

peelable armor™

**PEELABLE PAINT
PROGRAM GUIDE**

What Is Peelclear's Peelable Paint?

Peelclear™ is a spray-applied, waterborne, VOC-compliant, fully removable automotive paint system designed for both protection and restyling. Applied with professional paint equipment in a controlled environment, it builds a durable, flexible paint film that can be cleanly removed later—without permanently altering the original finish.

KEY FEATURES:

- **It's paint** - not a coating, wrap, or PPF. You are painting the vehicle using a controlled, removable paint system.
- **Waterborne base technology** - safer handling, low odor, and global VOC compliance compared to solvent-borne peelable systems.
- **Finish options** - clear protection or full color, available in gloss or matte.
- **Professional installation** - designed for trained refinishing professionals and authorized installers using standard HVLP spray equipment.
- **Removable, long-term performance** - engineered to remain peelable with a 20-year warranty when installed and maintained correctly.

Peelclear blends OEM-level appearance, real protection, and the freedom to change or remove it later.

The Peelclear™ System

STEP 1

Surface Primer

Creates the controlled bonding interface between the substrate and the Peelclear paint system, improving paint flow, adhesion control, durability, and clean release during removal.

STEP 2

Base Coat (Waterborne, Peelable Foundation)

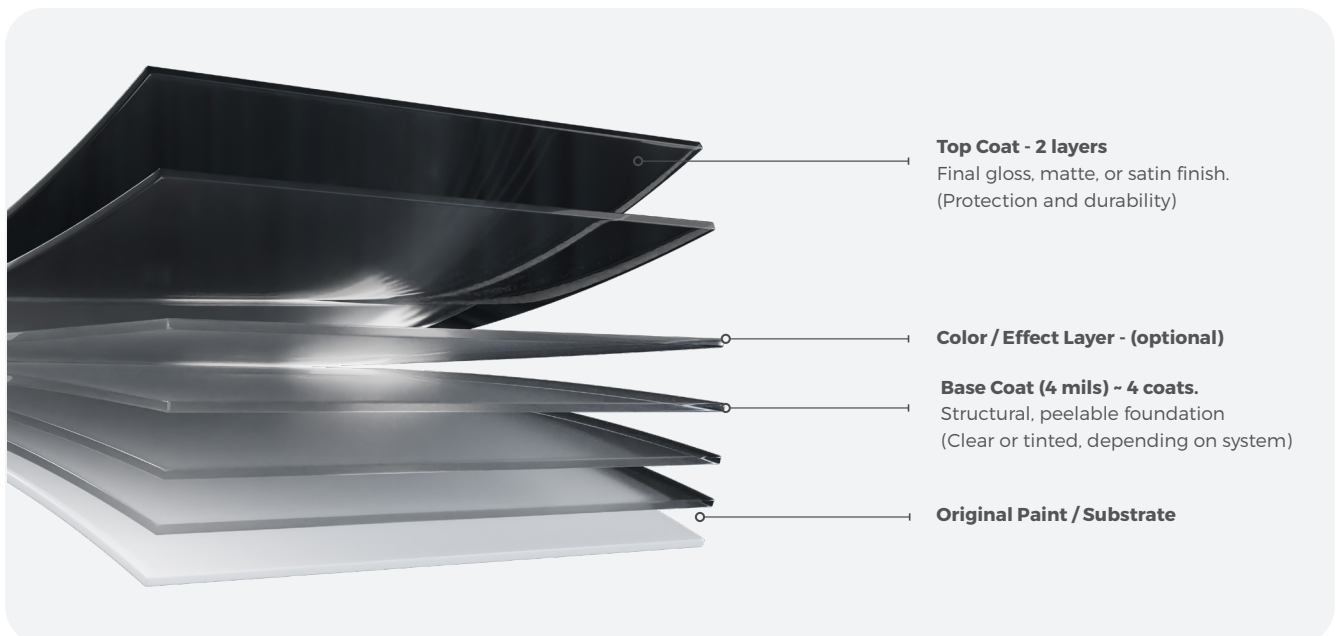

The base coat is supplied clear and can be tinted or used as a clear protection foundation. It's applied in structured layers to achieve the required film build for durability and predictable peel performance.

STEP 3

Top Coat (Finish + Durability)

The top coat bonds with the base coat to create a unified film layer. Available in gloss or matte, it can be refined like conventional clear coat (sand/polish/flow coat) depending on the package level.

Note: No adhesive layer required. The system relies on structured layers and mechanical bonding.

Costs & Setup

Starting From Scratch

If you're building a setup from the ground up:

- **Paint Booths:**
 - Start small with a inflatable booth start around **\$1,500**
 - Full-scale downdraft booth with heating starts around **\$20,000**
- **Additional Equipment:** Spray guns, compressors, buffers, blowers, and standard paint shop tools

You Don't Need a Paint Booth to start!

If you don't have a booth yet, you can still offer Peelclear and start generating revenue immediately by partnering with a local body shop as your spray subcontractor.

Low-investment launch workflow

1. Partner with a local body shop as your subcontractor
2. Perform prep and masking in your own facility
3. Transport the vehicle for paint application
4. Retrieve, polish, and deliver from your shop

This approach lets you launch the service, build demand, and start earning—all while keeping upfront investment low.

Package Option

Showroom Finish

Concours-level perfection with maximum refinement

BEST FOR:

High-end builds, show cars, and clients who demand the absolute best.

COVERAGE:

Exterior painted surfaces, door jambs, trunk jambs, and fuel door. Doors removed for maximum coverage.

FINISH:

After curing, the surface undergoes sanding and multi stage polishing to achieve a mirror like, ultra smooth finish with minimal orange peel.

Our highest level of refinement.

PROTECTION:

20-year warranty

Enhanced Finish

Factory-perfect coverage with added refinement

BEST FOR:

Owners who want full coverage with a flawless, uniform factory-perfect finish.

COVERAGE:

Exterior painted surfaces plus door jambs and trunk jambs. (Doors remain installed.)

FINISH:

Once cured, the surface is denibbed and gently polished to achieve a clean, consistent, factory-perfect finish.

PROTECTION:

20-year warranty

Core Finish

Essential coverage with a clean, factorystyle finish

BEST FOR:

Daily drivers that want protection/color change

COVERAGE:

Exterior painted surfaces.

FINISH:

After curing, the surface receives light denibbing and a refinement polish for a smooth, consistent finish.

PROTECTION:

20-year warranty
