## Submission points

---

### Point 29.1

#### Support / Support in part / Oppose

Support in part

**Section:** CE - Coastal Environment

**Sub-section:** CE - Coastal Environment

#### Provision

Porirua City's coastal environment is susceptible to a wide range of natural hazards, which are mapped as Coastal Hazard Overlays:

1. Tsunami;
2. Coastal erosion; and
3. Coastal inundation.

### Submission

The current coastal inundation mapped for the Beach Road/Sunset Parade peninsula in Plimmerton does not reflect reality - as I explained during the coastal hazard workshops last year. The prevailing wind and associated storm surge is from the North/Northwest and our property 20 Beach Road has never been affected or even close in the 24 years we have lived here - it has never made it over the road. Basically we are in the lee of the peninsula and the mapping needs to more finitely model actual conditions. The 1m inundation model is inaccurate for the same region. Otherwise we could be on the wrong end of insurance and valuation outcomes.

### Relief sought

Amend the mapping in this vicinity.
