

MEDICAL RECORD	REQUEST FOR ADMINISTRATION OF ANESTHESIA AND FOR PERFORMANCE OF OPERATIONS AND OTHER PROCEDURES
-----------------------	--

A. IDENTIFICATION

1a. (Place 'Y' for YES, 'N' for NO in all applicable boxes)

Y	OPERATION OR PROCEDURE		SEDATION
	ANESTHESIA	N	TRANSFUSION

1b. DESCRIBE
Circumcision
Transfusion not expected

B. STATEMENT OF REQUEST

2. The nature and purpose of the operation or procedure, possible alternative methods of treatment, the risks involved, and the possibility of complications have been fully explained to me. I acknowledge that no guarantees have been made to me concerning the results of the operation or procedure. I understand the nature of the operation or procedure to be (describe operation or procedure in layman's language). **See attached Procedure Detail Sheet**

Which is to be performed by or under the direction of _____.

3. I request the performance of the above-named operation or procedure and of such additional operations or procedures as are found to be necessary or desirable, in the judgment of the professional staff of the below-named medical facility, during the course of the above-named operation or procedure.
4. I request the administration of such anesthesia as may be considered necessary or advisable in the judgment of the professional staff of the below-named medical facility.
5. Exceptions to surgery or anesthesia, if any are: None (If "none", so state)
6. I request the disposal by authorities of the below-named medical facility of any tissues or parts which may be necessary to remove.
7. I understand that photographs and movies may be taken of this operation, and that they may be viewed by various personnel undergoing training or indoctrination at this or other facilities. I consent to the taking of such pictures and observation of the operation by authorized personnel, subject to the following conditions: **Yes**
 - a. The name of the patient and his/her family is not used to identify said pictures.
 - b. Said pictures be used only for purposes for medical/dental study or research.
8. I understand that as indicated a Health Care Industry Representatives or other authorized personnel may be present.

C. SIGNATURES

(Appropriate items in parts A and B must be completed before signing)

9. COUNSELING PHYSICIAN/DENTIST: I have counseled this patient as to the nature of the proposed procedure(s), attendant risks involved, and expected results, as described above. I have also discussed potential problems related to recuperation, possible results of non-treatment, and significant alternative therapies.

(Signature of Counseling Physician/Dentist)

10. PATIENT: I understand the nature of the proposed procedure(s), attendant risks involved, and expected results, as described above, and hereby request such procedure(s) be performed:

(Signature of Witness, excluding members of operating team)

(Signature of Patient)

(Date and Time)

11. SPONSOR OR GUARDIAN: (When patient is a minor or unable to give consent) _____

sponsor/guardian of _____ understand the nature of the proposed procedure(s), attendant risks involved, and expected results, as described above, and hereby request such procedure(s) be performed.

(Signature of Witness, excluding members of operating team)

(Signature of Sponsor or Guardian)

**REQUEST FOR ADMINISTRATION OF ANESTHESIA
AND FOR PERFORMANCE OF OPERATIONS AND
OTHER PROCEDURE**

Medical Record

DETAILS OF PROCEDURE/TREATMENT**(Descriptive information about the specific procedure(s)/treatment(s) being performed)****Procedure/Treatment Description**

This procedure involves the cutting and removal of excess foreskin. Foreskin is the layer of skin that covers the head of the penis.

Your doctor may place a numbing cream on the foreskin. Or, your doctor may inject a local anesthetic to numb the area around the foreskin.

Your doctor may use one of several special devices. This protects the head of the penis. One type of device uses a special clamp to compress the excess foreskin. The excess foreskin is cut away. The clamp will then be removed. The other device uses a piece of string tied over a plastic ring to compress the foreskin. The excess foreskin is cut away. The string and plastic ring will stay in place. This will fall off within a week.

After removal of the foreskin, a gauze dressing with petroleum jelly or an antibiotic cream will be placed over the area.

Diagnosis

Elective cosmetic procedure to remove the foreskin from the penis.

Benefits of treatment(s) or procedure(s)

This procedure may prevent symptoms caused by inflammation under the foreskin. It may promote penile hygiene. It may reduce the risk of urinary tract infections and penile cancer.

Reasonable risk / complications of surgical treatment(s) or procedure(s)

- * Bleeding.
- * Penile swelling or discomfort (temporary).
- * Undesirable cosmetic effects or scarring.
- * Blood clot(s) under the skin of the penis.
- * Infection.
- * Skin bridge. This is when some remaining foreskin tissue attaches itself to the shaft of the penis during healing. This forms an abnormal bridge.
- * Buried penis. This is when the shaft and the head of the penis becomes concealed under the remaining foreskin and scar tissue in the surgical area.
- * Problems with penile erection, including bending or scar tissue.
- * Wound infection, poor healing or reopening of the incision(s). Blood or clear fluid can also collect at the wound site(s). Infection may require antibiotics and additional surgery.
- * Damage to the urethra or nearby structures. This may be discovered during the procedure, or later.
- * Loss of penis.

