Use estimation to help you solve, or check the answers to these problems.

Is this calculation correct? How do you know?

15,5□1 - 8,□10 = 5101

Jason is saving for a seven-night holiday. The flights will cost £1,345 and the hotel will cost £89 per night. He estimates that he will spend approximately £2000 is this a sensible estimate?

Mr Gilbert is planning a trip to the Science Museum for Year 6. There are 132 Year 6 pupils and six teachers going. A coach can transport 54 people. Mr Gilbert estimates he will need four coaches for the trip. Is this a sensible estimate?

Insert addition signs into these number sequences so the sum is correct. The first one has been done for you.

Number sequence	Calculation	Sum
123456	12+3+45+6 =	66
54321		60
12345		168
987654321		99
