

Design at the Speed of Imagination

Just in Time for the Holidays

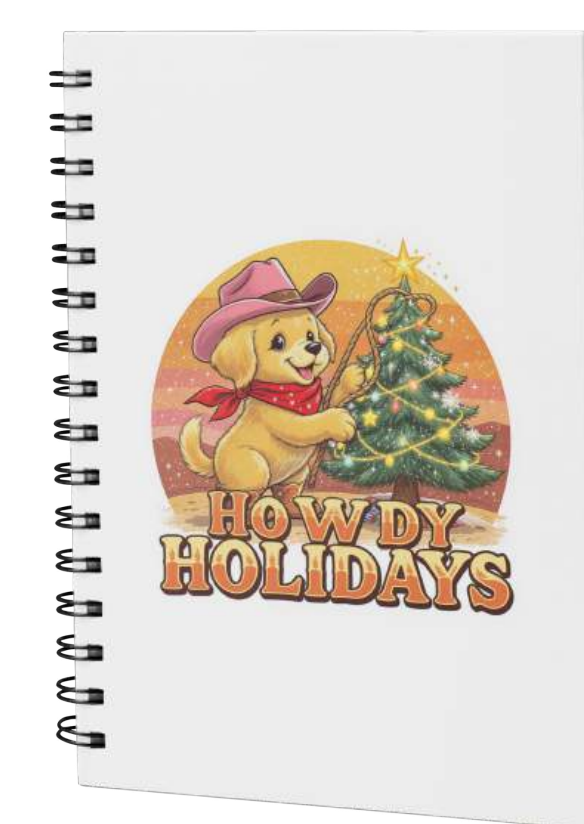

one design on
multiple products

A smarter way to create and sell personalized products

In the world of personalized e-commerce, speed is everything. But with traditional design workflows, bringing a single product idea to life can take hours — if not days.

Masterpiece AI changes that

Now, your team can go from idea to print-ready product in under a minute. Whether you're launching one design or one thousand, Masterpiece AI helps you scale with zero design bottlenecks.

