- ELT Kannad AF Integra 406 Mhz + RC 200 control unit.
- Garmin GMA 245 digital audio panel.

Comments

This Bristell RG is "as new" having only 61 hours of airframe and engine use. It is a single engine, all metal, low-wing monoplane of semi-monocoque construction with 2 side-by-side seats. The constant speed propeller is managed automatically by a hydraulic governor adjusted mechanically by alever in the cockpit. The maximum takeoff weight is 600kg. It holds 120 liters of fuel and burns 20 liters per hour. It will cruise at 120 knots. This aircraft is specifically designed for comfort and performance while engaging in recreational and cross-country flying, basic training and non-aerobatics training. This aircraft is perfect for a flight school, syndicate or single owner.

Additional Features

Heated pilot seats. Retractable tricycle undercarriage with steerable nose wheel and a ballistic parachute.
