IDEAS BOOK

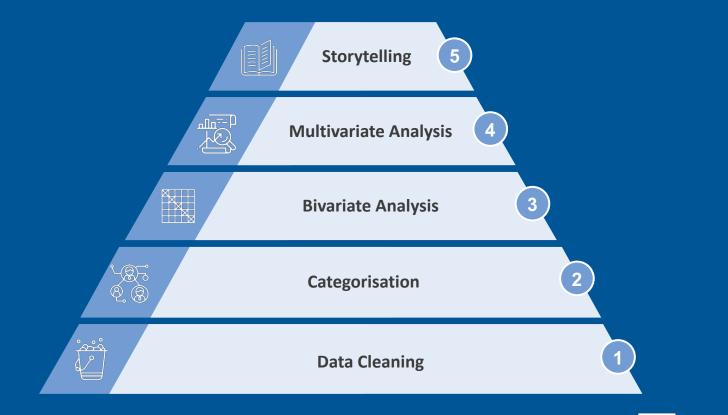

Oral stories predate the written word, and continue to be committed to memory and passed from generation to generation The brain is trained to find the easiest connection between cause and effect, which is what stories enable us to do

We are more likely to remember stories if they are personal or emotional than statements of facts

#### Five Levels Of Data Analysis

# 1. Data Cleaning

- Easier to work with

### 2. Categorisation

Insight generated: Overall 55% leave negative views, 25% mention service

- Coding
- Grouping
- Allocation

# **3. Bivariate Analysis**

Insight generated: Satisfaction score & tips are related, smaller parties are more satisfied and negative reviews are more likely to mention service

# 4. Multivariate Analysis

Insight generated: Confirmation that tips & satisfaction are related. The most satisfied group is small parties who arrive before 5pm.

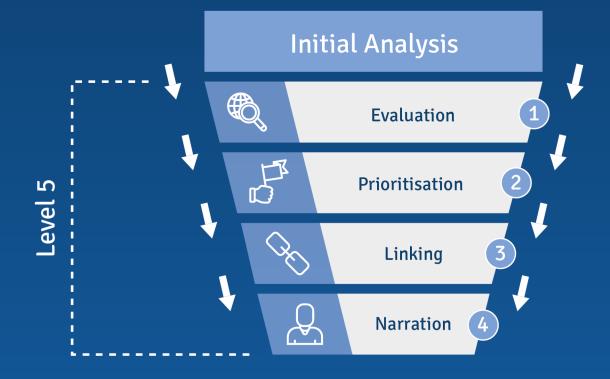

- Drivers analysis
- Factor analysis
- Cluster analysis
- Correspondence analysis

# 5. Storytelling

Insight generated: Negative feedback is high due to concerns about service, which has led to a lower satisfaction score and a reduction in tips. This is driven by large parties or peak time visitors.

# Five Important Qualities Of A Storytelling Analyst

Broad research skills

Understanding the context

Time and effort

Trust and knowledge

A good storyteller

# The 10 S's Of Market Research Storytelling

# The Power Of Storytelling

Storytelling has the potential to turn market insights into action by making market research findings...
