DETAILS OF PROCEDURE/TREATMENT

(Descriptive information about the specific procedure(s)/treatment(s) being performed)

Procedure/Treatment Description
This procedure involves removing a portion or all of the lesion(s) or suspicious tissue(s) of the skin.

Your skin will first be numbed with a local anesthetic. A local anesthetic is a drug causing loss of feeling in the exact area of the biopsy. Your doctor will then use a special surgical knife called a scalpel to remove a portion or all of the suspicious tissue(s). The tissue that is removed will then be sent for further testing.

Your doctor may use stitches to close the wound. Small wounds may be left to heal without stitches. Ointment and a sterile bandage will be placed on your wound.

Diagnosis
Lesion or suspicious tissue in the skin

Benefits of treatment(s) or procedure(s)
This procedure may allow your doctor to find out what is wrong. Knowing what is wrong will allow you and your doctor to plan your treatment.

Reasonable risk / complications of surgical treatment(s) or procedure(s)
* Bleeding.
* Pain, numbness, swelling, weakness, or scarring where tissue is cut.
* The procedure may not cure or relieve your condition or symptoms. They may come back and even worsen.
* Your doctor may not be able to make a proper diagnosis.
* Damage to nerve(s). This may include temporary or permanent pain, numbness, or weakness. This may be discovered during the procedure or later.
* Infection.
* Reaction to local anesthesia or other medicines given during or after the procedure.
* You may need additional tests or treatment.
* Wound infection, poor healing or reopening of the incision(s). Blood or clear fluid can also collect at the wound site(s). Infection may require antibiotics and additional surgery.

Additional Risks Discussed (if applicable):

Alternatives to surgical treatment(s) procedures(s)
* Watching and waiting with your doctor.
* Shave biopsy. This uses a razor-like knife to remove a thin slice of abnormal skin.
* Punch biopsy. This uses a hollow, circular knife to remove a portion or all of the tissue.
* You may choose not to have this procedure.

Prognosis if not treatment is received
If you choose not to have this procedure, your doctor may not be able to find out what is wrong. Your skin condition may get worse. If you have cancer, it may spread or become more difficult to treat later on.

Blood Transfusion (if applicable): Transfusion not expected
