

Supplementary Table 2 – Detailed comparisons of RNAi phenotypes with those of known loci

Legend:

The bacterial clones corresponding to the genes on Chromosome I were all screened twice using *rrf-3* (Screen A/B), the clones of the other chromosomes only once. Next, the clones for which we only detected a phenotype once and that were specific for the *rrf-3* screen, compared to Fraser et al. (2000) or Kamath et al. (2003), were re-tested (Repeats). For each chromosome the phenotypes of mutants of previously studied genes were compared to the RNAi phenotypes obtained in this study and by Fraser et al. (2000) or Kamath et al. (2003).

Loci of Chromosome I are listed four times; for the results reported by Fraser et al. (2000), for Screen A, screen B, and the Repeats.

Loci of the other chromosomes are listed three times; for the results reported by Kamath et al. (2003), for the Screen, and the Repeats.

Mutant Phenotypes	The published phenotypes for the indicated locus
GenePairs Name	Name of genepair used to PCR amplify genomic fragment that targets the locus: current mappings of genepairs to predicted genes is in WormBase (http://www.wormbase.org)
Predicted Gene	Predicted gene targeted by the genepair in WormBase in July 03 In most cases the genepairs name and the name of the predicted gene are the same
Emb	Percent embryonic lethality obtained
Ste	Ste = no progeny; 1-5 or 6-10 = number of progeny laid (reduced brood size)
Phe columns	Post-embryonic phenotypes observed
Dev	Gro = slow growth; Lva = larval arrest
Hit	A phenotype was obtained
Pub	The RNAi phenotype was similar to the published phenotype

o = no phenotype detected

x = experiment failed

empty = not done

Abbreviations: Emb (embryonic lethal), Ste (sterile), Stp (sterile progeny), Gro (slow post-embryonic growth), Lva (larval arrest), Lvl (larval lethality), Adl (adult lethal), Bli (blistering of cuticle), Bmd (body morphological defects), Clr (clear), Dpy (dumpy), Egl (egg-laying defective), Him (high incidence of males), Lon (long), Mlt (molt defects), Muv (multivulva), Pch (patchy appearance), Prz (paralyzed), Pvl (protruding vulva), Rol (roller), Rup (ruptured), Slu (Sluggish movement), Sck (sick), Unc (uncoordinated), Hya (hyperactive), Knk (kinker), Pat (paralyzed arrest at embryonic two-fold stage),
