

**PREVENTING LEGAL PROBLEMS AND DISRUPTIONS
IN THE DISTRIBUTION OF SUBSIDIZED FERTILIZERS,
PT PETROKIMIA GRESIK COOPERATES WITH THE
ATTORNEY GENERAL'S OFFICE**

Number : 74/SP/PG/IX/2022
Day/Date : Tuesday, September 27, 2022

PT Petrokimia Gresik, an Agroindustry Solution company member of the holding of PT Pupuk Indonesia (Persero) again signed a Memorandum of Understanding with the Gresik District Attorney's Office, concerning Coordination in the Implementation of Duties and Functions, for securing the distribution of subsidized fertilizers, as well as legal assistance in the Civil and Administrative Sector (TUN). The signing of the Memorandum of Understanding was carried out by the Main Director of PT Petrokimia Gresik, Dwi Satriyo Annurogo with the Head of the Gresik District Attorney's Office, Muhammad Hamdan.

Dwi Satriyo Annurogo said that the extension of this cooperation is a step to optimize the company in carrying out the task of distributing subsidized fertilizers. The company always ensures the availability of fertilizer stocks under the provisions of the Regulation of the Minister of Home Affairs (Permendag) and guarantees the quality of fertilizers in buffer warehouses and agricultural stalls so that fertilizers can be delivered to the hands of farmers with the principle of 6T (Right Place, Right Price, Right Quantity, Right Quality, Right Type, Right Time).

"For this reason, this collaboration is also an effort by PT Petrokimia Gresik to strengthen supervision and security of fertilizer distribution and distribution activities in the Gresik area," said Dwi Satriyo.

He realized that carrying out the government's mandate to distribute subsidized fertilizer and run the company's business, certainly cannot be separated from the risks and legal problems that the team may have as a result of the company's operations.

With this signing, Dwi Satriyo hopes that the company's legal problems that arise can be overcome together so that it does not interfere with the company's operations. PT Petrokimia Gresik is a national Vita I Object whose production operations must not stop to maintain the national food supply.

Meanwhile, this cooperation is an extension of the previous memorandum of understanding. PT Petrokimia Gresik and Kejari Gresik have collaborated as stated in this Memorandum of Understanding since 2016.

Meanwhile, to strengthen supervision of subsidized fertilizer distribution, PT Petrokimia Gresik previously also collaborated with the Central Java Regional Police, the South Sulawesi Prosecutor's Office (Kejati), and the East Java Attorney General's Office.

"We will cooperate with many parties to increase supervision of subsidized fertilizers. The more proactive parties, the stricter the supervision will be," concluded Dwi Satriyo.
