The maps illustrate the distribution of refugia, intermediate, and exposed regions at different SST variability scenarios for 2.0°C and 3.0°C warming thresholds.

**Exposure category:**
- Refugia: High SST variability
- Intermediate: Moderate SST variability
- Exposed: Low SST variability

**SST variability:**
- High
- Moderate
- Low

The maps are color-coded to represent the exposure categories and SST variability at both 2.0°C and 3.0°C warming scenarios.
