

Indonesia Green Awards (IGA) 2023
**BRING HOME EIGHT ENVIRONMENTAL MANAGEMENT AWARDS,
PETROKIMIA GRESIK DEFENDS THE TITLE "THE BEST IGA" AWARD**

Number : 15/SP/PG/II/2023
Day / Date : Tuesday, February 28, 2023

Petrokimia Gresik, an Agro-industrial Solutions company and a holding member of the Pupuk Indonesia, was again named "**The Best Indonesia Green Award (IGA)**" in 2023, after successfully receiving eight awards in sustainable environmental management. The award was handed over directly by La Tofi, Chairman of The La Tofi School of CSR as the organizer to the SVP of Petrokimia Technology Gresik, Erinto represents management, in Jakarta, recently.

Separately, the President Director of Petrokimia Gresik, Dwi Satriyo Annurogo on Tuesday (28/2) said that the sustainable environmental management program run by Petrokimia Gresik and received an award from IGA was not only in the form of innovation for the company's operations but also an effort to build the environment in the community.

"We realize that environmental management has become an important instrument in increasing the competitiveness of the company. For this reason, Petrokimia Gresik continues to increase its commitment to environmental management, in all operational lines and community communities, especially now that Petrokimia Gresik is one of the companies with the title of Gold Proper for two consecutive years from the Ministry of Environment and Forestry," said Dwi Satriyo.

The eight programs that received awards from IGA were the development of Kali Lamong Mangrove conservation tourism (Kalam Mangrove); the Reuse of sacks used for Urea Fertilizer packaging; the saving of water resources with the Critical Operation Recovery Program using a Hydrochloric Acid absorbing disassembly water sprayer.

The fourth program is technological engineering in saving energy or the use of new renewable energy through the reactor Energy Consumption Management Program by installing an HCl absorbent disassembly water atomizer at the ZK Plant; then develop biodiversity with the Bamboo Frame Geobag Program as a Protector of Mangroves and Shellfish from Environmentally Friendly Tidal Waves;

Petrokimia Gresik is also pioneering pollution prevention with the Hydrochloric Emission Pollutant Load Reduction Program with the Vf System 2.0 Disassembly Water Sprayer; furthermore, it develops integrated waste processing with the Agricultural Waste Utilization Program into Silage Using Petro Biofeed; and finally the Digitization of Nature Conservation by PR Company with the Program of Using Social Media as a Forum for Information About Nature Conservation.

"In this event, we participated in eight programs, and *Alhamdulillah*, all of them received awards. For this achievement, Petrokimia Gresik was named The Best IGA 2023 or the winner of the most awards," said Dwi Satriyo.

He added that this move will not make Petrokimia Gresik complacent, on the contrary, the company is increasingly motivated to improve standardization in environmental management. Considering that Petrokimia Gresik has a strategic position in supporting food security, aspects of environmental management in the company's operations are always a priority.

"We have implemented an integrated production process that prioritizes zero waste and continues to strive for energy efficiency. This is in line with the mission of the Green Industry Cluster carried by the Pupuk Indonesia holding," concluded Dwi Satriyo.

For information, this year is the fourth year that Petrokimia Gresik has participated in the IGA since 2020. Where the positive achievements were maintained by Petrokimia Gresik.
