

## Energy Efficiency Solutions

Through our trusted vendors, we offer turnkey projects consisting of a variety of energy conservation measures (ECMs) that will cut your business's electric and/or gas usage. Many of these measures range from lighting upgrades, to mechanical controls, to replacing inefficient or end of life capital equipment. These are simple solutions that will not only reduce your usage, saving you money on your electric and/or gas bills, but will also improve facility environment and production. Our vendors can apply for incentives on your behalf as well as identify financing opportunities for your project, where it may be possible to obtain incentives totaling up to 80% of the project cost.

## How do I know what energy conservation measures will be best for my business?

Our technical sales engineers will initially ask you questions about your current lights and fixtures, heating and cooling system, and any existing controls on your units. They will then be able to gauge what is best for your business, get an understanding of your interests, and then have a vendor that suits your needs conduct an energy walkthrough/audit.

## Energy Conservation Measures

Sample list of the many ECMs we offer

-  Lighting and Controls (Interior and Exterior)
-  HVAC Controls
-  Replacement or Retrofit of Capital Equipment (Boilers, Roof Top Units, Chillers, etc.)
-  Kitchen Hood Controls
-  Refrigeration and Freezer Controls
-  EMS (Energy Management System)
-  Combined Heat and Power/Cogeneration
-  Oil to Natural Gas Conversion
-  Energy Efficient Motors
-  Retro-Commissioning (RCx)
-  Steam Trap Repair and Replacement
-  Insulation
