

PRESIDENT DIRECTOR OF PETROKIMIA GRESIK SUPPORT RSPG'S DEVELOPMENT TO BE A SOLUTION FOR PUBLIC HEALTH

Number : 30/PR/PG/VI/2022
Day / Date : Thursday, 9 June, 2022

President Director of Petrokimia Gresik, Dwi Satriyo Annurogo was inaugurating best service from Rumas Sakit Petrokimia Gresik (RSPG) or Petrokimia Gresik Hospital, namely Fertility Clinic and Medical Chek Up Clinic, as well as starting a development project of Inpatient facilities at Petrokimia Gresik Hospital Driyorejo.

Dwi Satriyo conveyed that his parties support the strategy of PT Petro Graha Medika (PGM) as the administrator of RSPG, due to this development program is carried out based on public need. So that this PGMs' innovation able to be public health solution.

"The are three indicators that must be own by hospital that can be public destination, they are quick service, complete facilities in accordance with the level of the hospital or clinic, and comfortable, these three indicators become a concern for PGM," said Dwi Satriyo, Thursday (9/6).

Previously, President Director of PGM, dr. Retno Hartini conveyed that this Fertility Clinic will be the first and the only one in Gresik. This service is presented due to quiet high infertility case in Gresik.

"Child is something longed for, but infertility for the married couple in Gresik, industrial city is quite a lot." Said

Indonesia data statistic mentioned that infertility case at each Regency reach 20% from the productive age couple. This data is strengthened by receiving productive age patient with infertile at gynecologist RSPG with average 40 visits per month. This number increase in each year.

dr. Retno added that those infertility case need advanced handling through recommended hospital in Surabaya. This is become obstacles, because productive age patients spend most their time in office.

"The presence of Fertility Clinic RESPG ease patients, because they do not have to wasting time do check-up at other hospital," said dr.Retno.

In addition to the Fertility Clinic, dr. Retno explained that the Integrated Medical Check-Up Unit was a development of the medical check-up service that previously existed, but there were still some shortcomings. For example, waiting rooms are less spacious, and examinations that still need to be moved from one room to another can even mix with patients from other service units.

"Medical check-up activities for employees are very important considering the health of employees will directly affect work productivity. We have established a number of collaborations in handling occupational health, including employee medical check-ups with the RSPG Group network so far," she explained.

Regarding the inpatient construction project of RSPG Driyorejo, dr. Retno said that this project was started because the existing service rooms at RSPG Driyorejo currently have exceeded capacity, both in inpatient and outpatient settings. With the development of this

inpatient building, RSPG Driyorejo will increase the capacity of patient beds from 64 to 111. As well as add specialist rooms/poly rooms from 7 to 11 rooms, namely the addition of Medical Check Up services, Urology Specialists and the development of Cardiology and Paediatrics Specialist services.

"We hope that with the development of this inpatient building, RSPG Driyorejo will provide more comfort and satisfaction for the community, especially in the South Gresik area in handling health services," concluded dr. Retno.
