-

New in this Release

All new features, updates and changes to the Mobile Device Application for this release version will be outlined in this section. All new items have been through Digital Environments' elaborate QA QC process to confirm reliability and functionality to the user.

Highlighted New Features

A list of all the new features created for the Mobile Device Application will be described in this section.

1) Property selection menu enhancements

Property Menu

All updates and changes to the Property Menu in the Mobile Device Application will be described in this section.

1) Property Selection Enhancements

- a) The ability to search and sort all of the properties in the account has been added to the mobile applications "Property Menu"
 - i) **Default Sort** - The list of properties is now by default sorted to have to most recently created property at the top of the list
 - ii) **Sort Filter** - A property sorting filter option has been added to the upper right corner of the "Property Menu" screen. Properties can now be sorted by the following parameters:
 - (1) Updated on
 - (2) Property name
 - (3) Created on
 - iii) **Search Bar** - At the top of the "Property Menu" screen a search bar has been added. Properties that have been created can be searched for by the property name.
-

Problems Resolved in this Release

Previous Release Defects Resolved

Below are the Mobile Device Application defects that have been resolved in the latest release.

Ticket Number	Brief Description of Resolved Defect

Current Release Defects Reported

The following are currently known defects within the Mobile Device Application and their corresponding estimated resolution release. This does not include new features that will be introduced for future version releases.

Ticket Number	Brief Description of Known Defect Workaround Process if Available	Estimated Resolve Release
