

PHILOBROKER solutions aim at connecting devices and services in-store. The **ZATCA eInvoicing** edition enables invoice generating points of sale within a merchant to turn compliant with the ZATCA eInvoicing regulations and connects the business with the eFatoora service towards seamlessly reporting each invoice.

The government of the Kingdom of Saudi Arabia has introduced several initiatives towards digitalising the economy and the promotion of electronic invoicing. The enforcement of the ZATCA e-Invoicing mandate necessitates that all taxpayers including all retailers/merchants, should have a technical solution and follow a standardized process for invoice generation, compliance and reporting to ZATCA. Businesses are therefore required by law to comply fully and be on-time. The transition towards compliance should be seamless, low cost and require minimal or no changes to existing systems and operational practices.

The solution consists of a Local Agent (LA) installed at the point of sale or a device within the store network and a cloud native or on-premise Central Collector module (CC), along with a web-based admin portal. The LA is responsible for gathering transactional data to be sent to the CC, stamping each invoice with the appropriate compliance signature and generating a QR to be printed on the generated invoice. It shall be integrated with the current Point of Sale application and can run on Windows and Linux based devices.

The CC is responsible for onboarding the LAs, collecting stamped invoices from LAs, and ensures they are reported to ZATCA as well as feeding the admin with reporting and data.

The outcome being an end-to-end compliant eInvoicing solution that can serve any in-store architecture for all B2C transactions made. PHILOBROKER ZATCA eInvoicing comes with a seamless well defined implementation approach and best practices consulting to ensure merchants achieve full compliance at minimal impact.

We craft cloud technologies that enable commerce and financial services through innovation and simplicity. Our solutions and services aim for an exciting consumer experience and a simple, admin-less and robust operation for your business. We specialise in the digital transformation of legacy in-store services and the omni-channel consumer engagement!
