

**PETROKIMIA GRESIK CONJURES BURIAL GROUNDS  
INTO MOSLEM MEMORIAL PARK AND VEGETABLE GARDEN**

Number : 11/SP/PG/II/2023  
Day / Date : Friday, February 17, 2023

Petrokimia Gresik, an Agro-industrial Solutions company and the holding member of the Pupuk Indonesia together with Takmir Masjid Nurul Jannah renovated the burial ground in the company's areal to become Moslem Memorial Park (MMP) which is also beautified with MMP Garden with various vegetable crops. The inauguration, which was marked by a joint harvest at the MMP Plantation, was carried out by the President Director of Petrokimia Gresik, Dwi Satriyo Annurogo.

Dwi Satriyo said that this program is a form of implementing an Environmental Management System and the company's efforts to grow public awareness of the importance of maintaining environmental quality and preserving nature. Currently, the burial ground intended for residents of Ngipik Village, employees, and retirees has a more modern, comfortable, and safe feel.

"Initially, we saw that the burial ground in the Petrokimia Gresik area was not like this before, so it made this place less known by residents so that its use was less than optimal. Seeing these conditions, we took the initiative to renovate," said Dwi Satriyo.

In addition to renovating the cemetery, Petrokimia Gresik also rejuvenated the surrounding land into a garden planted with various vegetable commodities such as spinach, kale, mustard greens, lettuce, eggplant, cayenne pepper, and large chilies.

"The management of the Nurul Jannah Mosque will be the manager of the Moslem Memorial Park, and Petrokimia Gresik as the manager of the MMP Garden in the Moslem Memorial Park area," he said.

The cultivation technology applied to the garden uses balanced fertilization recommendations for Petrokimia Gresik, including applying Limestone (Kaptan) soil reformers, Premium Petroganic Organic Fertilizers, Phonska Plus Fertilizers, ZA Plus Fertilizers, and Phosgreen Fertilizers which can increase crop productivity and crop quality.

"The harvest on the Moslem Memorial Park garden land can be purchased by residents, as well as Petrokimia Gresik employees. It will be reused for garden maintenance to create a sustainable agricultural cycle in the Petrokimia Gresik Area," explained Dwi Satriyo.

He further explained that this program strengthens the commitment of Petrokimia Gresik as an environmentally company. In addition, MMP can be a facility that can be utilized by residents of Ngipik Village, employees, and retirees of Petrokimia Gresik.

## PRESS RELEASE

"We hope that this activity can provide education to residents by utilizing yard land into gardens that can be planted with vegetables, thus further strengthening the joint commitment to realize national food security through sustainable agriculture by providing agro-industrial solution products," concluded Dwi Satriyo.
