Shendoku is the natural evolution of SuDoku. Where Sudoku is a puzzle - Shendoku is a fun game. Where SuDoku is a lone quest, Shendoku allows two Sudoku addicts to play together in a challenging fashion - not in isolation. Unlike many so called SuDoku games, this is NOT two people sharing a single puzzle grid with different coloured pens, nor is it A SuDoku puzzle pretending to be a multi-player game. Shendoku is to Sudoku, what Poker is to Solitaire. This book is out introductory offering, look out for the board game, web game, and other developments for PC, cellphones and possibly even on TV.