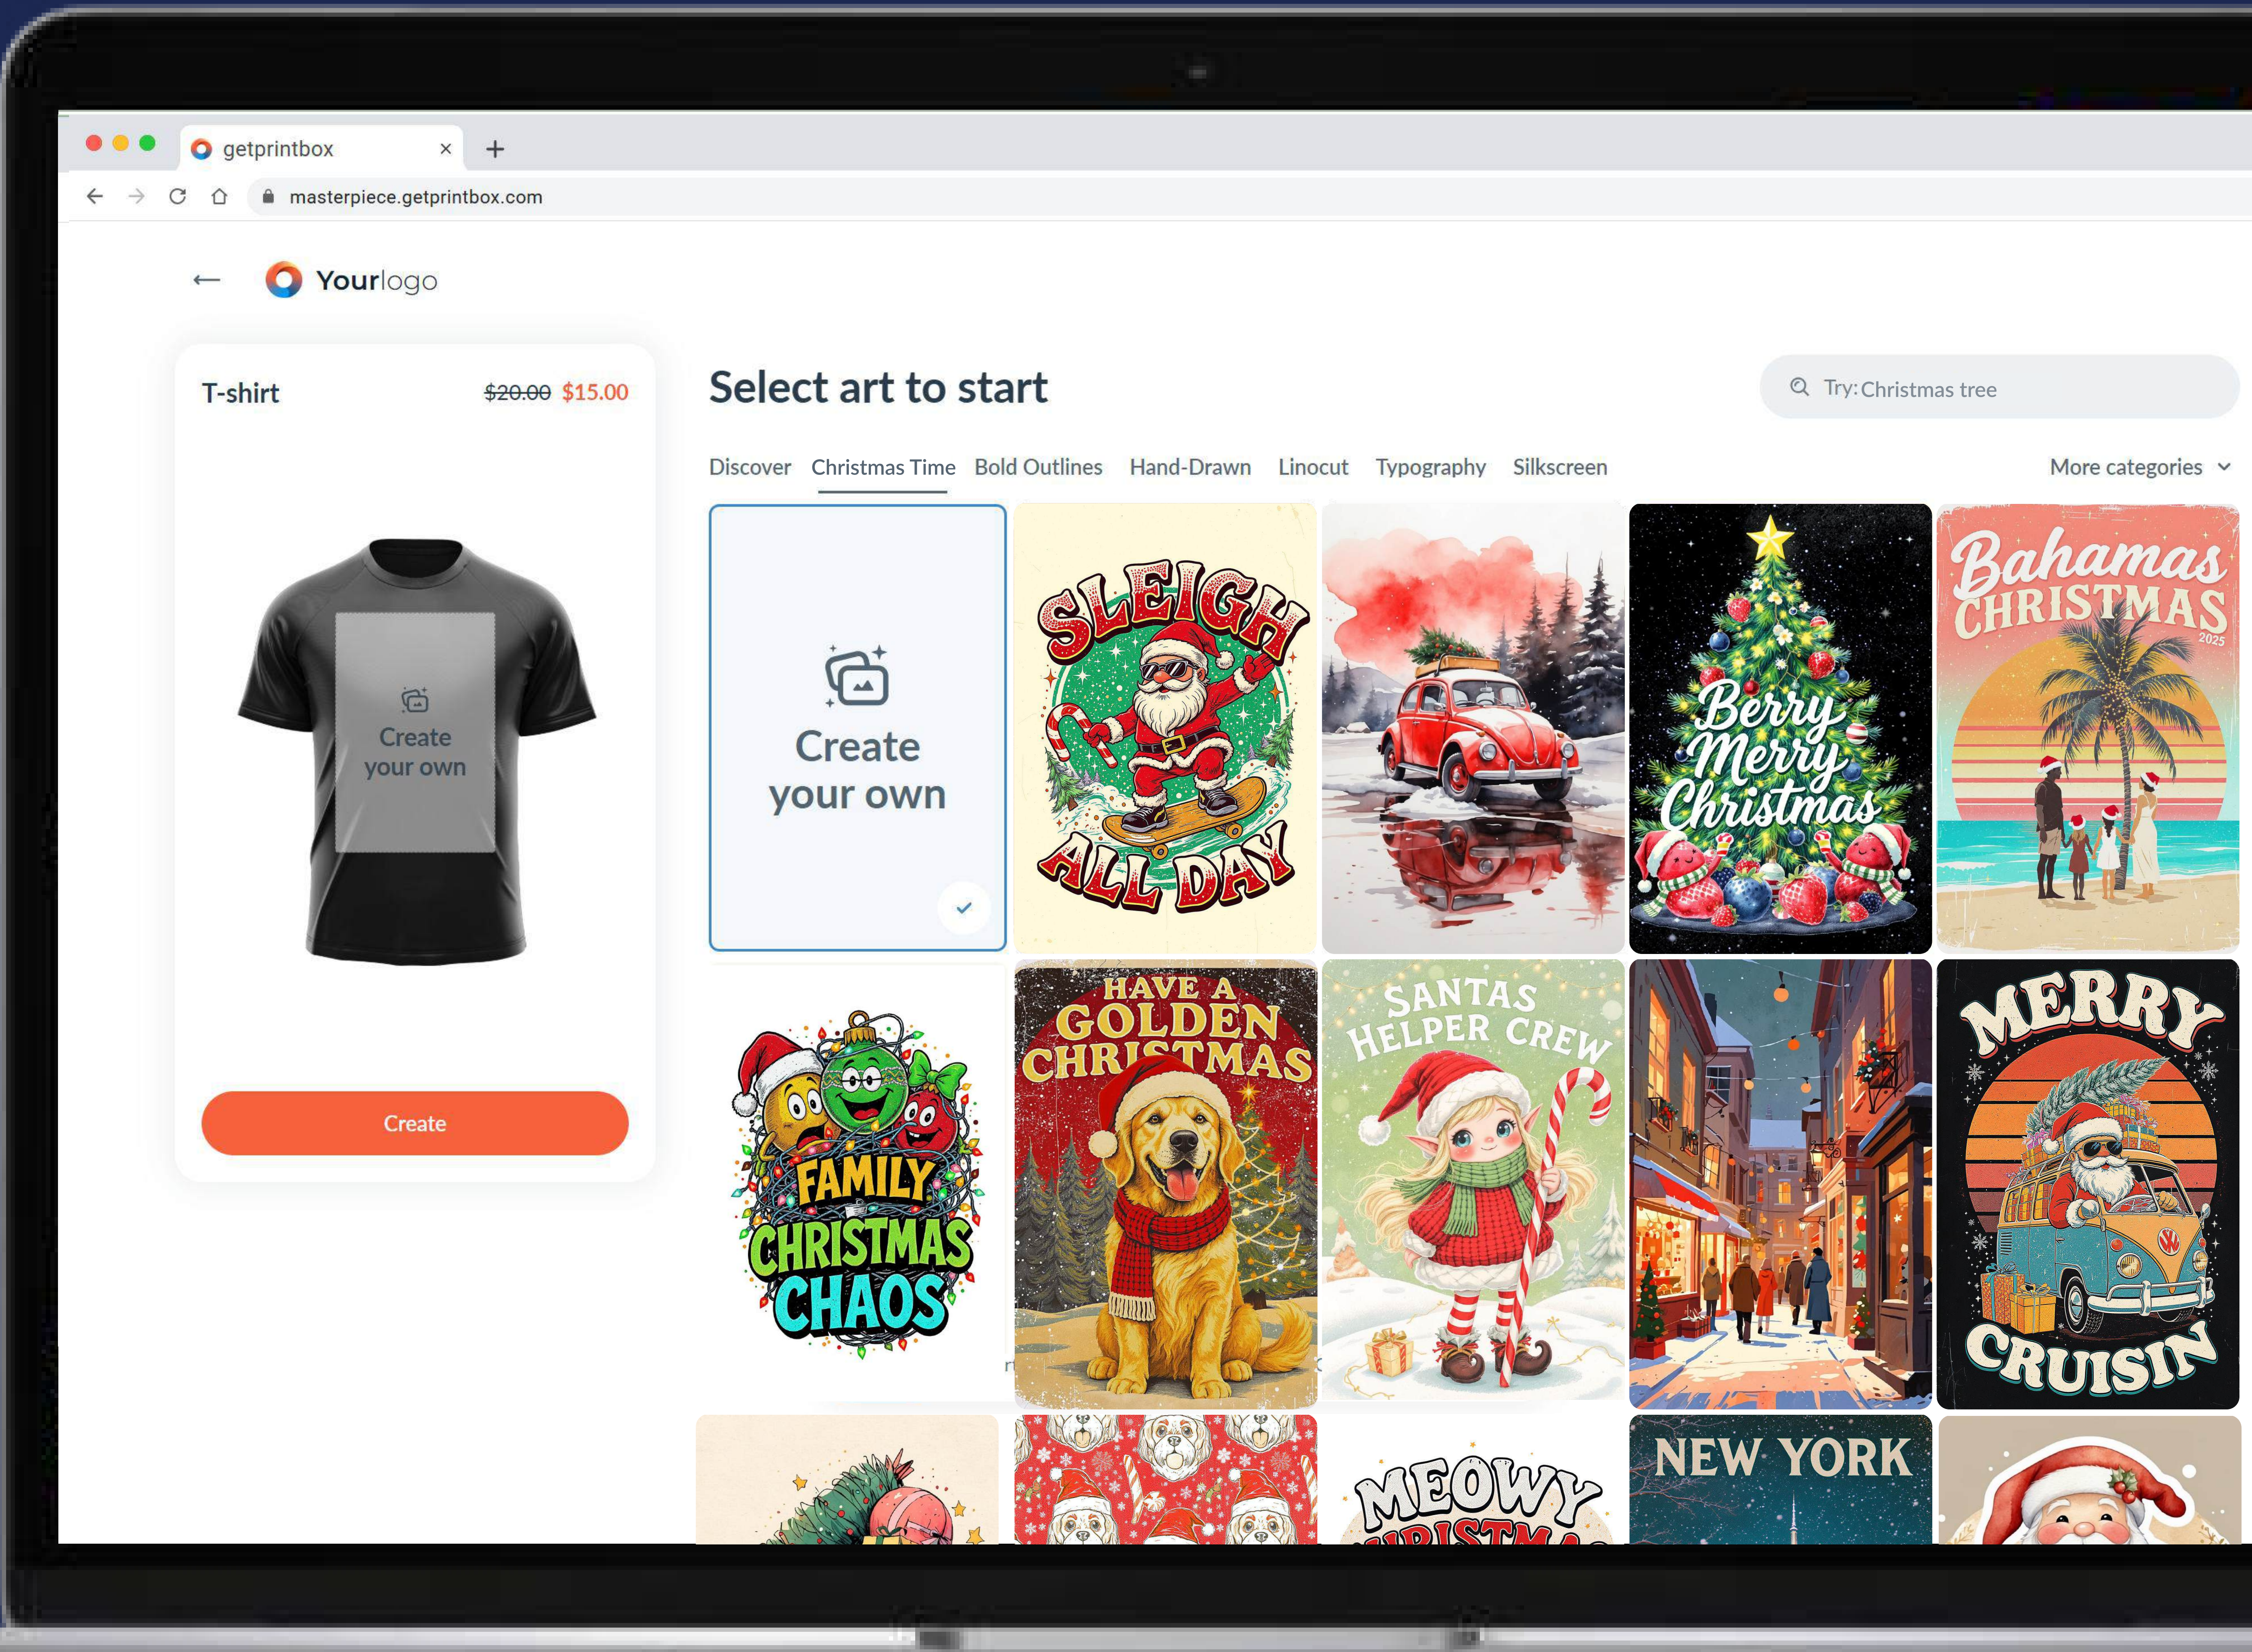

Let the Creativity Scale Itself

Why limit your catalog to what your team can manually design? Masterpiece AI unlocks a self-service model where customers co-create personalized products, while your team stays focused.

