

**SECURITY MANAGEMENT SYSTEM OF PETROKIMIA GRESIK
GETS "GOLD REWARD"**

Number : 102/SP/PG/XII/2020
Day / Date : Tuesday, December 29 2020
Venue : Jakarta
Event : Receiving a Security Management System Certificate (SMP) from Barhakam Polri.

Petrokimia Gresik is an Agroindustry Solution company and member of the Pupuk Indonesia holding, received a Security Management System (SMS) certificate in the "category Gold Reward". The certificate was handed over directly by the Head of the Police Security Maintenance Agency, Police Commissioner General Agus Andrianto to the President Director of Petrokimia Gresik, Dwi Satriyo Annurogo at the "Baharkam Polri" Building, Jakarta, Tuesday (29/12).

Dwi Satriyo revealed that the "Gold Reward certificate category" was obtained by Petrokimia Gresik after going through a series of SMS audits conducted by the Police Security Maintenance Agency team with a score of 89 percent some time ago. This certificate is valid for a period of 3 (three) years, and the auditor team will conduct an evaluation each year.

"For this reason, all Petrokimia Gresik personnel are committed to maintaining the security of state facilities, so that this certificate can really be held accountable for," said Dwi Satriyo.

According to him, this SMS is very important for Petrokimia Gresik which is a National Vital Object, where the Petrokimia Gresik business operations must not be disturbed in order to maintain Indonesia's food security, as well as support for the national economic recovery program amid the Covid-19 outbreak.

"This security is needed to maintain the smooth operation of Petrokimia Gresik, and it will be a big problem if we all ignore it," said Dwi Satriyo.

He further explained that Petrokimia Gresik currently has assets of Rp47 trillion which must be properly safeguarded for the smooth distribution of subsidized fertilizers, in accordance with the mandate given by the government.

As it is known, the government has increased the allocation of national subsidized fertilizer by 1 million tons at the beginning of the October-March planting season (Ocmar), or from 7.9 million tons to 8.9 million tons throughout 2020. Meanwhile, the Petrokimia Gresik assignments increased by 258,832 tons, from 4.7 million tons to 4.9 million tons.

Dwi Satriyo ensures that the Petrokimia Gresik SMS's team has made optimal efforts to secure assets, especially since Petrokimia Gresik stands in the middle of community settlements or surrounded by to eight villages and sub-districts, including Roomo Village, Tlogopojok Village, Lumpur, Kroman, Karangturi, Karangpoh, Sukorame, and Ngipik Village.

"In terms of distance, the Petrokimia Gresik factory is very close, even directly adjacent so the risk is very high," said Dwi Satriyo.

In addition, Gresik is known as the Industrial Estate. When there are demonstrations related to employment, the center is in Gresik. For this reason, he ensured that the Memorandum of Understanding (MoU) with the East Java Regional Police for troop deployment would soon be realized.

Petrokimia Gresik will also add CCTV points to tighten supervision so that the security system in the company is in accordance with the standards or recommendations of the Police Security Maintenance Agency auditor team.

Meanwhile, the "category Gold Reward" was obtained by Petrokimia Gresik from the assessment elements of Commitments and Policies, Security Patterns, Security Configuration, Security Implementing Capability Standards, and Monitoring and Evaluation. Dwi Satriyo also confirmed that the input from the auditor team to increase the security of each element at Petrokimia Gresik would be implemented immediately.

"This Security Management System is one of the priorities for the smooth running of the company's business in achieving its goal of becoming a *market leader* and *dominant player* in the agroindustry sector," Dwi Satriyo concluded.
