

S1 Figure. Distributions of H_p , $-ZH_p$, F_{ST} and $-ZF_{ST}$. **A** The plot shows the distribution of all calculated H_p scores within a 150 kb window. **B** Standardized normal distribution of negative Z-transformed H_p scores. **C** Distribution of all calculated pairwise F_{ST} scores to bezoars within a 150 kb window. **D** Standardized normal distribution of negative Z-transformed F_{ST} values. Mean (μ) and standard deviation (σ) are indicated.