Additional Risks Discussed (if applicable):**Alternatives to surgical treatment(s) procedures(s)**

- * Leaving the penis uncircumcised.
- * Circumcision at a later date.
- * You may choose not to have this procedure.

Prognosis if not treatment is received

If you choose not to have this procedure, you may have a slight increased risk for urine infections. There may be an increased risk of sexually transmitted disease (STD) and penile cancer as an adult.

Blood Transfusion (if applicable): Transfusion not expected

Name of Interpreter (if applicable):

**REQUEST FOR ADMINISTRATION OF ANESTHESIA
AND FOR PERFORMANCE OF OPERATIONS AND
OTHER PROCEDURE**

Medical Record

OPTIONAL FORM 522 (REV. 7/2008)
Prescribed by GSA/ICMR FMR (41 CFR) 102-194.30(i)
DoD Exception to OF 522 approved by GSA

Procedural Time-Out (Universal Protocol checklist)

Procedure(s) to be performed is: NEWBORN CIRCUMCISION

1. Preoperative Verification Process, required for all procedures. (Check the appropriate blocks – either performed (Yes), or not applicable/required (N/A))

a. Patient/parent/legal guardian verbally states 2 identifiers (e.g. name/SSN/birth date)	Yes	(required for all procedures)
b. Correct name on chart/record/consent/radiographs	Yes	(required for all procedures)
c. Consent verified for planned procedure completed accurately and signed	Yes	(required for all procedures)
d. H&P within 30 days and updated within the 24 hours prior to procedure	Yes	N/A
e. Patient allergies	NKDA	Reviewed and Confirmed
f. Required blood products/implants/devices/graft material/studies/special equipment	Yes	N/A

2. Site Marking: (Check "Yes", or "N/A" if marking is not required)

a. Patient/parent/legal guardian verbalizes and points to location of surgery	Yes	N/A	
b. Correct surgical procedure and surgical site marked	Yes	N/A	Unable to Mark

3. Surgical Pause "Time Out" - Immediately before starting procedure

a. Correct patient identity verbally verified by staff – use 2 pt identifiers (e.g.(name/SSN/birth date)	Yes	(required for all procedures)
b. Correct side, and site and level marked	Yes	N/A
c. Any required blood products, implants, devices and/or special equipment is available	Yes	N/A
d. Correct patient position	Yes	N/A
e. Labeled diagnostic and radiology images displayed	Yes	N/A
f. Antibiotic administered	Yes	N/A
g. Mark is visible after drape – make incision <u>only</u> if initials are visible and correct Or provider has specified "Unable to Mark" above	Yes	N/A
h. All members of the procedure team are in agreement on procedure to be performed or a patient safety Time-Out is called (see table below)	Yes	N/A

• Site is confirmed with patient but unable to mark:	# Critical Steps Reviewed:
<ul style="list-style-type: none"> • Patient refuses marking • Premature infant • Technically/anatomically not able to be marked • Single midline organ • Site not predetermined – interventional procedures, spinal analgesia, etc. • Teeth <ul style="list-style-type: none"> • Review the dental record including the medical history, laboratory findings, appropriate charts, and dental radiographs. • Indicate the tooth number(s) or mark the tooth site or surgical site on the diagram of teeth or radiograph to be included as part of the patient record. • Correct site verified 2nd time following single tooth isolation 	<ul style="list-style-type: none"> • Surgeon Review <ul style="list-style-type: none"> • Critical or unexpected steps • Operative duration • Anticipated blood loss • Anesthesia Review <ul style="list-style-type: none"> • Previous issues with anesthesia or peri-operative bleeding • Airway status • Any patient-specific concerns • FSBG or b-HCG • Nursing Review <ul style="list-style-type: none"> • Sterility confirmation (including indicator results) • Equipment issues or any concerns

Verified by: _____ Date & Time: _____

Exception to time-out documentation above: By checking this block, I certify that I have performed and documented the required time-out procedures, as described above, in another document or format. (This includes either a written or electronic pre-operative nursing form, procedure note, or clinical / progress note, which is readily available for verification.)

Provider / Assistant signature: _____ Date & Time: _____

Register No.

Clinic/Ward No.

PATIENT'S INFORMATION: (For typed or written entries give:

Name – Last, First MI, grade, rank, rate, SSN, DOB, and hospital or medical facility)
