# Paper Dart Plane

Fly it away from faces and pets.

Color the pictures, then turn the page over and fold. The steps are on page 2.

# How to Fold Your Dart

Start with the printed side face down. Numbers match the sheet.

Easy | No scissors

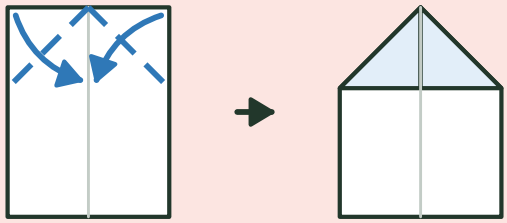

Fold toward you | Fold behind

**1**

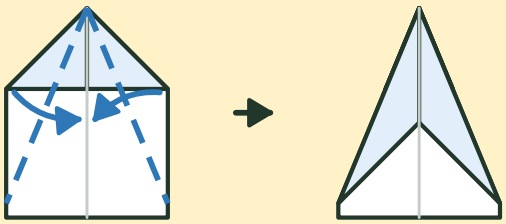

Fold in half the long way, then unfold.

**2**

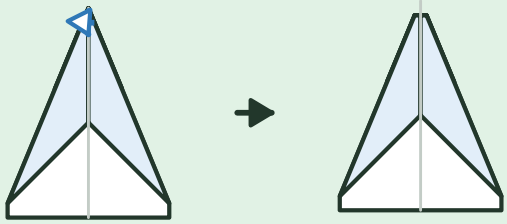

Fold the top corners in to the middle line.

**3**

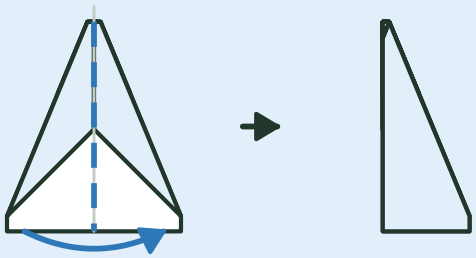

Fold the slanted edges in to the middle line.

**4**

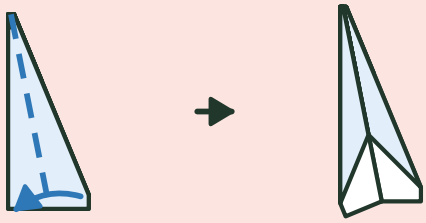

Fold the sharp tip behind to make a blunt nose.

**5**

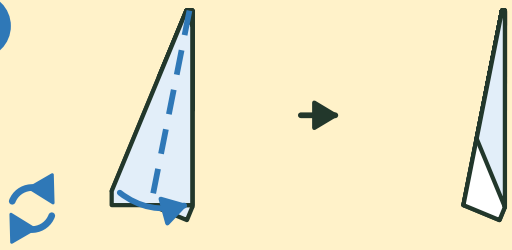

Fold in half on the middle line, flaps inside.

**6**

Fold the top wing down so its edge meets the bottom.

**7**

Turn over. Fold the other wing the same way.

**8**

Open the wings. Throw gently, away from faces and pets.

# How Far Did It Fly?

Throw from the same spot each time, then count your steps to where it lands.

| Throw | How far | What happened? | Best |
|---|---|---|---|
| 1 | | | ☐ |
| 2 | | | ☐ |
| 3 | | | ☐ |
| 4 | | | ☐ |
| 5 | | | ☐ |
| 6 | | | ☐ |
| 7 | | | ☐ |
| 8 | | | ☐ |

**My best flight:** _____ 

## Flying tips

- Press every fold flat and sharp with your fingernail.
- Hold it under the wings and throw gently and level, like a dart.
- Flying in circles? Make both wings the same shape, then try again.

Did you know? A paper plane is a glider. It has no engine, so it flies on the push you give it, and the heavy nose of a dart helps it fly straight.
