**Subject:** City-Wide District Plan Review - Summary of Submissions and Further Submissions - Hearing Time Allocations

Hello Maria

I hope you are able to assist with my request. If not, can you please forward to the relevant staff for its response?

**Points in submissions**

- The council has produced a summary of submissions, and using certain factors has differentiated my submission into 124 'submission points'.
- The council has not produced a summary of further submissions that would enable my further submissions to be categorised.

**Hearing schedule**

- The hearing panel appointed by the Council has produced a 'draft hearing schedule' based on eight 'hearing topics'.
- The hearing panel has asked submitters to indicate their hearing time requirements.
- Submitters are, apparently, required to determine **themselves** which 'hearing topic' applies to each of their individual 'submission points', and to request time accordingly.

**Corelation between hearing schedule, and my submission and further submission points**

- I know the Council has differentiated my submissions into 124 'submission points'.
- I do not know how many 'further submission points' are raised by my further submissions.
- I do not know which of my 'submission points', and 'further submission points', apply to which of the deemed draft scheduled 'hearing topics'; and,
- Accordingly I'm unable to determine what time I require in which of allotted 'hearing topic' windows, and therefore I'm not currently able to request the time I require.

**Request**

- Given the above, please provide me with the 'hearing topic' applicable to:
  - o each of my 124 submission points (as far as the council's hearing management is concerned); and,
  - o each of my additional further submission points, (as far as the council's hearing management is concerned).
- If this request is met I'll be able to request sufficient time at the appropriate scheduled hearing window.

I look forward to this clarification so I am able to request appropriate hearing appearance time.

Regards

Robyn Smith