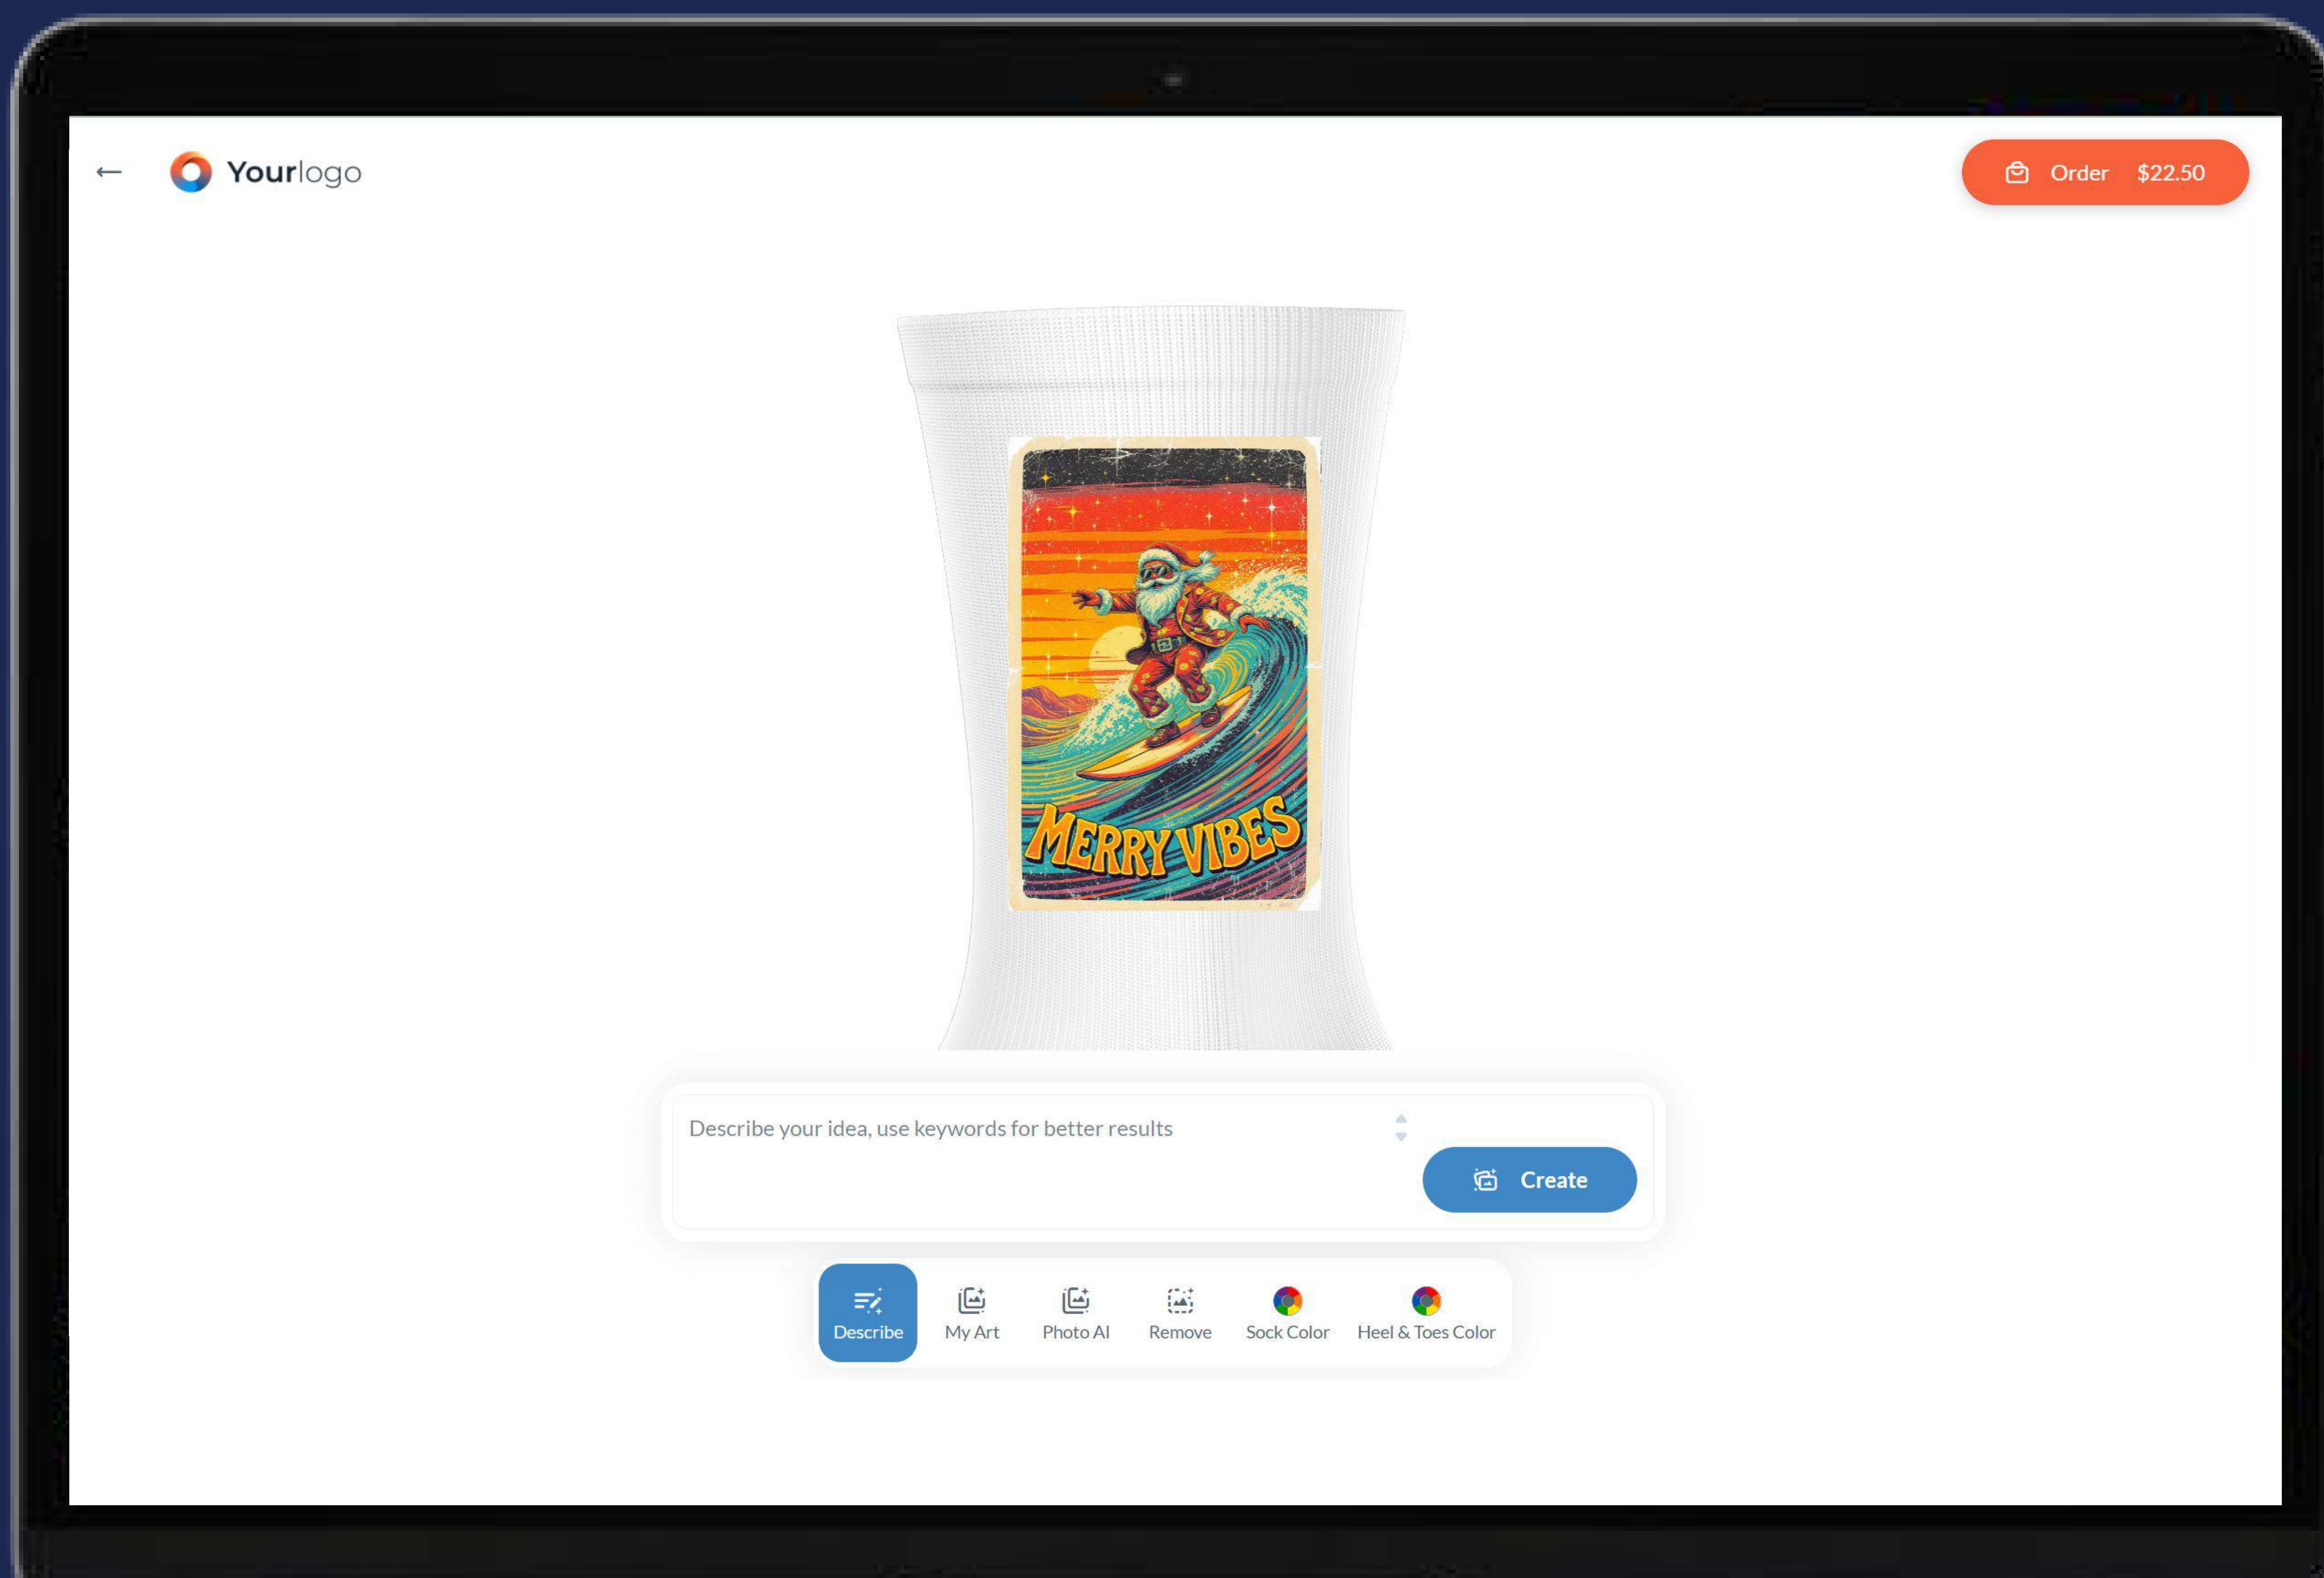

No idea? No problem

The built-in **Gallery of Inspiration** gives your customers instant access to a rich collection of visuals and design elements. Whether they're creating from scratch or customizing a template, they can explore, mix, and personalize designs in just a few clicks.

