

# PHILOSHOPIC<sup>®</sup>

## Job Opening: Front End Developer

At PHILOSHOPIC we empower exciting consumer experiences through our Cloud Commerce Technologies. We are looking for a **Front End Software Developer** to join our team in Cyprus

Interested? Just check if you fit the position and take action!

### **What will be my job description**

You will actively be involved in the development of PHILOSHOPIC's software products and the delivery of customer projects internationally. Some of the products are mature whilst others are new or under development. You will be supervised by the development team leader and encouraged to bring new ideas to the table as well as use your creativity to add new features or improve current ones.

### **What kind of product will I be working on?**

Our core products are cloud based frameworks serving customers 24/7, that handle multi-million transactions or enable certain services for consumers, retailers or suppliers. You will focus on the front end that could be web apps, landing pages, dashboards or mobile apps. You will be given full training of the business and technical aspects as soon as you join!

### **What technical skills do I need to have?**

You should have the capacity to turn concepts and visualisations into simple and exciting User Interfaces and be eager to improve User eXperience. You should feel comfortable to work with technologies like HTML, CSS, JavaScript and preferably with Angular and/or React and/or Bootstrap framework. Additionally, we also use PHP, Java, C# and whatever else is needed to get the job done. You are expected to be well aware of web development concepts.

It would be beneficial if you have understanding in iOS or Android development, ionic and/or nativescript frameworks, or experience using Git and Maven. Being aware of concepts in designing transactional systems as well as knowledge of IT security is always a plus. It is way more important though, to have good analytical skills, the ability to learn quickly on the job, and solve problems efficiently....

### **What kind of a person are you looking for?**

First of all, you will be a key contributor to the team performance, product success, and our customer satisfaction. Although you will always have someone to seek guidance from, you should be self-standing, self-driven and challenge seeking.

You should also be comfortable discussing with customers, partners and users of various levels and properly documenting things. You may occasionally engage to gather requirements and turn them into product features or you may be engaged in workshops to scope an offering for a customer. Finally, being fun or boring, loud or quiet, you should be comfortable working WITH and FOR the Team!

### **Where will I be based?**

You will be part of a small but growing team based out of our PHILOSHOPIC offices in Nicosia. You will be measured on your deliverables rather than the hours spent in office - we work normal hours Mon-Thu and half of Friday and regularly have team functions and ongoing learning. You may be asked to travel abroad if necessary but this is not expected to happen frequently.

### **How many years of past experience do you ask for?**

Number of years doing a job is always an asset and we expect you to have approximately 2 years of front end development experience — however, this matters much less than being a GOOD and efficient developer with the right character towards becoming a superstar developer. If you have the right skills and attitude, the number of years in past service does not necessarily change who you are today. So if you CAN quickly prove that you are capable to get the job done - this is what matters!

### **I think I fit well in that role! What's the next step?**

This is the time that we are excited you find the position of Front-End Developer at PHILOSHOPIC a great fit for your career aspirations.

We thus look forward to receive your CV and any past work portfolio/references by email at [careers@philoshopic.com](mailto:careers@philoshopic.com). You can check us out @ [www.philoshopic.com](http://www.philoshopic.com)

We will then contact you to inform you on the next step - It can be either an appointment to meet and talk or we inform you that the position has been given or your background does not really fit what we are looking for.

Note: Only candidates who fit the description will be contacted in relation to their application progress.
