

Irish National Forest Standard

ACKNOWLEDGEMENTS

The Forest Service would like to express its appreciation to the Plenary and Working Groups who played a crucial role in producing the IRISH NATIONAL FOREST STANDARD. The Forest Service also acknowledges contributions from all those stakeholders who responded to the consultation process.

CONTENTS

	Foreword	1
	Introduction	3
	Background	4
	The regulatory framework	6
	Sustainable forest management	8
	Criterion 1: Maintenance and appropriate enhancement of forest resources and their contribution to global carbon cycles	11
	Indicator 1.1: Policy, legislation and support measures	12
	Indicator 1.2: The forest resource and land conversion	12
	Indicator 1.3: Forest ecosystem carbon budgets	12
	Indicator 1.4: Forest industry carbon budgets	13
	Criterion 2: Maintenance of forest ecosystem health and vitality	15
	Indicator 2.1: Policy, legislation and support measures	16
	Indicator 2.2: Defoliation of forests	16
	Indicator 2.3: Damage caused by biotic and abiotic agents	16
	Indicator 2.4: Beneficial influence of biotic agents and ecosystem processes	17
	Indicator 2.5: Changes in physical and chemical properties of soils	17
	Criterion 3: Maintenance and encouragement of productive functions of forests (wood and non-wood)	19
	Indicator 3.1: Policy, legislation and support measures	20
	Indicator 3.2: Productive capacity	20
	Indicator 3.3: Competitiveness of forest industries	21
	Indicator 3.4: Contribution to the national and local economy	23
	Indicator 3.5: Non-wood values	25
	Criterion 4: Maintenance, conservation and appropriate enhancement of biological diversity in forest ecosystems	26
	Indicator 4.1: Policy, legislation and support measures	27
	Indicator 4.2: Area and type of forest	28
	Indicator 4.3: Habitat and species diversity	29
	Indicator 4.4: Forest management	31
	Indicator 4.5: Conservation of species and utilisation of native genetic resources	33
	Indicator 4.6: Diversity and landscape	34
	Criterion 5: Maintenance and appropriate enhancement of protective functions in forest management (notably soil and water)	34
	Indicator 5.1: Policy, legislation and support measures	35
	Indicator 5.2: Protection of waters	
	Indicator 5.3: Protection of soils	
	Criterion 6: Maintenance of other socio-economic and cultural functions and conditions	37
	Indicator 6.1: Policy, legislation and support measures	38
	Indicator 6.2: The socio-economic and employment contribution of the forestry sector	38
	Indicator 6.3: Public awareness and participation	39
	Indicator 6.4: Forestry education, research and training	41
	Indicator 6.5: Recreation and amenity values	41
	Indicator 6.6: Cultural merit Indicator 6.7: Safety in the forest	42
	Notes on forestry practice	43
	Appendices	45
	Glossary	49

FOREWORD

These are exciting and challenging times in Irish forestry, where the objective over the next 30 years is to expand the national forest estate from 9% to 17% of the land cover. This will undoubtedly have major economic, social and environmental implications for the country. As Minister of State with responsibility for forestry, I will be insisting that this development will be carried out within the principles of sustainable forest management (SFM). Following from the Third Ministerial Conference on the Protection of Forests in Europe, held in Lisbon in 1998, Ireland is committed, in perpetuity, to the sustainable management of all our forests. We are custodians of these forests and have a moral responsibility to pass them on to future generations in a much improved and environmentally enhanced form. With this in mind, it is an opportune time to launch my Department's IRISH NATIONAL FOREST STANDARD, CODE OF BEST FOREST PRACTICE and suite of five Environmental Guidelines.

The IRISH NATIONAL FOREST STANDARD outlines the criteria and indicators relating to the national implementation of SFM. Qualitative and quantitative measures are described by which progress towards the practice of SFM will be monitored under Irish forest conditions.

I am particularly pleased that Ireland's CODE OF BEST FOREST PRACTICE is the first to be produced in Europe. This describes all forest operations and the appropriate manner in which they should be carried out to ensure the implementation of SFM.

The suite of five Environmental Guidelines relating to water quality, archaeology, landscape, biodiversity and harvesting, are the mechanisms by which the Forest Service will ensure that the environmental aspects of SFM are implemented. Adherence to the Guidelines is a condition of grant aid and felling licence approval.

The wide-ranging consultation process which took place involved public discussion, expert opinion and the input of sectoral interests including non-government organisations, and is strongly reflected in all of the documents.

These important publications are the result of many long hours of work by the contributors, Forest Service staff and all those who engaged in the consultation process. The implementation in the forest and at national level of the Standard, the Code and the Environmental Guidelines, together with effective monitoring and enforcement by the Forest Service, will ensure that all timber produced in Ireland is derived from sustainably managed forests.

A handwritten signature in black ink that reads "Hugh Byrne". The signature is written in a cursive, flowing style.
