

"Petrokimia Gresik Cares & Shares"  
**NEW NORMAL FREE CIRCUMCISION 2020**  
**TO REDUCE COMMUNITY EXPENSES AMIDST PANDEMIC**

Number : 97/SP/PG/XII/2020  
Day / Date : Tuesday, December 1, 2020  
Place : Gresik  
Event : New Normal Free Circumcision of Petrokimia Gresik 2020

Petrokimia Gresik is an Agroindustry Solution company and member of Pupuk Indonesia holding, in collaboration with Grha Husada Hospital, held a "New Normal Free Circumcision 2020" which was attended by 23 children who live around the company, Monday (30/11) and Tuesday (1/12).

Corporate Secretary of Petrokimia Gresik, Yusuf Wibisono stated that this activity is part of the **"Petrokimia Gresik Cares & Share" program** where Petrokimia Gresik is committed to being present and contributing to the surrounding community, especially in the midst of the current pandemic.

"We hope this program can ease the burden on the community in the midst of a pandemic, so that the existence of Petrokimia Gresik can truly benefit the community around the company," said Yusuf.

The implementation of free circumcision this year was very different from the previous year. Where registration of participants and delivery of information is carried out online through application messaging, and the implementation of circumcision is no longer mass but carried out separately by paying attention to the protocol for preventing the transmission of Covid-19.

"Through this program, at the same time we want to invite the public to always be disciplined in implementing health protocols to reduce the risk of Covid-19 contagion, so there is no need to be too afraid in their daily activities," he added.

He further revealed that to be able join this program, participants must pass an initial health check in the form of a body temperature check and rapid test antibody first.

"Only participants with non-reactive results can be circumcised. Meanwhile, participants with reactive results were directed to the nearest Public Health for further treatment," he said.

The room is also prepared with open windows to facilitate air circulation and minimize the potential for the spread of aerosols or particles in the air, and is regularly cleaned and disinfected periodically after each circumcision is completed. Through this program, each participant gets a complete circumcision package starting from the circumcision process, medication, control, sarong and pocket money.

"So that the assistance we provide is not partial, but comprehensive, starting from circumcision to treatment and control," said Yusuf.

Meanwhile, the Head of Section for People's Welfare of Ngipik Village, Yonno Parnianto Utomo, assessed that this circumcision program is very helpful for the community around the company, considering that quite a lot of the economy of the surrounding community has been affected by the Covid-19 outbreak.

## SIARAN PERS

He revealed that there were three children from Ngipik Village who participated in the Petrokimia Gresik Free Circumcision program. Two of them are the twins Muhammad Rafi and Muhammad Radhi who are 6 (six) years old. Yono revealed, this program greatly eases the burden on the twins' family, because both of them are orphans since their father died a year ago.

"*Alhamdulillah*, there is this circumcision program so that it can ease the burden on their mother, especially in the midst of a pandemic like now," he said.

Yonno also hopes that Petrokimia Gresik's program for the community around the company can continue to be distributed even in the midst of a pandemic. Certainly by staying disciplined in implementing health protocols.

"Many of Petrokimia Gresik's programs for the community around the company have been carried out routinely. I hope this program can still be implemented even in the midst of the Covid-19 outbreak," he concluded.
