the percentage within your portfolio that is Green Energy vs. Brown Energy. Illuminate which properties are using the most energy to identify potential efficiency improvements.

Simplicity

Get the information you need, when you need it. The cloud based platform is easy to set up and access on any device. Aview utilizes artificial intelligence (AI) to gather billing data seamlessly.

Scalable

Easily add additional properties, utilities, and meters.

Schedule a demo today and find out why energy users are turning to Aview!

About Mantis Innovation Group

Mantis Innovation Group is a national leader in energy consulting and facility asset management. Through its portfolio of companies, Mantis provides insightful energy procurement and facility asset management programs that empower clients to make data-driven decisions that can significantly reduce costs while simultaneously improving the performance of their roof, walls, pavement, and sustainability initiatives.
