

COURSE

Transoral Robotic Thyroidectomy

Date: April 28 & 29 - 2022

Faculty: Prof. Dr. Özer Makay

Duration: 2 days

Delegates: 2 delegates per session

Course details

The aim is to comprehensively cover advanced robot techniques in transoral robotic thyroidectomy. Under the guidance of Prof. Dr. Özer Makay you will learn to perform a TORT from A to Z through lectures & hands-on wetlab training.

Faculty

Prof. Dr. Özer Makay

Day 1

Theoretical & practical wet-lab training with computer simulation & on porcine models.

Day 2

Theoretical & practical hands-on training on human tissue.

Pre-course requirements

- The trainees must have previous experience on a robotic platform & familiarity with endoscopic endocrine surgery & conventional thyroid surgery.
