

**STRENGTHENING COMMERCIAL PRODUCT  
PETROKIMIA GRESIK OFFICIALLY OPEN NEW JETTY**

Number : 67/SP/PG/XII/2019  
Day & Date : Friday, December 27, 2019  
Place : Gresik, East Java  
Event : The Opening of Petrokimia Gresik C Jetty

Petrokimia Gresik is a company of agroindustry solution producer and the member of Pupuk Indonesia holding company, has just open the construction of C jetty with an investment of around Rp300 billion and a loading and unloading capacity of 1.5 million tons per year in Gresik, East Java, Friday (12/27).

President Director of Petrokimia Gresik, Rahmad Pribadi conveyed that this jetty was built to support the loading and unloading activity, especially gypsum product from PT Petro Jordan Abadi (PJA) and Phosporic Acid II Plant of Petrokimia Gresik which has been producing at its maximum capacity.

This project cooperates with PT Adhi Karya as a contractor and starts working on December 16, 2017 until December 9, 2019 or 720 calendar days. C Jetty was built with dimension 432 meter x 27 meter.

"The project was run well and proposes on factor of cost, quality, and time. And *Alhamdulillah* the project can be done on November 5, 2019 or 34 days faster from the plan," said Rahmad.

Rahmad added that C Jetty is a development project that has been set out in the company's Long Term Plan (RJP), which is one of Petrokimia Gresik answers of future challenge. Especially to overcome the loading and unloading density while reducing the dwelling time at the main port of Petrokimia Gresik.

"The existence of this jetty is a strategic step for the sustainability of the Petrokimia Gresik business in providing and distributing products, both fertilizer and non-fertilizer, to support the National Food Security program, and as a provider of solutions for the agro-industry sector," Rahmad said.

The role of C Jetty has become more vital because in the Business Transformation program, export sales have become one of the company's performance priorities. So C Jetty is a manifestation of the company's commitment to meet the target as a market leader and dominant player to support the agro-industry sector.

With the operation of this jetty, Petrokimia Gresik has a total of four Jettys entirely located in Gresik, that is the main jetty or Terminal for Self-interest (TUKS), coal jetty, construction jetty, and C jetty, with a total loading and unloading capacity of 9 million tons per year.

"The development of this port is very important, considering the Petrokimia Gresik production capacity continues to increase, which currently has reached 8.9 million tons per year, and will continue to grow in the coming year," concluded Rahmad.