Traditional Design Workflow

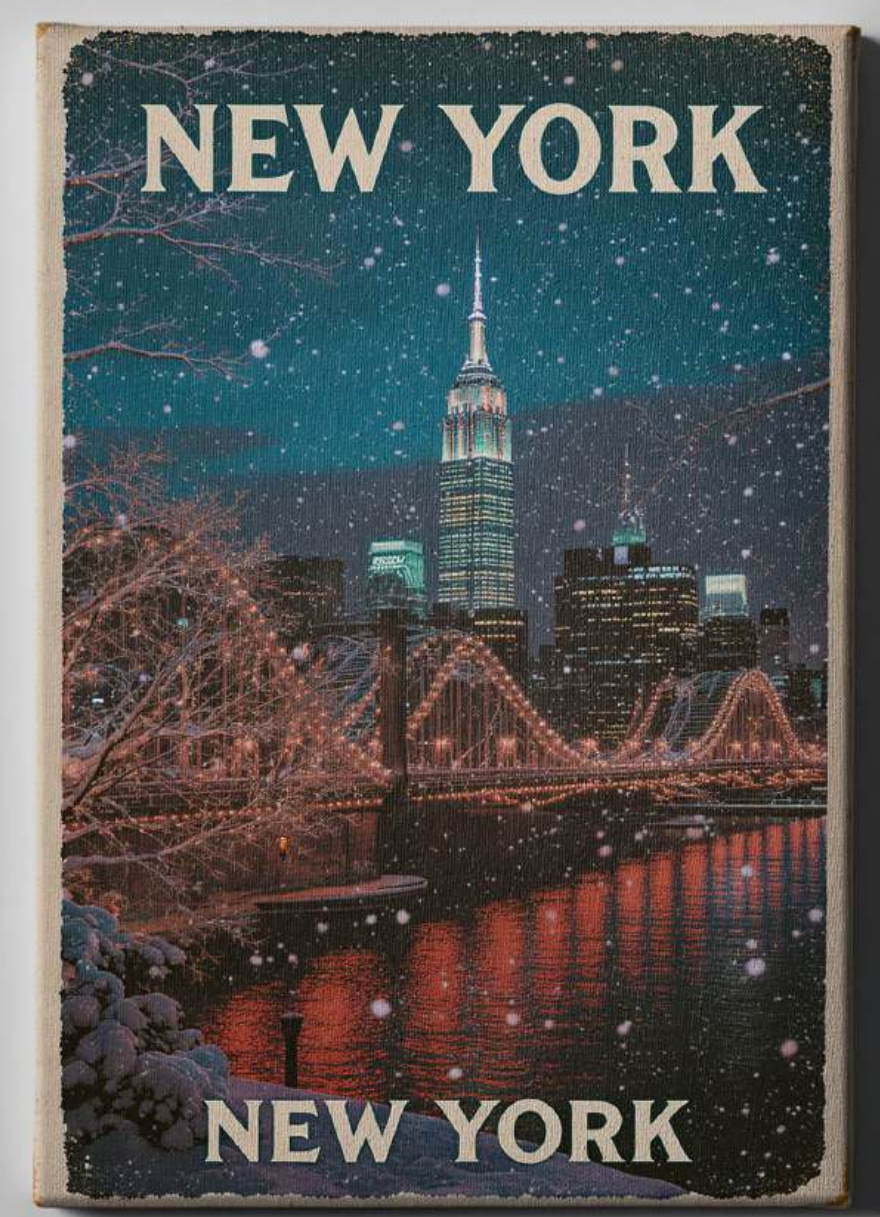

- Internal design brief
- Manual mockups
- Revisions and approvals
- File exports
- Product listing
- Repeat for each SKU

Time per product: 24+ hours

Masterpiece AI Workflow

- Your customer enters a simple prompt or chooses from an inspiration gallery
- Multiple design options are generated instantly
- They pick their favorite
- A print-ready file is auto-created

Time per product: < 1 minute

Effortless Personalization That Converts

Your customers want something that feels personal and now, you can give it to them without increasing your workload.

Masterpiece AI makes it incredibly easy to deliver on-demand, design-rich, and uniquely personalized products at scale.

Ready to create, launch, and scale like never before?

Let's talk about how you can use Masterpiece AI to:

- ➡ Speed up your time-to-market
- ➡ Expand your product portfolio
- ➡ Deliver premium personalization
